While leaders may desire or have been told that they must put certain structures into place in order to enhance their leadership capabilities, they may not know exactly what structures are needed, or the skills that are required for implementation. Authors Michael Fullan and Lyle Kirtman go beyond simply telling you what you need to put in place to enhance leadership—they detail the route to successful leadership. Coherent School Leadership will show you how to combine the components of Fullan's Coherence Framework (the Framework) with Kirtman's 7 Competencies for Highly Effective Leaders (the Competencies) to drive coherence—the shared depth of understanding about the nature of the work and how it impacts the results desired for student achievement—to change the culture in schools from reactive to proactive. Fullan and Kirtman, whose work is based in practice, will:

- Show you how to use specific competencies to drive coherence
- Provide examples that show how other leaders have successfully created coherence
- Guide you through the day-to-day distractions/stresses so that you can stay on course
- Show you how to use the Competencies in relation to the Framework

Taking a world view of the forces that could destabilize education and the work of coherence, Coherent School Leadership will show how proven frameworks such as the Framework and the Competencies can help you cope with even the most complex scenarios.

Building Computer Vision Applications Using Artificial Neural Networks

Microbes, especially molds and bacteria, growing in water-damaged buildings make people sick. The book follows Mold Warriors (published in 2005) as the definitive source of information on "mold" illness, its basis in inflammation, its physiology and its links to politics, lawsuits and science. It has true stories, regarding this increasingly common problem in the US and around the world. if you already know that you could be sickened by mold-damaged buildings, this book will guide you through diagnosis and treatment, through remediation and return to health.

Apply computer vision and machine learning concepts in developing business and industrial applications using a practical, step-by-step approach. The book comprises four main sections starting with setting up your programming

environment and configuring your computer with all the prerequisites to run the code examples. Section 1 covers the basics of image and video processing with code examples of how to manipulate and extract useful information from the images. You will mainly use OpenCV with Python to work with examples in this section. Section 2 describes machine learning and neural network concepts as applied to computer vision. You will learn different algorithms of the neural network, such as convolutional neural network (CNN), region-based convolutional neural network (R-CNN), and YOLO. In this section, you will also learn how to train, tune, and manage neural networks for computer vision. Section 3 provides step-by-step examples of developing business and industrial applications, such as facial recognition in video surveillance and surface defect detection in manufacturing. The final section is about training neural networks involving a large number of images on cloud infrastructure, such as Amazon AWS, Google Cloud Platform, and Microsoft Azure. It walks you through the process of training distributed neural networks for computer vision on GPU-based cloud infrastructure. By the time you finish reading *Building Computer Vision Applications Using Artificial Neural Networks* and working through the code examples, you will have developed some real-world use cases of computer vision with deep learning. What You Will Learn · Employ image processing, manipulation, and feature extraction techniques · Work with various deep learning algorithms for computer vision · Train, manage, and tune hyperparameters of CNNs and object detection models, such as R-CNN, SSD, and YOLO · Build neural network models using Keras and TensorFlow · Discover best practices when implementing computer vision applications in business and industry · Train distributed models on GPU-based cloud infrastructure Who This Book Is For Data scientists, analysts, and machine learning and software engineering professionals with Python programming knowledge.

The Wall Street Journal

The brutal confirmation battles we saw over Supreme Court Justices Neil Gorsuch and Brett Kavanaugh are symptoms of a larger problem with our third branch of government, a problem that began long before Kavanaugh, Merrick Garland, Clarence Thomas, or even Robert Bork: the courts' own self-corruption, aiding and abetting the expansion of federal power. Ilya Shapiro, director of the Cato Institute's Center for Constitutional Studies, takes readers inside the unknown history of fiercely partisan judicial nominations and explores reform proposals that could return the Supreme Court to its proper constitutional role. Confirmation battles over justices will only become more toxic and unhinged as long as the Court continues to ratify the excesses of the other two branches of government and the parties that control them. Only when the Court begins to rebalance constitutional order, curb administrative overreach, and return power back to the states will the bitter partisan war to control the judiciary finally end.

Your Students, My Students, Our Students explores the hard truths of current special education practice and outlines five essential disruptions to the status quo. Authors Lee Ann Jung, Nancy Frey, Douglas Fisher, and Julie Kroener show you how to - Establish a school culture that champions equity and inclusion. - Rethink the long-standing structure of least restrictive environment and the resulting service delivery. - Leverage the strengths of all educators to provide appropriate support and challenge. - Collaborate on the delivery of instruction and intervention. - Honor the aspirations of each student and plan accordingly. To realize authentic and equitable inclusion, we must relentlessly and collectively pursue change. This book—written not for "special educators" or "general educators" but for all educators—addresses the challenges, maps out the solutions, and provides tools and inspiration for the work ahead. Real-life examples of empowerment and success illustrate just what's possible when educators commit to the belief that every student belongs to all of us and all students deserve learning experiences that will equip them to live full and rewarding lives.

Mergent Industrial Manual

This valuable and accessible work provides comprehensive information on America's top public companies, listing over 10,000 publicly traded companies from the New York, NASDAQ and OTC exchanges. All companies have assets of more than \$5 million and are filed with the SEC. Each entry describes business activity, 5 year sales, income, earnings per share, assets and liabilities. Senior employees, major shareholders and directors are also named. The seven indices give an unrivalled access to the information.

Your voice matters, especially as a leader. Every day, you have an opportunity to use your voice to have a positive impact--at work or in your community. You can inspire and persuade your audience--or you can distract and put them to sleep. Nervous, rambling robotic--these presentation styles can ruin a talk on even the most critical topics. And with each weak performance, career prospects dim. To get ahead and make an impact, you need to deliver well-crafted messages with confidence and authenticity. You must sound as capable as you are. Public speaking is a skill, not a talent. With the right guidance, anyone can be a powerful speaker. Learn to conquer fear, capture attention, motivate action, and take charge of your career with *Speak with Impact*. Written by an opera singer turned CEO, speaker, and executive communication coach, the book unravels the mysteries of commanding attention in any setting, professional or personal. Whether it's speaking up at a meeting, presenting to clients, or talking to large groups, the book's easy-to-use frameworks, examples, and exercises help you Kickstart the creative process Compose a clear and concise message Engage your audience through storytelling and humor Banish filler words and uptalk Strengthen and project your voice Use breathing techniques to overcome stage fright Use effective body language Build your executive presence Deliver presentations with confidence and authenticity When you know what to say and how to say it, people listen. Find your powerful voice... and step into leadership. Speak with impact.
