Predictive policing is the use of analytical techniques to identify targets for police intervention with the goal of preventing crime, solving past crimes, or identifying potential offenders and victims. These

tools are not a substitute for integrated approaches to policing, nor are they a crystal ball. This guide assesses some of the most promising technical tools and tactical approaches for acting on predictions in an effective way.

In this fourth edition Neal Riemer and Douglas W. Simon again seek to introduce students to the challenging discipline of political science by highlighting six cardinal features. The editors strongly believe that their unique and comprehensive approach, employing those six features, can best equip students of political

science to stay abreast of the ever-changing, and ever-challenging, world of politics. First and most important Riemer and Simon affirm the importance of addressing the three main concerns of political science: political and philosophy and ethics, empirical/behavioral political science, and public policy. Second, the authors reaffirm their normative preference for politics as a civilizing enterprise, one that enables people in the political community live better, to grow robustly in mind and spirit, and to find creative fulfillment. The fourth cardinal feature requires to recognize realistically the ever-changing nature of politics and the tasks of assessing and responding to changing values. The sixth cardinal feature of *The New World of Politics* is understanding the importance of keeping the future in mind--not only the immediate future, but the long-range future. This book seeks to introduce students to political science as a discipline intimately involved with ethics, empirical social scientific inquiry, and public policy. Neal Riemer and Douglas W. Simon are endeavoring to help students respond to those future problems with understanding and wisdom. A Collegiate Press book

Taken from "The Talented Tenth" written by W. E. B. Du Bois: The Negro race, like all races, is going to be saved by its exceptional men. The problem of education, then, among Negroes must first of all deal with the Talented Tenth; it is the problem of developing the Best of this race that they may guide

the Mass away from the contamination and death of the Worst, in their own and other races. Now the training of men is a difficult and intricate task. Its technique is a matter for educational experts, but its object is for the vision of seers. If we make money the object of man-training, we shall develop money-makers but not necessarily men; if we make technical skill the object of education, we may possess artisans but not, in nature, men. Men we shall have only as we make manhood the object of the work of the schools-intelligence, broad sympathy, knowledge of the world that was and is, and of the relation of men to it-this is the curriculum of that Higher Education which must underlie true life. On this foundation we may build bread winning, skill of hand and quickness of brain, with never a fear lest the child and man mistake the means of living for the object of life.

Narrator Gladys Cailiff is eleven years old in 1938 when a worldly schoolteacher turns the small town of Threestep, Georgia, upside down. Miss Grace Spivey

defies the traditional curriculum and racial boundaries alike, regaling her charges with readings from the *Thousand Nights and a Night* and casting a gifted African American student as "chief engineer" of the town's annual festival, newly reinvented as the Baghdad Bazaar. But her progressive actions are not without consequence and ultimately culminate in a night of death-defying stories that take readers on a magic carpet ride from a schoolroom in the South to the banks of the Tigris (and back again).

In the 1990s providing mental health services to the elderly and particularly to elderly Native Americans had been an issue of some concern for the last several decades. Despite this, many public decisions made at the time were based on inadequate data. Due to this lack of data, there had been little research devoted to determining the factors associated with

mental health among elderly Native Americans. Instead, the growing body of mental health research had "been based on limited samples, primarily of middle-majority Anglos." Originally published in 1994, the purpose of this research was to utilize existing data to close the gap in our understanding of mental health among elderly Native Americans.

### **Social Diagnosis**

The history of the most acrimonious presidential handoff in American history--and of the origins of twentieth-century liberalism and conservatism When Franklin Roosevelt defeated Herbert Hoover in the 1932 election, they represented not only different

political parties but vastly different approaches to the question of the day: How could the nation recover from the Great Depression? As historian Eric Rauchway shows in *Winter War*, FDR laid out coherent, far-ranging plans for the New Deal in the months prior to his inauguration. Meanwhile, still-President Hoover, worried about FDR's abilities and afraid of the president-elect's policies, became the first comprehensive critic of the New Deal. Thus, even before FDR took office, both the principles of the welfare state, and reaction against it, had already taken form. *Winter War* reveals how, in the months before the hundred days, FDR and Hoover battled over ideas and shaped the divisive politics of the twentieth century.

