### **Breaking the Sound Barrier**

THE STORY: In this delightful, laugh-a-minute comedy, four unique Southern women, all needing to escape the sameness of their day-to-day routines, are drawn together by Fate—and an impromptu happy hour—and decide it's high time to reclaim the enthusiasm for life they've lost through the years. Randa, a perfectionist and workaholic, is struggling to cope with a surprise career derailment that, unfortunately, reveals that she has no life and no idea how to get one. Dot, still reeling from her husband's recent demise and the loss of their plans for an idyllic retirement, faces the unsettling prospect of starting a new life from scratch—and all alone. Earthy and boisterous Marlafaye, a good ol' Texas gal, has blasted into Savannah in the wake of losing her tom-cattin' husband to a twenty-three-year-old dental hygienist. The strength of her desire to establish a new life is equaled only by her desire to wreak a righteous revenge on her ex. Also new to town, Jinx, a spunky ball of fire, offers her services as a much-needed life coach for these women. However, blinded by her determination and efforts to get their lives

on track, she over-looks the fact that she's the one most in need of sage advice. Over the course of six months, filled with laughter, hilarious misadventures, and the occasional liquid refreshment, these middle-aged women successfully bond and find the confidence to jumpstart their new lives. Together, they discover lasting friendships and a renewed determination to live in the moment—and most importantly, realize it's never too late to make new old friends. So raise your glass to these strong Southern women and their fierce embrace of life and say “Cheers!” to this joyful and surprisingly touching Jones, Hope, Wooten comedy!

Phillips Computing for Scientists R. J. Barlow and A. R. Barnett Statistical Physics, Second Edition develops a unified treatment of statistical mechanics and thermodynamics, which emphasises the statistical nature of the laws of thermodynamics and the atomic nature of matter. Prominence is given to the Gibbs distribution, leading to a simple treatment of quantum statistics and of chemical reactions. Undergraduate students of physics and related sciences will find this a stimulating account of the basic physics and its applications. Only an elementary knowledge of kinetic theory and atomic physics, as well as the rudiments of quantum theory, are presupposed for an understanding of this book. Statistical Physics, Second Edition features: A fully integrated treatment of thermodynamics and statistical mechanics. A flow diagram allowing topics to be studied in different orders or omitted altogether. Optional "starred" and highlighted sections containing more advanced and specialised material for the more ambitious reader. Sets of problems at the end of each chapter to help student understanding. Hints for solving the problems are given in an Appendix.

Breaking the Sound Barrier: Teaching Language Learners How to Listen. To cite use Conti and Smith (2019). This book is for language teachers who want to help their students become more effective listeners. It focuses on the processes involved in aural comprehension, blending the latest research evidence with over 200 engaging listening activities, as well as lots of useful practical classroom ideas and lesson sequences. Chapters include the principles of "listening as modelling", developing phonological and lexical retrieval skills, grammatical parsing, interpersonal and task-based listening. There are also chapters on how to make the most of songs, cognitive and metacognitive strategies, assessment and preparing for examinations. The final chapter offers a framework for language teachers or departments who wish to develop a strategy for improved listening. The book aims to place listening at the forefront of lesson planning. Gianfranco and Steve have around 60 years of classroom experience between them and a track record of offering instantly usable, low-preparation activities for the classroom, supported by second language acquisition research. Their handbook *The Language Teacher Toolkit* is already widely used around the world. Too often, classroom listening is neglected by teachers and a source of fear for learners; how can we make it a successful and enjoyable experience for all? This book is truly unique in its genre, in proposing a different and more impactful answer to this question. We sincerely hope you enjoy it.

## Modern Biology

Now if I just remembered where I put that original TV play device--the universal remote control . . . Television is a global industry, a medium of representation, an architectural component of space, and a nearly universal frame of reference for viewers. Yet it is also an abstraction and an often misunderstood science whose critical influence on the development, history, and diffusion of new media has been both minimized and overlooked. *How Television Invented New Media* adjusts the picture of television culturally while providing a corrective history of new media studies itself. Personal computers, video game systems, even iPods and the Internet built upon and borrowed from television to become viable forms. The earliest personal computers, disguised as video games using TV sets as monitors, provided a case study for television's key role in the emergence of digital interactive devices. Sheila C. Murphy analyzes how specific technologies emerge and how representations, from *South Park* to *Dr. Horrible's Sing-Along-Blog*, mine the history of television just as they converge with new methods of the making and circulation of images. Past and failed attempts to link television to computers and the Web also indicate how services like Hulu or Netflix On-Demand can give rise to a new era for entertainment and program viewing online. In these concrete ways, television's role in new and emerging media is solidified and finally recognized.

Nava Atlas presents twelve celebrated women authors and draws on their diaries, letters, memoirs, and interviews to show how they expressed their views on the subjects of importance to every writer, from carving out time to write, to conquering their inner demons, to developing a "voice," to balancing the demands of family life with needs to write. Atlas provides her own illuminating commentary as well and reveals how the lessons of classic women writers of the past still resonate with women writing today.
