Aspen Plus is one of the most popular process simulation software programs used industrially and academically. Though the software is available at many corporations and universities, there are no textbooks which are dedicated to teaching the step-by-step use of the software. This book is designed to fill that need. The structure of the book is unique in that it emulates a lecture /workshop classroom environment. Each chapter starts with the equivalent of a classroom lecture followed by workshops which

Written with hard-hitting honesty and emotional sensitivity, this is Stephen Ladd's account of his three-year adventure in a 200-pound boat of his own design and construction. The journey begins in the North American Rockies, progresses down the Pacific Coast of Panama and Colombia, crosses South America—including overland hitchhiking of author and boat for several hundred miles—and finally cruises the Caribbean back to Miami, Florida, ultimately sailing 6,500 miles and visiting 19 countries. Capsizes, a robbery at knifepoint, and arrests in Cuba and Haiti are just some of the fascinating adventures in this poetic account of an unprecedented voyage.

New York, late 1840s, and in the wild, noisy, brash and beautiful circus of Silas P. Swift a shadowy, mesmeric woman entrances crowds because she can unlock the secrets of troubled minds. Above them all her daughter sweeps and soars: acrobat and tightrope-walker. People cannot take their eyes from the mysterious woman in the Big Top who can help so many others - but she cannot unlock dark, literally unspeakable, memories of her own. In London memories fester in the mind of an old and venomous duke of the realm. He plots, with an unscrupulous lawyer (and a huge financial reward) against the mother and the daughter: to kill one, and to abduct the other and bring her across the Atlantic to him: She is mine. The actress and mesmerist Cordelia Preston and her daughter Gwenlliam live with their unusual family in the exciting new city among exciting new ideas: the telegraph, the daguerrotype, anaesthesia, table-tapping. And among the dangerous street-gangs of New York also, whose raw violence meets Cordelia and Gwenlliam and those that they love, with unexpected results.

This new book by a trusted Old Testament scholar directs the student and pastor to an aspect of biblical truth often lacking in contemporary preaching and teaching: God's unsurpassed majesty and greatness. Kaiser suggests that a key way to recapture this important doctrine in the pulpit is through the preaching of the Old Testament--itself an oft-neglected or mishandled discipline. By expositing ten

great Old Testament passages that are rife with evidence of God's majesty, he shows how today's preacher might address this deficiency. He also shows how such exercises as word studies and historical/archaeological studies can be used to help pastors make the Old Testament relevant to their congregations.

Bill Hall, friend and butler to cats, admits to mixed feelings about such strange little creatures. He compares serving a cat to having a human 2-year-old in your life—something lovable that commands your affection but trashes your house. A cat, like a child, will mangle your begonias and then crawl into your lap to share the warmth of its feelings - but only if it really wants to. Hall, a syndicated humor columnist, admits his popular cat stories are really about humans and the rational reasons we bring cats into our lives - for entertainment and for fuzzy filler in empty nests. Hanging out with cats also gives hope for humankind. After all, if we can bond so tightly with creatures from another species, then we could easily learn to harmonize with fellow human beings.

Dispatch At the heart of this classic, seminal book is Julian Jaynes's still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned process that came about only three thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. “Don’t be put off by the academic title of Julian Jaynes’s *The Origin of Consciousness in the Breakdown of the Bicameral Mind*. Its prose is always lucid and often lyrical...he unfolds his case with the utmost intellectual rigor.”—The New York Times “When Julian Jaynes . . . speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis.”—John Updike, *The New Yorker* “He is as startling as Freud was in *The Interpretation of Dreams*, and Jaynes is equally as adept at forcing a new view of known human behavior.”—*American Journal of Psychiatry*

How to Restore and Maintain Your Vespa Moterscooter

For many years the British motorcycle industry was the largest in the world, not counting low - powered mopeds and scooters and the like. After World War II the motorcycle industry was the third largest source of foreign exchange for the United Kingdom after motor cars and Scotch whiskey. Yet by 1975 the industry was essentially dead. What led to the fall of the motorcycle industry in Britain, after virtually defining the country for so long? Shooting Star: The Rise and Fall of the British Motorcycle Industry is the first comprehensive look at the motorcycle industry with a critical look at business and trade practices that led to its demise. The full romance, beauty and excitement of the machines and especially the top racers who rode them is captured here, but it's all blended for the first time with information about the lesser known businessmen who built the companies and then ran them into the ground, as well as a critical look at some of the engineers and designers who were brilliant and badly flawed at once. The failures of the British motorcycle industry are a painful object lesson for the badly strapped American automobile industry at the present time.

On May 19, 2010, the Royal Thai Army deployed tanks, snipers, and war weapons to disperse the thousands of Red Shirts protesters who had taken over the commercial center of Bangkok to demand democratic elections and an end to inequality. Key to this mobilization were motorcycle taxi drivers, who slowed down, filtered, and severed mobility in the area, claiming a prominent role in national politics and ownership over the city and challenging state hegemony. Four years later, on May 20, 2014, the same army general who directed the dispersal staged a military coup, unopposed by protesters. How could state power have been so fragile and open to challenge in 2010 and yet so seemingly sturdy only four years later? How could protesters who had once fearlessly resisted military attacks now remain silent? *Owners of the Map* provides answers to these questions—central to contemporary political mobilizations around the globe—through an ethnographic study of motorcycle taxi drivers in Bangkok. Claudio Sopranzetti explores the unresolved tensions in the drivers' everyday lives, their migration trajectories, consumer desires, and political demands amidst the restructuring of Thai capitalism after the 1997 economic crisis. Reconstructing the entanglements between their everyday mobility and political mobilization, Sopranzetti reveals mobility not just as a strength of contemporary capitalism but also as one of its fragile spots, always prone to disruption by the people who sustain its channels but remain excluded from their benefits. In so doing, *Owners of*
