Nelson Pediatrics Board Review E-Book

Slavery, Geography and Empire in Nineteenth-Century Marine Landscapes of Montreal and Jamaica is among the first Slavery Studies books - and the first in Art History - to juxtapose temperate and tropical slavery. Charmaine A. Nelson explores the central role of geography and its racialized representation as landscape art in imperial conquest. One could easily assume that nineteenth-century Montreal and Jamaica were worlds apart, but through her astute examination of marine landscape art, the author re-connects these two significant British island colonies, sites of colonial ports with profound economic and military value. Through an analysis of prints, illustrated travel books, and maps, the author exposes the fallacy of their disconnection, arguing instead that the separation of these colonies was a retroactive fabrication designed in part to rid Canada of its deeply colonial history as an integral part of Britain's global trading network which enriched the motherland through extensive trade in crops produced by enslaved workers on tropical plantations. The first study to explore James Hakewill's Jamaican landscapes and William Clark's Antigua genre studies in depth, it also examines the Montreal landscapes of artists including Thomas Davies, Robert Sproule, George Heriot and James Duncan. Breaking new ground, Nelson reveals how gender and race mediated the aesthetic and scientific access of such - mainly white, male - artists. She analyzes this moment of deep political crisis for British slave owners (between the end of the slave trade in 1807 and complete abolition in 1833) who employed visual culture to imagine spaces free of conflict and to alleviate their pervasive anxiety about slave resistance. Nelson explores how vision and cartographic knowledge translated into authority, which allowed colonizers to 'civilize' the terrains of the so-called New World, while belying the oppression of slavery and indigenous displacement.

Turnout! offers strategies for "emergency elections," like the 2020 races, and addresses the nuts-and-bolts for civic groups and individuals to effectively turn out the vote. Indeed, few elections in recent history represent the kind of apocalyptic turning point for our planet and democracy as the present one. Turnout! is both a creative work of political vision combined with a detailed manual for turning out millions of new voters. Participation at local, state, and federal levels will have an outsized impact on the future of democracy and life itself. The elections also provide an opportunity to power-up social movements that can re-frame and re-define civic participation in an age of extreme inequality, climate change, and pandemics. Contributors include powerful movement leaders Maria Teresa Kumar (Voto Latino), Aimee Allison (She the People), Winona LaDuke (Honor the Earth), and Matt Nelson (Presente.org); leading public officials advocating greater voter engagement like Oregon Senator Jeff Merkley and Wisconsin Lt. Governor Mandela Barnes, and councilors Helen Gym and Nikki Fortunato Bas. Turnout! reveals strategies and real-world tactics to mobilize millions of discouraged, apathetic, or suppressed voters, including women, low-income, Indigenous, Black, Latinx, Asian, LGBTQIA+, student and youth, and working-class voters.

The Emotion Code

This book reconsiders the career of an important, controversial, but neglected figure in this history of Irish Presbyterianism. The Revd Isaac Nelson is mostly remembered for his opposition to the evangelical revival of 1859, but this book demonstrates that there was much more to Nelson's career. Nelson started out as a protégé of Henry Cooke and as an exemplary young evangelical minister. Upon aligning himself with the Belfast Anti-Slavery Society and joining forces with American abolitionists such as Frederick Douglass and William Lloyd Garrison, Nelson emerged as a powerful voice against compromise with slaveholders. One of the central objectives of this book is to show that anti-slavery, especially his involvement with the 'Send Back the Money' controversy in the Free Church of Scotland and the debate over fellowship with slaveholders at the Evangelical Alliance, was crucially important to the development of Nelson into one of Irish

Presbyterianism's most controversial figures. His later opposition to the 1859 Revival has often been understood as being indicative of Nelson's opposition to evangelicalism. This book argues that such a conclusion is mistaken and that Nelson opposed the Revival as a Presbyterian evangelical. His later involvement with the Land League and the Irish Home Rule movement, including his tenure as the Member of Parliament for County Mayo, could be easily dismissed as an entirely discreditable affair. While avoiding romantic nostalgia in relation to Nelson's nationalism, this book argues that Nelson's basis for advocating Home Rule was not as peculiar as it might first appear.

"I believe that the discoveries in this book can change our understanding of how we store emotional experiences and in so doing, change our lives. The Emotion Code has already changed many lives around the world, and it is my hope that millions more will be led to use this simple tool to heal themselves and their loved ones."—Tony Robbins In this newly revised and expanded edition of *The Emotion Code*, renowned holistic physician and lecturer Dr. Bradley Nelson skillfully lays bare the inner workings of the subconscious mind. He reveals how emotionally-charged events from your past can still be haunting you in the form of "trapped emotions"—emotional energies that literally inhabit your body. These trapped emotions can fester in your life and body, creating pain, malfunction, and eventual disease. They can also extract a heavy mental and emotional toll on you, impacting how you think, the choices that you make, and the level of success and abundance you are able to achieve. Perhaps most damaging of all, trapped emotional energies can gather around your heart, cutting off your ability to give and receive love. *The Emotion Code* is a powerful and simple way to rid yourself of this unseen baggage. Dr. Nelson's method gives you the tools to identify and release the trapped emotions in your life, eliminating your "emotional baggage," and opening your heart and body to the positive energies of the world. Filled with real-world examples from many years of clinical practice, *The Emotion Code* is a distinct and authoritative work that has become a classic on self-healing.

Racial and ethnic disparities in health care are known to reflect access to care and other issues that arise from differing socioeconomic conditions. There is, however, increasing evidence that even after such differences are accounted for, race and ethnicity remain significant predictors of the quality of health care received. In Unequal Treatment, a panel of experts documents this evidence and explores how persons of color experience the health care environment. The book examines how disparities in treatment may arise in health care systems and looks at aspects of the clinical encounter that may contribute to such disparities. Patients' and

providers' attitudes, expectations, and behavior are analyzed. How to intervene? Unequal Treatment offers recommendations for improvements in medical care financing, allocation of care, availability of language translation, community-based care, and other arenas. The committee highlights the potential of cross-cultural education to improve provider-patient communication and offers a detailed look at how to integrate cross-cultural learning within the health professions. The book concludes with recommendations for data collection and research initiatives. Unequal Treatment will be vitally important to health care policymakers, administrators, providers, educators, and students as well as advocates for people of color.

“Reveals a political trend that threatens both our form of government and our species.” - Timothy Snyder, author of ON TYRANNY "Riveting. Want to understand how so many Americans turned against truth? Read this book." Nancy Maclean, author of DEMOCRACY IN CHAINS In 1981, emboldened by Ronald Reagan's election, a group of some fifty Republican operatives, evangelicals, oil barons, and gun lobbyists met in a Washington suburb to coordinate their attack on civil liberties and the social safety net. These men and women called their coalition the Council for National Policy. Over four decades, this elite club has become a strategic nerve center for channeling money and mobilizing votes behind the scenes. Its secretive membership rolls represent a high-powered roster of fundamentalists, oligarchs, and their allies, from Oliver North, Ed Meese, and Tim LaHaye in the Council's early days to Kellyanne Conway, Ralph Reed, Tony Perkins, and the DeVos and Mercer families today. In Shadow Network, award-winning author and media analyst Anne Nelson chronicles this astonishing history and illuminates the coalition's key figures and their tactics. She traces how the collapse of American local journalism laid the foundation for the Council for National Policy's information war and listens in on the hardline broadcasting its members control. And she reveals how the group has collaborated with the Koch brothers to outfit
