Blood Moons

The purpose of this Dictionary, published jointly by «Kluwer Technische Boeken, BV» (Deventer, The Netherlands) and «Russky yazyk Publishers» (Moscow, USSR) is to help the user read and translate English, German, French, Dutch and Russian texts in electrical engineering. Up until now all such dictionaries were containing terms pertaining directly to electrical engineering plus the terminology used in its off-sheets which have evolved into separate disciplines, such as communications, electronics, automation etc. Foremost, however, this Dictionary represents the terminology of electrical engineering, while the branches are represented by their basic terms only. Given the relative small volume (about 8000 terms), the authors tried to reflect the most important terms in such areas as the circuit theory, electric and magnetic measurements, electric power generation, transmission and distribution, as well as the industrial and domestic consumption of electric power. The Dictionary also contains many terms relevant to high voltage technology, electrical machines and apparatus, electric drive, as well as to the elements and structures of aerial and cable transmission lines. In selecting English terms, the authors were trying to reflect both their British and American versions, although they did not attempt to present all terminological synonyms of this kind. In some cases the Dictionary provides the main spelling

versions.

“A” Dictionary of Musical Themes

This Companion explores the Bible's role and influence on individual writers, whilst tracing the key developments of Biblical themes and literary theory through the ages. An ambitious overview of the Bible's impact on English literature – as arguably the most powerful work of literature in history – from the medieval period through to the twentieth-century. Includes introductory sections to each period giving background information about the Bible as a source text in English literature, and placing writers in their historical context. Draws on examples from medieval, early-modern, eighteenth-century and Romantic, Victorian, and Modernist literature. Includes many 'secular' or 'anti-clerical' writers alongside their 'Christian' contemporaries, revealing how the Bible's text shifts and changes in the writing of each author who reads and studies it.

The Substitute Guest

This series extracts the most important information on each topic and presents it in a concise, uncluttered fashion to prepare students for the USMLE. High-Yield means exactly that! High-Yield Embryology, Fifth Edition provides a concentrated, efficient review of embryology material tested on the USMLE Step 1. Concepts are presented in a streamlined outline format with tables, diagrams, photos, and radiographs to clarify important material. In response to student feedback, the Fifth Edition features: New and updated figures. Additional USMLE-style case studies at the end of each chapter. An expanded section on early development.

The first introductory public policy text with a strong economics perspective. A new textbook by Charles Wheelan, author of Naked Economics, Introduction to Public Policy uses economic principles to demonstrate that sound public policy occurs when unfettered private markets provide the greatest good for the greatest number. Only when it does not do this is government intervention needed.

These are the results of the forty restaurant and nightlife guides that Zagat produce yearly, covering cities such as London, Paris, New York, Tokyo and San Francisco to name but a few. To guide the readers to the best watering holes to suit their tastes, moods and budgets, there are a number of category lists, for example, Most Popular, Top Ratings and Best Buys. On the assumption that most people want a quick fix on the places at which they are considering socialising, there are also handy and concise indexes. These guides spotlight both centuries old traditional pubs and trendy, minimalist lounges, sumptuous restaurants and clubs. The diversity of venues means that goths, pre-clubbers, lads, families, hen and stag nights and tourists can all have the best of times.

The Blackwell Companion to the Bible in English Literature

This book analyses and discusses the recent developments for assessing research quality in the humanities and related fields in the social sciences. Research assessments in the humanities are highly controversial and the evaluation of humanities research is delicate. While citation-based research performance indicators are widely used in the natural and life sciences, quantitative measures for research performance meet strong opposition in the humanities. This volume combines the presentation of state-of-the-art projects on research assessments in the humanities by humanities scholars themselves with a description of the evaluation of humanities research in practice presented by research funders. Bibliometric issues concerning humanities research complete the exhaustive analysis of humanities research assessment. The selection of authors is well-balanced between humanities scholars, research funders, and researchers on higher education. Hence, the edited volume succeeds in painting a comprehensive picture of research evaluation in the humanities. This book is valuable to university and science policy makers, university administrators, research evaluators, bibliometricians as well as humanities scholars who seek expert knowledge in research evaluation in the humanities.