This open access monograph argues established democratic norms for freedom of expression should be implemented on the internet. Moderating policies of tech companies as Facebook, Twitter and Google have resulted in posts being removed on an industrial scale. While this moderation is often encouraged by governments - on the pretext that terrorism, bullying, pornography, "hate speech" and "fake news" will slowly disappear from the internet - it enables tech companies to censor our society. It is the social media companies who define what is blacklisted in their community standards. And given the dominance of social media in our information society, we run the risk of outsourcing the definition of our principles for discussion in the public domain to private companies.

Instead of leaving it to social media companies only to take action, the authors argue democratic institutions should take an active role in moderating criminal content on the internet. To make this possible, tech companies should be analyzed whether they are approaching a monopoly. Antitrust legislation should be applied to bring those monopolies within democratic governmental oversight. Despite being in different stages in their lives, Anne Mette is in the startup phase of her research career, while Frederik is one of the most prolific philosophers in Denmark, the authors found each other in their concern about Free Speech on the internet. The book was originally published in Danish as *Dit opslag er blevet fjernet - techgiganter & ytringsfrihed*. Praise for 'Your Post has been Removed' "From my perspective both as a politician and as private book collector, this is the most important non-fiction book of the 21st Century. It should be disseminated to all European citizens. The learnings of this book and the use we make of them today are crucial for every man, woman and child on earth. Now and in the future." Jens Rohde, member of the European Parliament for the Alliance of Liberals and Democrats for Europe "This timely book compellingly presents an impressive array of information and analysis about the urgent threats the tech giants pose to the robust freedom of speech and access to information that are essential for individual liberty and democratic self-government. It constructively explores potential strategies for restoring individual control over information flows to and about us. Policymakers worldwide should take heed!" “Indelible and extraordinary.”—Tara Westover, author of *Educated: A Memoir*, *New York Times Book Review*

The best-selling author of *How Children Succeed* returns with a powerful, mind-changing inquiry into higher education in the United States. Does college still work? Is the system designed just to protect the privileged and leave everyone else behind? Or can a college education today provide real opportunity to young Americans seeking to improve their station in life? *The Years That Matter Most* tells the stories of students trying to find their way, with hope, joy, and frustration, through the application process and into college. Drawing on new research, the book reveals how the landscape of higher education has shifted in recent decades and exposes the hidden truths of how the system works and whom it works for. And it introduces us to the people who really make higher education go: admissions directors trying to balance the class and balance the budget, College Board officials scrambling to defend the SAT in the face of mounting evidence that it favors the wealthy, researchers working to unlock the mysteries of the college-student brain, and educators trying to transform potential dropouts into successful graduates. With insight, humor, and passion, Paul

Tough takes readers on a journey from Ivy League seminar rooms to community college welding shops, from giant public flagship universities to tiny experimental storefront colleges. Whether you are facing your own decision about college or simply care about the American promise of social mobility, *The Years That Matter Most* will change the way you think—not just about higher education, but about the nation itself.

Classic Books Library presents this brand new edition of “The Federalist Papers”, a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. “The Federalist”, as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyze the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755–1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799–1800 and founded the Federalist Party, the system that governed the nation’s finances. His contributions to the Constitution and leadership made a significant

and lasting impact on the early development of the nation of the United States.

Thought the last financial crisis was scary? Just wait...it's going to get worse America is on the brink of financial collapse. Decades of political overpromising and underfunding have created a wave of debt that could swamp our already feeble economy. And the politicians' favorite tricks—raising taxes, borrowing from foreign governments, and printing more money—will only make it worse. Only one thing might save us: Roll back the government. In *Rollback: Repealing Big Government Before the Coming Fiscal Collapse*, Thomas E. Woods, Jr. explains that we may still have a chance to avert total economic disaster—but only by completely changing our understanding of government. With bracing candor, he dissects just how the political class has nearly destroyed America's economy. In *Rollback*, you'll learn: Why practically everything you've been taught about government and the economy is wrong—the product of liberal pro-government propaganda How the Federal Reserve helps create crises and slows recovery Why big business is no ally in rolling back government and actually wants and needs big government intervention in the

marketplace How current policies, if unchecked, will lead to the collapse of the dollar How government policies have driven the skyrocketing costs of health care Why retirement will be a pipe dream for the next generation How the coming collapse can be turned to your advantage—and the advantage of all who believe in liberty and limited government Thanks to decades of politicians playing kick the can down the road, we and our children are facing economic Armageddon. But this crisis could help us see government for what it really is—an institution that has seized our wealth and taught our children to honor it as the source of all progress. The good news is it's not too late to roll back government—and the opportunity to do so is now.
