Guide to Independent Study Through Correspondence Instruction, 1980-1982

This report from the Select Committee on Modernisation of the House of Commons (HCP 282, session 2007-08, ISBN 9780215521675), focuses on regional accountability. The Governance of Britain Green Paper (Cm. 7170, ISBN 9780101717021) put forward proposals for improved democratic accountability and scrutiny of the delivery of public services in the English regions. The Committee, in this report, has concluded that there is clear evidence of an accountability gap at regional level. Regional Development Agencies (RDAs), although accountable to ministers, still conduct many activities that are not subject to a regular, robust scrutiny, and the Committee believes more should be done to monitor the delivery of services. With this in mind, the Committee recommends the establishment of a system of regional select committees, with one select committee for each of the administrative regions in England, with the exception of London. Further, the Committee recommends that up to two regional grand committee meeting should take place in each session for each of the 8 regions. To avoid an adverse impact on House Members' other commitments, membership of regional committees should consist of 10 Members in total. This report therefore sets out a desirability of establishing new structures within the House of Commons to improve regional accountability and Parliamentary scrutiny.

Films and Other Materials for Projection

Covering each of the core curriculum areas in turn, this is a reference on school subject teaching. The authors assess the development of teaching within each subject area since the 1944 Education Act up to the year 2000. Future challenges are also explored.
