In *Rebuilding Shattered Lives*, James A. Chu, MD, describes a proven approach to the assessment and treatment of post-traumatic and dissociative disorders developed at the Dissociative Disorders and Trauma Program at McLean Hospital and Harvard Medical School. Drawing on his extensive empirical research and more than a decade's clinical experience specializing in treating survivors of severe abuse, Dr. Chu also offers valuable insights into all the major areas of traumarelated symptomatology and provides the most detailed explanation of dissociative theory currently in print. And, with the help of numerous vignettes and case examples, he clearly illustrates common clinical dilemmas encountered when dealing with survivors of severe abuse as well as the most effective techniques for resolving them. *Rebuilding Shattered Lives* is an important working resource for mental health workers of all levels of experience. Throughout, the writing style is clear, and complex theories are explained with an emphasis on how they provide the conceptual basis for a rational, responsible, and safe approach to treatment.

From the author of the million-copy bestselling *The Art of Racing in the Rain* comes the breathtaking and long-awaited new novel. This novel centres on four generations of a once terribly wealthy and influential timber family who have fallen from grace; a mysterious yet majestic mansion, crumbling slowly into the bluff overlooking Puget Sound in Seattle; a love affair so powerful it reaches across the planes of existence; and a young man who simply wants his parents to once again experience the moment they fell in love, hoping that if can feel that emotion again, maybe they won't get divorced after all.

The Echelon

"Another engaging thriller in the Enzo Lee series." - Kirkus Reviews When 10-year-old Megan Kim disappears from her school on the Alabama Gulf Coast, it has all the signs of a child abduction. However, a more complicated story soon emerges. The action follows Megan and a brilliant but troubled scientist across the South on a desperate mission to evade their pursuers. Big Pharma is intent on burying Megan and the secret she carries. Meanwhile, reporter Enzo Lee is trying to save his gravely ill grandmother and embarks on a search for a cure. That quest leads him to the fugitive pair. Together, they must confront the wrath of the entire drug industry armed with the deadly tools of organized crime. On small rural roads, in historic Savannah and on the cold Pacific waters beyond San Francisco Bay the unlikely allies fight to stay alive and bring to light the scientific breakthroughs that will cost the drug companies billions in lost profits. Megan's Cure is an action-filled story played out in the labs and boardrooms of Big Pharma as well as along the rural byroads of the Deep South. This is the third novel in the Enzo Lee mystery thriller series By Pulitzer Prize-winning author Robert B. Lowe. "Gripping with compelling characters." - Kirkus Reviews, commenting on Robert B. Lowe's last novel, Divine Fury.

Cat's Cradle

“A free-wheeling vehicle . . . an unforgettable ride!”—The New York Times
Cat's Cradle is Kurt Vonnegut's satirical commentary on modern man and his madness. An apocalyptic tale of this planet's ultimate fate, it features a midget as the protagonist, a complete, original theology created by a calypso singer, and a vision of the future that is at once blackly fatalistic and hilariously funny. A book that left an indelible mark on an entire generation of readers, Cat's Cradle is one of the twentieth century's most important works—and Vonnegut at his very best. “[Vonnegut is] an unimitative and inimitable social satirist.”—Harper's Magazine

Army RD & A Bulletin

Can you pinpoint a time in your life where you realized you are completely and utterly screwed? I can. I got the dreaded phone call, the one every baseball player hopes and prays never comes. I was traded. Yeah, that phone call. Traded from my long time team of over ten years. And not just to any team, but my childhood rivals; the Chicago Rebels. Completely and utterly screwed, right? Wrong. The trade was the least of my concerns. I met a girl. Natalie. Man, she's perfect. I swore I would never get involved with anyone during the season. Too complicated. But can you believe I have zero restraint when it comes to this girl? I couldn't get her out of my head and the more I talked to her, the more I realized I needed her in my life. So what's the problem? Why am I screwed? Because, Natalie, the girl I can't stop crushing on, yeah . . . she's married. At least, that's what I was told . . .

Go Like Hell

The epic story also told in the film FORD V. FERRARI: By the early 1960s, the Ford Motor Company, built to bring automobile transportation to the masses, was falling behind. Young Henry Ford II, who had taken the reins of his grandfather's company with little business experience to speak of, knew he had to do something to shake things up. Baby boomers were taking to the road in droves, looking for speed not safety, style not comfort. Meanwhile, Enzo Ferrari, whose cars epitomized style, lorded it over the European racing scene. He crafted beautiful sports cars, "science fiction on wheels," but was also called "the Assassin" because so many drivers perished while racing them. Go Like Hell tells the remarkable story of how Henry

Ford II, with the help of a young visionary named Lee Iacocca and a former racing champion turned engineer, Carroll Shelby, concocted a scheme to reinvent the Ford company. They would enter the high-stakes world of European car racing, where an adventurous few threw safety and sanity to the wind. They would design, build, and race a car that could beat Ferrari at his own game at the most prestigious and brutal race in the world, something no American car had ever done. *Go Like Hell* transports readers to a risk-filled, glorious time in this brilliant portrait of a rivalry between two industrialists, the cars they built, and the "pilots" who would drive them to victory, or doom.

A Sudden Light

This Volume of the series Cardiac and Vascular Biology offers a comprehensive and exciting, state-of-the-art work on the current options and potentials of cardiac regeneration and repair. Several techniques and approaches have been developed for heart failure repair: direct injection of cells, programming of scar tissue into functional myocardium, and tissue-engineered heart muscle support. The book introduces the rationale for these different approaches in cell-based heart regeneration and discusses the most important considerations for clinical translation. Expert authors discuss when, why, and how heart muscle can be salvaged. The book represents a valuable resource for stem cell researchers, cardiologists, bioengineers, and biomedical scientists studying cardiac function and regeneration.
