“Revelatory . . . With every chapter, you get a history lesson, a hunting lesson, a nature lesson and a cooking lesson. . . . Meat Eater offers an overabundance to savor.”—The New York Times Book Review
Steven Rinella grew up in Twin Lake, Michigan, the son of a hunter who taught his three sons to love the natural world the way he did. As a child, Rinella devoured stories of the American wilderness, especially the exploits of his hero, Daniel Boone. He began fishing at the age of three and shot his first squirrel at eight and his first deer at thirteen. He chose the colleges he went to by their proximity to good hunting ground, and he experimented with living solely off wild meat. As an adult, he feeds his family from the food he hunts. Meat Eater chronicles Rinella’s lifelong relationship with nature and hunting through the lens of ten hunts, beginning when he was an aspiring mountain man at age ten and ending as a thirty-seven-year-old Brooklyn father who hunts in the remotest corners of North America. He tells of having a struggling career as a fur trapper just as fur prices were falling; of a dalliance with catch-and-release steelhead fishing; of canoeing in the Missouri Breaks in search of mule deer just as the Missouri River was freezing up one November; and of hunting the elusive Dall sheep in the glaciated mountains of Alaska. Through each story,

Rinella grapples with themes such as the role of the hunter in shaping America, the vanishing frontier, the ethics of killing, the allure of hunting trophies, the responsibilities that human predators have to their prey, and the disappearance of the hunter himself as Americans lose their connection with the way their food finds its way to their tables. Hunting, he argues, is intimately connected with our humanity; assuming responsibility for acquiring the meat that we eat, rather than entrusting it to proxy executioners, processors, packagers, and distributors, is one of the most respectful and exhilarating things a meat eater can do. A thrilling storyteller with boundless interesting facts and historical information about the land, the natural world, and the history of hunting, Rinella also includes after each chapter a section of “Tasting Notes” that draws from his thirty-plus years of eating and cooking wild game, both at home and over a campfire. In *Meat Eater* he paints a loving portrait of a way of life that is part of who we are as humans and as Americans. Praise for *Meat Eater* “Full of empathy and intelligence . . . In some sections of the book, the author’s prose is so engrossing, so riveting, that it matches, punch for punch, the best sports writing.”—The Wall Street Journal “Steven Rinella is one of the best nature writers of the last decade. . . . This book was a page-turner.”—Tim Ferris “Rinella’s writing is unerringly smart, direct, and sharply detailed.”—The Boston Globe “A unique and valuable alternate view of where our food comes from.”—Anthony Bourdain

Sport Fish of New Jersey

Rory Freedman, co-author of the #1 New York Times mega-seller *Skinny Bitch*, returns with a call-to-arms to all animal lovers. So many of us call ourselves animal lovers and worship our dogs and cats—but we could be using that love as a force for helping all animals. *Beg* is a battle cry on their behalf, as well as an inspirational, empowering guide to what we can do to help them. With the same no-nonsense tone that made *Skinny Bitch* a multi-million copy success, *Beg* galvanizes us to change our choices and actions, and to love animals in a radical new way.

Fishing the New Jersey Coast

Use of Lead Shot for Hunting Migratory Birds in the United States

Hacklebarney and Voorhees State Parks recounts the history of two beautiful natural sanctuaries at the southwestern end of New Jersey's Highlands. Managed as a single unit by the state park service, the two parks are Hacklebarney, 977 acres along the Black River corridor, and Voorhees, 640 acres of gently rolling farmland. Their stories are similar: both parks were created in the 1920s on privately donated land and were developed by the federally operated Civilian Conservation Corps. With more than two hundred unique photographs, many published here for the first time, Hacklebarney and Voorhees State Parks shows life at the CCC camps, the building of trails and roads by hand, and the repair of forests.

Federal Aid in Fish and Wildlife Restoration; Annual Report on Dingell-Johnson and Pittman-Robertson Programs

Call of the Mild

The North American model of wildlife conservation is unique, and it has restored wildlife abundance to an entire continent. While courts defined a public-trust relationship with fish and wildlife, sport hunters developed a philosophy and initiated programs that resurrected waterfowl, upland birds, and big game from the ashes of commercial exploitation and habitat desecration. Today, against all odds, we enjoy a wildlife abundance that is the envy of the world. Rifle in Hand traces the evolution of our society's relationship with the animals that share this continent. It introduces the reader to a few of the heroes who made it all happen, people who, while passing through history, left a conservation legacy and hunting heritage for all to enjoy, including Theodore Roosevelt, D'ing Darling, Aldo Leopold and others.

