Sometimes you do everything right, but it just isn't your day. A part fails and your helicopter comes apart in flight, or, another aircraft runs into you and the pieces of both fall to the ground below, or the enemy gunner pulls the trigger at just the right moment and his rounds find your aircraft in exactly the right spot to take it out of the sky. Whichever way it happens, it wasn't your day. Which is why, after 24 years and over 5,000 flight hours with four armed services, Major Robert Curtis was so surprised at being alive when he passed his retirement physical. Starting with enlisting in the Army to fly helicopters during Vietnam, and continuing on through service with the National Guard, Marine Corps and Royal Navy, he flew eight different helicopters—from the wooden-bladed OH-13E, through the Chinook, SeaKnight and SeaKing, in war and peace around the world. During that time over 50 of his friends died in crashes, both in combat and in accidents, but somehow his skill, and not an inconsiderable amount of luck and superstition, saw him through. His flying career began with a misbegotten strategy for beating the draft by enlisting. With the Vietnam War raging full blast in 1968 the draft was inevitable, so he wanted to at least get some small measure of control of his future. Although he had no thought of flying when he walked into the recruiting office, he walked out signed up to be a helicopter pilot. What he did not know was that

43% of all the aircraft sent to Vietnam were destroyed in combat or accidents. Soon he was in the thick of the war, flying Chinooks with the 101st Airborne. After Vietnam he left the Army, but kept flying in the National Guard while going to college. He was accepted at two law schools, but flying is addictive, so he instead enlisted in the USMC to fly some more. Over the next 17 years he would fly around the world off US and British ships from Egypt to Norway and all points in between. His engaging story will be a delight to all aviation enthusiasts.

Dr Rolls' (Stuart's) first psycho-spiritual book was Ghosts E.S.P. and Psychology, and his My Psychic Experiences, U.K., NZ & Australia was hardly in need of critique. It was so knowledgeable, also beautifully auto biographical, sincere and heartfelt. That first edition was followed by its second edition, re-named Afterlife; My Amazing Two-way Contacts with (in UK, NZ & Australia). Now he has produced this all-encompassing masterpiece The Hereafter and Supernatural so warmly for readers generally but it is scholarly enough to reach the highest intellect. The remarkable fifteen chapter headings and epilogue note the book's entire sweep, ranging the whole psycho-spiritual spectrum. Where else in one book would you find researching the past, present and future paranormally and harnessing a 'now consciousness', 'spiritual gifts' and one's own transcendence? Stuart feels equally at home with Einstein and quantum science generally, in quoting 'all is in flux' (never mind time!). These are not only manifest universes where constant material change seems the evolutionary keynote but where we ourselves spiritually/psychically live on and on in spirit, to fully evolve into our higher selves, eternally. No quarrel with religion this - or even science - for quantum thinking notes a certain telepathy between particles of matter. Organisations, too, like The Churches Fellowship for Psychic and Spiritual Studies - open to sciences of the paranormal/parapsychological - peacefully bring on dogma free space-age, after-life thinking, for all humanity. Adventure now with Dr Rolls (Stuart) - do!

Compact Utility Tractors, or CUTs, are cute little cutters! As farming became more refined so did the needs of tractors. The answer was a smaller, more maneuverable and fuel-efficient tractor with a variety of implements and attachments. With this focus on special needs, attachments became available such as plows, disc harrows, mower decks, cultivators, spreaders, snowblowers, and more. They have become a necessary utility for farmers, orchards, small construction jobs, and landscaping/maintenance for estates, parks and golf courses. At the forefront of this evolution was the Farmall Cub and John Deere Model L. Then came the Japanese invasion; a new kind of tractor by companies such as Yanmar and Kubota. These four-wheel drive machines were rugged and tough and used a variety of hydraulically powered attachments. American companies like John Deere, International Harvester, and Massey Ferguson built their own their own four-wheel versions. Today's compact tractors, such as the Kubota BX series, Massey Ferguson's GC series, and the John Deere 3000, offer an even larger selection of implements for special purposes.

## **The Hereafter and Supernatural**

Drawing from his extensive business management experience, Pradip Chand turns traditional wisdom on its head when he proposes that Brand Loyalty is inversely proportional to the income and education levels of the 'knowledge consumer'. He examines how and why brands become strategic assets, traces the evolution of the knowledge consumer and what companies do to protect equity of the brands they have nurtured over the decades. A new approach to building a Brand Loyalty that gives marketers a competitive edge in today's high-tech, high-stake brand-hostile environment. The book combines the knowledge with engaging real life case studies and proven examples.

The special problems and opportunities presented by island tourism are major new areas of interest for both tourism academics and professionals, prompting much discussion and debate. This is the first book to focus on how management and organisational issues affect small islands and their tourism industries, and to examine the factors which affect tourism on small islands. International contributors, including practitioners and researchers examine this important topic and discuss a diversity of inter-related themes, including policy areas; public/private sector planning partnerships; product development; marketing; human resource management; and sustainability. These general issues are complemented with case studies which illustrate the application of island management principles. For undergraduates, graduates and professionals in the tourism field, this book is an essential guide to island tourism management.

### **Stewart's Clinical Removable Partial Prosthodontics**

Forensic psychiatry is the discipline which distinguishes the 'mad' from the 'bad', but are its values inherently racist? Why are individuals from non-Western backgrounds over-represented statistically in those diagnosed with schizophrenia and other serious illnesses? The authors argue that the values on which psychiatry is based are firmly rooted in ethnocentric Western culture, with profound implications for individual diagnosis and systems of care. Through detailed exploration of the history of psychiatry, current clinical issues and present public policy, this powerful book traces the growth of a system

in which non-conformity to the prevailing cultural norms risks alienation and diagnosis of mental disorder.
