2018 Guide to the Night Sky: A month-by-month guide to exploring the skies above Britain and Ireland

The Night Sky (How to Identify)

50 Things to See with a Small Telescope (Southern Hemisphere Edition)

“This is a great guide to the night sky at a great price” Astronomy Now Best-selling and most comprehensive handbook to the planets, stars and constellations visible from the northern hemisphere. 6 pages for each month covering January–December 2018.

Guide to the Moon

Sterne und Weltraum

Get clucking over this amazing collection of chicken dishes that are perfect for your friends and family. Chicken Tonight is packed with delicious meals and inventive ideas that can be made with minimal fuss, any day of the week. Impress your friends with coq au vin or chicken cacciatore, and keep fussy eaters happy with a classic kiev or a brilliant burger. Both experienced and novice home cooks will enjoy creating these mouth-watering recipes, triple-tested so they work first time, every time. From classic to exotic, simple supper to elaborate roast, you'll never run out of ideas with Chicken Tonight.

50 Things to See with a Telescope - Kids

Popular Photography

This is an introductory guide to the night sky, from the Royal Observatory Greenwich. Offering complete advice from the ground up, Stargazing is the perfect

manual for beginners to astronomy, introducing the world of telescopes, planets, stars, dark skies and celestial maps. Discover how to tackle light pollution, how to stargaze with just your eyes, and what equipment is best for beginners. This book explains the best ways to plan your stargazing experience and the keys things to look out for on specific dates throughout the year. With seasonal star charts, constellation charts and facts about our Solar System, Stargazing is packed full of useful information and guidance for both the Northern and Southern Hemispheres. Bridging the gap between human curiosity and the need for scientific expertise, Stargazing allows a complete novice to understand our place in the cosmos and enjoy the beautiful and extraordinary wonders of the night sky.

Astronomy

Astronomy for Kids is a fun, how-to-guide to explore outer space with binoculars, a telescope, or just your eyes! One of the coolest things about outer space is that anyone can explore it. All you have to do is go outside and look up! Using plain sight, binoculars, or a small telescope, Astronomy for Kids shows stargazers how easy it is to explore space, just by stepping outside. With this book as their guide to the northern hemisphere, kids will learn to find and name amazing objects in the night sky. Fully illustrated with fun facts throughout, kids can point out sights to friends and family, saying things like, "that's Jupiter," and, "those stars are the constellation Cygnus the Swan," and maybe even, "that group of stars doesn't have a name but I think it looks like my dog getting belly rubs." From the Milky Way Galaxy to Mars to the Moon's craters and mountains--Astronomy for Kids helps young astronomers discover important parts of our solar system, with: 30 sights for the naked eye (yes, 30!) objects to see without any equipment, including Orion's Belt, the Big Dipper, Mars, and even the International Space Station. 25 sights magnified with binoculars or a basic telescope to make objects in the sky easier to find and explore. Plus, buying tips and usage tricks to get the most out of astronomy equipment. Clear illustrations that show kids where to look and what they can expect to see. Like all big things, outer space is something you have to see to believe. Astronomy for Kids teaches kids that planets, shooting stars, constellations, and meteor showers are not only in books--but right in front of them.

Astronomy for Kids

From the author of the bestselling book 50 Things to See with a Small Telescope, this colorful edition explores the constellations with young readers, guiding them to dozens of galaxies, nebulae, and star clusters. Every page features a helpful "telescope view," showing exactly how objects appear through a small telescope or binoculars. While a member of the Mount Diablo Astronomical Society in California, John Read taught thousands of students how to use telescopes and explore the night sky. Now, he's sharing this knowledge with you! Even without a telescope, this introduction to the night sky is essential for every child's collection.

JCPenney [catalog].

Learn all about the starry skies and ancient myths through the star-hopping

technique.

Stargazing

This special edition has been designed specifically for aspiring astronomers living south of the equator. This book explores the planets, stars, galaxies and nebulae observable from the southern hemisphere. Not only does this book illustrate how to observe, it also shows how each object appears through a small telescope!

Star-Hopping

(Illustrations are best viewed on a tablet.) An introductory guide to navigating your way around the night sky and identifying what you can see on any given night. Please note that this is the 2004 edition. Chart data is accurate to the end of 2009.