Sins of the past have been resurrected, predetermining their path to love. Can they overcome the treacherous obstacles set before them? Jax Christensen likes his life just the way it is. He has his work, his club, and the occasional naked submissive to take his mind off everything else. He doesn't talk about the past, as there is no point in reminiscing about things that cannot be altered. His chest has an empty hole where his heart used to be, but he's grown accustomed to the constant pain. It's become the only thing that reminds Jax that he's alive. Emily Weiss has never forgotten the one and only man she's ever loved. She's hidden for two long years in an attempt to protect Jax and herself, desperate to try and stay one step ahead of those who want her dead. She has information that could destroy the United Nations. Unfortunately, they want to eliminate her first. Emily's exhausted and wants more than anything to feel safe once more. That was how she felt in Jax's strong arms and she longs to be there again. When Jax sees that Emily has risen from the grave, his heart and soul are full of anger and regret. He'll never forgive her lies and deception. He will, however, keep her safe. He hates her for what she's done, but he doesn't want her death on his conscience. He'll protect her and then walk away. Secrets are revealed and the danger is more sinister and deadly than anyone could have guessed. Jax and Emily are forced on the run

and the passion they once felt for one another burns even hotter and brighter the second time around. Jax doesn't know how he'll walk away this time or if he even wants to. Emily is determined to expose a high-level official within the United Nations and walk away unscathed. She wants a second chance with her first love - even if it kills her.

Expressive Conducting

Expressive Conducting: Movement and Performance Theory for Conductors applies the insight of movement and performance theory to the practice of conducting, offering a groundbreaking new approach to conducting. Where traditional conducting pedagogies often place emphasis on training parts of the body in isolation, *Expressive Conducting* teaches conductors to understand their gestures as part of an interconnected system that incorporates the whole body. Rather than emphasizing learning specific patterns and gestures, this book enables student and professional conductors to develop a conducting technique that is centered around expressing the themes of the music. Drawing parallels to the worlds of acting, this text treats the body as the conductor's instrument. Coaching notes derived from years of experience as a performance movement specialist offer readers approachable methods for eliminating communication barriers—both conscious and subconscious—to encourage optimal performance, highlighting acting theory, movement exercises and the significance of weight distribution. Unlike other conducting approaches, this text understands that conducting resonates throughout the entire body and is not conveyed by the hands or baton alone. With a comprehensive consideration of the conductor's body and movements, featuring over 50 original illustrations, *Expressive Conducting* advances strategies for improving one's conducting skills in rehearsal and performance. Jerald Schwiebert has developed a practical language for expressive conducting. Together, Schwiebert and Barr present a text that is suitable for conducting students, instructors, and professionals alike.

Writer for Hire

Cardinal Education is an educational consulting and tutoring company based in Palo Alto, CA. Guided by a philosophy of fulfilling students' academic potential in a way that boosts skills and confidence for life, we work to maximize successful middle school, high school, and college admissions outcomes. While some of our methods defy “conventional wisdom,” we have a proven track record with a broad range of students: the Ivy League bound to those wishing to avoid community college, the self-motivated to the intransigently jaded, and the profoundly gifted to learning disabled. We have a passion for expanding students' dreams and helping them attain their goals. Cardinal Education believes in the social value of a strong public education system and sponsors pro bono programs to bring private sector expertise to bear. However, government fiscal policies are shortchanging public schools of opportunities: activities, sports, variety of classes, advanced classes, student: teacher ratios, and counseling departments. The “private school imperative” means that despite economic trends,

admission to private school is becoming so competitive that it necessitates standardized testing excellence. The philosophy of this math workbook is rigor and drill. Because this is the first test students take that actively tries to trick students at every turn, students who sit for these standardized exams need reflexive familiarity with computation (math facts), problem types, and strategy. The entrance exams are the first standardized tests for which budgeting time is a significant issue. Students need to spend the majority of time on analysis to avoid getting tricked rather than computation. By building skills, speed, and confidence, we hope to eliminate anxiety and give students a solid foundation on which to build excellent scores. This book is intended as a supplement for our highly trained staff, so it does not include strategies. However, motivated students can use it successfully with occasional help from a teacher or parent. Each chapter is comprised of units, with each unit comprised of 4 problem sets of difficulty, increasing in a logically progressive manner. Students should do as many of the 4 problem sets for each unit as it takes to achieve a 90% accuracy rate. Students taking lower level exams should complete problems 1-10 in each set. Students competing for high school admissions should complete each problem set in its entirety. Questions or feedback: Info@CardinalEducation.com

