The Origin of Species is a work of scientific literature by Charles Darwin which is considered to be the foundation of evolutionary biology. Darwin's book introduced the scientific theory that populations evolve over the course of generations through a process of natural selection. It presented a body of evidence that the diversity of life arose by common descent through a branching pattern of evolution. Darwin included evidence that he had gathered on the Beagle expedition in the and his subsequent findings from research, correspondence, and experimentation. Darwin's aims were twofold: to show that species had not been

separately created, and to show that natural selection had been the chief agent of change.

By Warren Burggren, University of North Texas; Jay Brewster, Pepperdine University; Laurel Hester, South Carolina Governor's School for Science and Mathematics. Rather than repeat what is covered in the textbook, the Student Study Guide will help students study biology and think like a scientist. Introductory chapters on Data Interpretation, Looking for Relationships, Experimentation and Writing will be illustrated and developed for the student. Each text chapter will then be covered with the goal of reinforcing the ideas mentioned in introductory chapters and to tie them to appropriate topics within a chapter.

Science & Technology, Grade 7 Earth Science

This science series is so easy to use! Activities build upon children's natural inquisitiveness about their world. Numerous hands-on activities encourage children to make observations, ask questions, test ideas, and share results. By actively engaging in inquiries, children begin to develop a knowledge and understanding of the scientific world. As students become involved in these activities, there are suggested questions that help you guide them through the learning process. In addition, we've provided information on literature, bulletin boards, extensions into other curricular areas, and technology such as World Wide Web sites and instructional television.
