## **25 Years UPSC IAS/ IPS Prelims Topic-wise Solved Papers 1 & 2 (1995-2019) 10th Edition**

"Chapter Goals" and "Chapter Goals Revisited" are two new features in this revision. Each chapter starts with a list of goals that allows students to see what is ahead. The chapter concludes with a repetition of that list with summary information added. General ChemistryNow is correlated to this list. New to this edition are dozens of "Active Figures" to help students visualize chemistry in action. These animated versions of text art help students master key concepts from the book. "Active Figures" can be used as demonstrations in the classroom and each figure is paired with a guided exploration and exercise to ensure students understand the concept being illustrated. In-text worked "Examples" follow a four-part structure: "Problem" statement, "Strategy" for approaching the problem, fully worked "Solution," and, where appropriate, a "Comment" on the problem and solution. Through this approach, students learn how to approach a problem rather than merely learning to memorize problem types and memorized solution approaches. Exercises appear throughout the text so students can check their comprehension of the material. Answers are in an appendix. "Problem-Solving Tips" provide readers tips for determining how to approach and solve problems. "Chemical Perspectives" are essays that bring relevance and perspective to a study of chemistry. In order to put chemistry in its historical context, "Historical Perspective" essays describe the people who were key to developing the concepts of the chapter. "A Closer Look" essays describe ideas that form the background to material under discussion or provide another dimension of the subject. - Publisher.

### **Lakhmir Singh's Science for Class 8**

This book examines the state of the Open and Distance Learning (ODL)-based secondary education in India. ODL-based education has been a key resource for children in India who can neither cope with nor avail of regular schooling opportunities due to economic, health and disability, or other constraints. The volume uses large-scale empirical data collected from various Indian states and a sensitive theoretical framework to study the equity, efficiency, and effectiveness of the National Institute of Open Schooling (NIOS) and the State Open School (SOS). Highlighting the roadblocks and barriers in terms of its reach, inclusion, and delivery, particularly to the marginalised, this book explores whether ODL has a potential of being a sustainable and effective option at the secondary and senior secondary level in India. Thus, it seeks to generate policy discourse around delivery mechanisms and effectiveness of ODL in developing countries. First of its

kind, this comprehensive volume will be useful for scholars and researchers of education, education policy, public policy, and political studies.

When the younger players in India's cricket team find out that advertising executive Zoya Singh Solanki was born at the very moment India won the World Cup back in 1983, they are intrigued. When having breakfast with her is followed by victories on the field, they are impressed. And when not eating with her results in defeat, they decide she's a lucky charm. The nation goes a step further. Amazed at the ragtag team's sudden spurt of victories, it declares her a Goddess. So when the eccentric IBCC president and his mesmeric, always-exquisitely-attired Swamiji invite Zoya to accompany the team to the tenth ICC World Cup, she has no choice but to agree. Pursued by international cricket boards on the one hand, wooed by Cola majors on the other, Zoya struggles to stay grounded in the thick of the world cup action. And it doesn't help that she keeps clashing with the erratically brilliant new skipper who tells her flatly that he doesn't believe in luck

The book reconnoiters the New World Order of Postmodernism in five plays The Room (1957), The Birthday Party (1957), The Caretaker (1960), The Homecoming (1965) and Celebration (2000) of Harold Pinter. With culturally structured,

incomprehensibly manipulated, dual and fragmented characters, Harold Pinter analyses the ambiguities of political system. It is perhaps the System that forcibly drags Stanley to a world of systems in The Birthday Party. The situation of Ruth in The Homecoming clearly indicates the inevitable grip of this System. The last play Celebration overtly ridicules the very political system we approve of wherein the strategy consultants and the corporate people define the organized mechanism of this SYSTEM! The internalization of power which the power structures of societies and politics possess, appears largely in his plays, providing postmodernism its duality. Pinter offers us a true picture of our postmodernist culture an apocalyptic world at the edge of civilization.

The phenomenon that Einstein thought too spooky and strange to be true What is entanglement? It's a connection between quantum particles, the building blocks of the universe. Once two particles are entangled, a change to one of them is reflected---instantly---in the other, be they in the same lab or light-years apart. So counterintuitive is this phenomenon and its implications that Einstein himself called it "spooky" and thought that it would lead to the downfall of quantum theory. Yet scientists have since discovered that quantum entanglement, the "God Effect," was one of Einstein's few---and perhaps one of his greatest---mistakes. What does it mean? The possibilities offered by a fuller understanding of the nature of entanglement read like something out of science fiction: communications devices that could span the stars, codes that cannot be broken, computers that dwarf today's machines in speed and power, teleportation, and more. In The God Effect, veteran science writer Brian Clegg has written an exceptionally readable and fascinating (and equation-free) account of entanglement, its history, and its application. Fans of Brian Greene and Amir Aczel and those interested in the marvelous possibilities coming down the quantum road will find much to marvel, illuminate, and delight.

March 1993. Mumbai was rocked by a series of bomb blasts. Unknown to most, Dawood Ibrahim, the mastermind behind the terror attack, had made several calls to the CBI. The don was desperate to prove his 'innocence' by giving himself up, but with conditions. October 1999. The world's very first case of cricket match-fixing led to the banning of six top Indian cricketers, including the then team captain. It was only in 2013, after the then commissioner of police revived the case, that a charge sheet was filed in a court of law. January 2002. Aftab Ansari—a notorious Dubai-based don responsible for kidnapping a shoe baron in 2001 with the help of Jihadi groups in Pakistan—was arrested just as he was about to escape Dubai on a forged passport to Pakistan. All these cases of life-threatening moments and unbelievable relief, involved the sharp investigative skills of an Indian Police Service officer then serving in the CBI. In his thirty-seven years of service, Neeraj Kumar neutralized several terror modules and decimated insidious organized crime

syndicates spanning continents, working closely with Interpol, FBI, Scotland Yard and several national and international agencies. Much decorated and feted, he hung up his boots in 2013, after his last calling as Delhi's police commissioner. He has now decided that the inside details of what have been some of the most fascinating crime stories of our times must not go unheard and untold. The book covers several high-profile cases cracked by him in recent years, including the arrest and deportation of Aftab Ansari, the main accused in the shooting at the American Center in Kolkata, the nabbing of Jagtar Singh Tara, the man behind Punjab CM Beant Singh's assassination, and the arrest of Romesh Sharma, a Dawood henchman masquerading as a politician based in Delhi.