Literary Nonfiction. California Interest. Women's Studies. Film. Memoir. THE BIG LOVE is a Hollywood nightmare. It tells the story of Errol Flynn--a fading, alcoholic movie star--and the underage dancer-actress Beverly Aadland. The narrator? Beverly Aadland's fame-worshipping mother Mrs. Florence Aadland, who spurs the relationship on. There is nothing subtle or sympathetic about this memoir: It is outrageous, grotesque, surreal, notorious--an intimate look at Hollywood exploitation and decay. On the one hand, THE BIG LOVE depicts the deterioration of Errol Flynn, an actor who is quickly losing relevance after years of playing irresistible swashbucklers in films such as Captain Blood (1935) and The Adventures of Robin Hood (1938). He is riddled with medical problems, drinking himself to death. On the other hand, there is Mrs. Florence Aadland, also an alcoholic, an uncultured stage mother psychotically pushing her daughter Beverly forward even at the cost of her own marriage. A bizarre, seedy time capsule of the 1950s, THE BIG LOVE is the long-lost literary sister of Barbara Payton's I AM NOT ASHAMED. And, after languishing out of print for years, it is ready to shock brand new audiences with its absurd humor, villainous characters, and sickly dissipation.

Early Medieval Spain

For Cora Kensington, the Grand Tour was to be the trip of a lifetime. She discovered the family she never knew she had and may have even found the love she longs for in Will. Yet her life has just become infinitely more challenging . . . Hounded by the stubborn pursuit of Pierre de Richelieu and journalists chasing the beguiling story of the newest American heiress, Cora fights to remain true to her past, reconcile her present, and still embrace her future. But as Will struggles with her newfound wealth, Cora begins to wonder if their love is strong enough to withstand all that threatens to pull them apart. As she glimpses the end of the tour, Cora knows it's time to decide who and what defines her . . . and who and what does not.

War of Shadows

Through the eyes of an inventor of new markets, *Good Derivatives: A Story of Financial and Environmental Innovation* tells the story of how financial innovation – a concept that is misunderstood and under attack - has been a positive force in the last four decades. If properly designed and regulated, these “good derivatives” can open vast possibilities to address a variety of global problems. Filled with provocative ideas, fascinating stories, and valuable lessons, it will provide both an insightful interpretation of the last forty years in capital and environmental markets and a vision of world finance for the next forty years. As a young economist at the Chicago Board of Trade, Richard Sandor helped create interest rate futures, a development that revolutionized worldwide finance. Later, he pioneered the use of emissions trading to reduce acid rain, one of the most successful environmental programs ever. He will provide unique insights into the process of creating these new financial products. Covering successes and failures, the story describes the tireless process of inventing, educating and creating support for these new inventions in places like Chicago, New York, London, Paris and how it is unfolding today in Mumbai, Shanghai and Beijing. The book will tell the story of the creation of the Chicago Climate Exchange and its affiliated exchanges (European Climate Exchange, Chicago Climate Futures Exchange and Tianjin Climate Exchange, located in China). The lessons learned in these markets can play a critical role in effectively addressing global climate change and

other pressing environmental issues. The author argues that market-based trading systems are a far more effective means of reducing pollutants than “command-and-control”. Environmental markets may ultimately help to find solutions to issues such as rainforest destruction, water problems and biodiversity threats. Written in an engaging, narrative style, *Good Derivatives* will be of interest to both practitioners and general readers who want to better understand the creative process of financial innovation. In the middle of so much distrust of markets, it is also a recipe of how transparent, well-regulated markets can be a force for good in the environmental, health, and social areas.
