Foolish Questions and Other Odd Observations

"China's current military reforms are unprecedented in their ambition and in the scale and scope of the organizational changes. Virtually every part of the People's Liberation Army (PLA) now reports to different leaders, has had its mission and responsibilities changed, has lost or gained subordinate units, or has undergone a major internal reorganization. Drawing upon papers presented at two conferences co-organized by the U.S. National Defense University, RAND, and Taiwan's Council of Advanced Policy Studies, this edited volume brings together some of the world's best experts on the Chinese military to analyze the various dimensions of the reforms in detail and assess their implications for the PLA's ability to conduct joint operations, for the Chinese Communist Party's control of the army, and for civil-military integration. The contributors review the drivers and strategic context underpinning the reform effort, explore the various dimensions of PLA efforts to build a force capable of conducting joint operations, consider the implications for the PLA services, and examine Xi Jinping's role in driving the reforms through and using them to strengthen control over the military. The chapters chronicle successes and outstanding problems in the reform effort and consider what the net effect will be as the PLA strives to become a "world-class" military by mid-century, if not much sooner."--Page 4 of cover.

From a Pulitzer Prize-winning investigative reporter at The New York Times comes the troubling story of the rise of the processed food industry -- and how it used salt, sugar, and fat to addict us. Salt Sugar Fat is a journey into the highly secretive world of the processed food giants, and the story of how they have deployed these three essential ingredients, over the past five decades, to dominate the North American diet. This is an eye-opening book that demonstrates how the makers of these foods have chosen, time and again, to double down on their efforts to increase consumption and profits, gambling that consumers and regulators would never figure them out. With meticulous original reporting, access to confidential files and memos, and numerous sources from deep inside the industry, it shows how these companies have pushed ahead, despite their own misgivings (never aired publicly). Salt Sugar Fat is the story of how we got here, and it will hold the food giants accountable for the social costs that keep climbing even as some of the industry's own say, "Enough already."

Engaging Minds: Cultures of Education and Practices of Teaching explores the diverse beliefs and practices that define the current landscape of formal education. The 3rd edition of this introduction to interdisciplinary studies of teaching and learning to teach is restructured around four prominent historical moments in formal education: Standardized Education, Authentic Education, Democratic Citizenship Education, Systemic Sustainability Education. These moments serve as the foci of the four sections of the book, each with three chapters dealing respectively with history, epistemology, and pedagogy

within the moment. This structure makes it possible to read the book in two ways – either "horizontally" through the four in-depth treatments of the moments or "vertically" through coherent threads of history, epistemology, and pedagogy. Pedagogical features include suggestions for delving deeper to get at subtleties that can't be simply stated or appreciated through reading alone, several strategies to highlight and distinguish important vocabulary in the text, and more than 150 key theorists and researchers included among the search terms and in the Influences section rather than a formal reference list.

Jim O'Neill, one of the most influential economists today, shares his insights on how and why he developed one of the most compelling economic concepts of our time in *The Growth Map*. 'O'Neill has redefined how investors and Western business leaders see the world. This book tells the unlikely story of how O'Neill developed this path-breaking idea . . . lively, powerful and highly accessible' Gillian Tett, *Financial Times* Ten years ago, Jim O'Neill predicted that globalization would help Brazil, Russia, India and China (the BRICs) - busy, ambitious countries full of raw materials - overtake the largest Western economies. But these changes have provoked business and political uncertainty and in *The Growth Map* O'Neill examines what is coming next. Can the BRICs sustain their exceptional growth? Which nations will come next? And what, for all of us, does the future hold? 'Goldman Sachs' rock star' *Business Week* 'Sharp, shrewd. Tells the big story of our time. The fundamental shift of economic power from the West' Niall Ferguson 'O'Neill has changed how the world thinks about economic growth - and how the BRICs think about themselves' Lloyd Blankfein, Chairman And Ceo, Goldman Sachs 'One of the most sought-after economic commentators on the planet' *Daily Telegraph* Jim O'Neill is Chairman of Goldman Sachs Asset Management. He joined Goldman Sachs in 1995, rising to chief economist, and in 2001 he led the team that conducted the original BRIC analysis. He is chairman of the charity SHINE, and a member of the boards of the UK Royal Economic Society, Itinera and Bruegel.