Library of Congress Catalogs

Historical perspective. Wildlife values in a Changing World. New patterns on land and water. Influence of land management on wildlife. Special problems of waters and watersheds. Pesticides and wildlife. Wildlife damage and control. Legislation and administration. Evaluation and Conclusions.

The New Jersey Register

Simply stated, these are the most complete books ever assembled for the deer hunter. These comprehensive volumes, written by the editor of Deer & Deer

Hunting magazine, cover natural history, deer hunting lore, profiles of deer hunters, and discussion of important issues facing deer hunters today.

The 1980 National Survey of Fishing, Hunting, and Wildlife-associated Recreation

The eighth edition of the New Jersey Environmental Law Handbook has been thoroughly rewritten and updated. Respected attorneys, consultants, professionals, and experts provide the most in-depth and up-to-date guide for New Jersey's environmental regulations and policies, all while maintaining an accessible and engaging writing style.

The Sixth Extinction

Hacklebarney and Voorhees State Parks

At the end of the nineteenth century, North America suffered a catastrophic loss of wildlife driven by unbridled resource extraction, market hunting, and unrelenting subsistence killing. This crisis led powerful political forces in the United States and Canada to collaborate in the hopes of reversing the process, not merely halting the extinctions but returning wildlife to abundance. While there was great understanding of how to manage wildlife in Europe, where wildlife management was an old, mature profession, Continental methods depended on social values often unacceptable to North Americans. Even Canada, a loyal colony of England, abandoned wildlife management as practiced in the mother country and joined forces with like-minded Americans to develop a revolutionary system of wildlife conservation. In time, and surviving the close scrutiny and hard ongoing debate of open, democratic societies, this series of conservation practices became known as the North American Model of Wildlife Conservation. In this book, editors Shane P. Mahoney and Valerius Geist, both leading authorities on the North American Model, bring together their expert colleagues to provide a comprehensive overview of the origins, achievements, and shortcomings of this highly successful conservation approach. This volume • reviews the emergence of conservation in late nineteenth–early twentieth century North America • provides detailed explorations of the Model's institutions, principles, laws, and policies • places the Model within ecological, cultural, and socioeconomic contexts • describes the many economic, social, and cultural benefits of wildlife restoration and management • addresses the Model's challenges and limitations while pointing to emerging opportunities for increasing inclusivity and optimizing implementation Studying the North American experience offers insight into how institutionalizing policies and laws while incentivizing citizen engagement can result in a resilient framework for conservation. Written for wildlife professionals, researchers, and students, this book explores the factors that helped fashion an enduring conservation system, one that has not only rescued, recovered, and sustainably utilized wildlife for over a century, but that has also advanced a significant economic driver and a greater scientific understanding of wildlife ecology. Contributors: Leonard A. Brennan, Rosie Cooney, James L. Cummins, Kathryn Frens, Valerius Geist, James R. Heffelfinger, David G. Hewitt, Paul R. Krausman, Shane P. Mahoney, John F. Organ,

James Peek, William Porter, John Sandlos, James A. Schaefer

Deer and Deer Hunting

A biking book geared specifically toward families with young kids features photos and easy-to-follow maps for nearly twenty-five kid-friendly trails that are not too steep or too long, do not encounter many roads, and provide ample access to food and restroom facilities. Original.

The Convention of the International Association of Fish and Wildlife Agencies

This book identifies prime fishing locations for all seasons and species in the Garden State, plus what lures, baits and techniques to use. The author is a local authority with deep-rooted knowledge of New Jersey's generous saltwater fishing opportunities. Covers surf, bay, and near-shore waters.

New Serial Titles

Presents testimony from interested parties on whether the State should promote ecotourism as a policy to promote both environmental protection and economic development in NJ. Covers: how to use scarce resources to promote ecotourism in the state, and how to encourage the growth of ecotourism markets while maintaining environmental quality in the state. Witnesses include representatives from a number of environmental groups (Nature Conservancy, Wetlands Inst., etc.) as well as the NJ Dept. of Environmental Protection and state and local travel and tourism groups, planning boards, and chambers of commerce.

