This heartwarming book encourages positive behavior by using the concept of an invisible bucket to show children how easy and rewarding it is to express kindness, appreciation, and love by "filling buckets." Updated and revised, this 10th anniversary edition will help readers better understand that "bucket dipping" is a negative behavior, not a permanent label. It also explains that it's possible to fill or dip into our own buckets.

Sambhava was compelled to hide during his visit to Tibet in the late 8th century. The guru hid his books in stones, lakes, and pillars because the Tibetans of that day and age were somehow unprepared for their teachings. Now, in the form of the ever-popular Tibetan Book of the Dead, these teachings are constantly being discovered and rediscovered by Western readers of many different backgrounds--a phenomenon which began in 1927 with Oxford's first edition of Dr. Evans-Wentz's landmark volume. While it is traditionally used as a mortuary text, to be read or recited in the presence of a dead or dying person, this book--which relates the whole experience of death and rebirth in three intermediate states of being--was originally understood as a guide not only for the dead but also for the living. As a contribution to the science of death and dying--not to mention the belief in life after death, or the belief in rebirth--The Tibetan Book of the Dead is unique among the sacred texts of the world, for its socio-cultural influence in this regard is without comparison. This fourth edition features a new foreword, afterword, and suggested further reading list by Donald S. Lopez, author of *Prisoners of Shangri-La: Tibetan Buddhism and the West*. Lopez traces the whole history of the late Evans-Wentz's three earlier editions of this book, fully considering the work of contributors to previous editions (C. G. Jung among them), the sections that were added by Evans-Wentz along the way, the questions surrounding the book's translation, and finally the volume's profound importance in engendering both popular and academic interest in the religion and culture of Tibet. Another key theme that Lopez addresses is the changing nature of this book's audience--from

the prewar theosophists to the beat poets to the hippies to contemporary exponents of the hospice movement--and what these audiences have found (or sought) in its very old pages.

There is no question that native cultures in the New World exhibit many forms of mathematical development. This Native American mathematics can best be described by considering the nature of the concepts found in a variety of individual New World cultures. Unlike modern mathematics in which numbers and concepts are expressed in a universal mathematical notation, the numbers and concepts found in native cultures occur and are expressed in many distinctive ways. *Native American Mathematics*, edited by Michael P. Closs, is the first book to focus on mathematical development indigenous to the New World. Spanning time from the

prehistoric to the present, the thirteen essays in this volume attest to the variety of mathematical development present in the Americas. The data are drawn from cultures as diverse as the Ojibway, the Inuit (Eskimo), and the Nootka in the north; the Chumash of Southern California; the Aztec and the Maya in Mesoamerica; and the Inca and Jibaro of South America. Among the strengths of this collection are this diversity and the multidisciplinary approaches employed to extract different kinds of information. The distinguished contributors include mathematicians, linguists, psychologists, anthropologists, and archaeologists.

Though best known for *The Red Badge of Courage*, his classic novel of men at war, in his tragically brief life and career Stephen Crane produced a wealth of stories—among them "The Monster," "The Upturned Face," "The Open Boat," and

the title story—that stand among the most acclaimed and enduring in the history of American fiction. This superb volume collects stories of unique power and variety in which impressionistic, hallucinatory, and realistic situations alike are brilliantly conveyed through the cold, sometimes brutal irony of Crane's narrative voice.

The formation of an unorthodox literary critic How does a literary historian end up thinking in terms of z-scores, principal component analysis, and clustering coefficient? In the ten essays collected in this volume, Franco Moretti reconstructs the intellectual trajectory of his philosophy of 'distant reading'. From the evolutionary model of 'Modern European Literature', through the geo-cultural dominant of 'Conjectures on World Literature' and 'Planet Hollywood' to the quantitative findings of 'Style, inc.' and the abstract patterns of 'Network Theory, Plot Analysis', the book follows two decades of critical explorations that have come to define – well beyond the wildest expectations of its author – a growing field of unorthodox literary studies.