Meat Eater

This report provides a detailed snapshot of our nation's passion for wildlife and nature. It serves as a road map to guide efforts to reach more Americans to provide them with opportunities to hunt, fish, and enjoy America's wildlife and wild places. Bird/wildlife watching, hunting, fishing are not just favorite pastimes, but they share revenues from sale of licenses and tags, as well as excise taxes paid by hunters, anglers, and shooters to continue to support vital wildlife and habitat conservation efforts in every state. The report outlines the details for compilation of information and surveys to different populations and provides highlights along with statistical information represented in tables from the data collected. Betsy Andrews's sweeping, energetic, book-length poem pounds the pavement of the New Jersey Turnpike, driving through America—past landfills and wetlands and weapons labs—under the towering shadows of engines, oil, and war. With a disarmingly unique voice that evokes the tradition of Pound and Eliot, Whitman and Williams and Ginsberg, Andrews creates a pastiche of landscape, consciousness, history, and politics in this American age.

Charting a Course for the Delaware Bay Watershed

ONE OF THE NEW YORK TIMES BOOK REVIEW'S 10 BEST BOOKS OF THE YEAR A major book about the future of the world, blending intellectual and natural history and field reporting into a powerful account of the mass extinction unfolding before our eyes Over the last half a billion years, there have been five mass extinctions, when the diversity of life on earth suddenly and dramatically contracted. Scientists around the world are currently monitoring the sixth extinction, predicted to be the most devastating extinction event since the asteroid impact that wiped out the dinosaurs. This time around, the cataclysm is us. In *The Sixth Extinction*, two-time winner of the National Magazine Award and New Yorker writer Elizabeth Kolbert draws on the work of scores of researchers in half a dozen disciplines, accompanying many of them into the field: geologists who study deep ocean cores, botanists who follow the tree line as it climbs up the Andes, marine biologists who dive off the Great Barrier Reef. She introduces us to a dozen species, some already gone, others facing extinction, including the Panamian golden frog, staghorn coral, the great auk, and the Sumatran rhino. Through these

stories, Kolbert provides a moving account of the disappearances occurring all around us and traces the evolution of extinction as concept, from its first articulation by Georges Cuvier in revolutionary Paris up through the present day. The sixth extinction is likely to be mankind's most lasting legacy; as Kolbert observes, it compels us to rethink the fundamental question of what it means to be human.

Operation of the Federal Aid in Sport Fish and Wildlife Restoration Program

Perfectly situated on the eastern seaboard between the Chesapeake Bay to the west and the Delaware River, Delaware Bay, and Atlantic Ocean to the east, Delaware has proven to be a hunting paradise for local sportsmen. For centuries, outdoorsmen and outdoorswomen have harvested the natural riches offered by the wild game that inhabit Delaware's deciduous forests, salt and freshwater marshes, and cultivated crop fields. Common game, such as white-tailed deer, Canada geese, and varied species of ducks have been targeted by the majority of Delaware hunters, but woodcock, quail, snow geese, crows, squirrels, and rabbits are also plentiful in Delaware and provide Delaware sportsmen with hours of hunting enjoyment each season. Join Delawarean Steven Kendus as he uses his hunting wisdom, experience, and research to preserve Delaware's hunting legacy by sharing important history, tactics, locations, tips, and tricks associated with Delaware hunting.

Proceedings of the Eastern Wildlife Damage Control Conference

"Endangered and Threatened Wildlife of New Jersey" is a richly illustrated color guide to the state's 73 most imperiled species, from bobcats to bobolinks, shortnosed sturgeons to loggerhead turtles, frosted elfins to triangle floaters, blue whales to American burying beetles.

Rifle in Hand

Outdoor Recreation Plan of New Jersey

When Lily Raff McCaulou traded in an indie film production career in New York for a reporting job in central Oregon, she never imagined that she'd find herself picking up a gun and learning to hunt. She'd been raised as a gun-fearing environmentalist and an animal lover, and though a meat-eater, she'd always abided by the

principle that harming animals is wrong. But Raff McCaulou's perspective shifted when she began spending weekends fly-fishing and weekdays interviewing hunters for her articles, realizing that many of them were more thoughtful about animals and the environment than she was. So she embarked upon the project of learning to hunt from square one. From attending a Hunter Safety course designed for children to field dressing an elk and serving it for dinner, she explores the sport of hunting and all it entails, and tackles the big questions surrounding one of the most misunderstood American practices and pastimes. Not just a personal memoir, this book also explores the role of the hunter in the twenty-first century, the tension (at times artificial) between hunters and environmentalists, and new models of sustainable and ethical food procurement.

Family-Friendly Biking In New Jersey And Eastern Pennsylvania

1996 National Survey of Fishing, Hunting, and Wildlife-associated Recreation

New Jersey Birding & Wildlife Trails

"Those of you who have this book have a huge head start by having the most comprehensive guide that exists for learning what is swimming in our waters and where it can be caught in New Jersey" from foreword written by Dave Chanda, Director, N. J. Division of Fish & Wildlife.
