Sessional Papers

Parks and People

Governments and Tourism

This book investigates the potential role that states can play in cosmopolitan thinking and how states could be agents for the advancement of cosmopolitan responsibilities. In doing so the book seeks to investigate the possibility that states can become bearers of cosmopolitan responsibilities across a variety of areas including human rights, atrocity prevention, climate change, and public health, while also remaining vehicles for popular self-determination withinpersisting, and at times counteracting, conditions of global pluralism.

Annual Report

The story of tourism in New Zealand from 1870 through to the end of the 20th century. McClure follows the development of tourist sites and landmark hotels; the Centennial Exhibition, the establishment of the National Film Unit, the Tourist Hotel Corporation and Air New Zealand.

Strengthening Environment Management Capabilities in Pacific Island Developing Countries

Debates of the National Assembly

(Hansard)

This book aims to show how the different countries and communities studied have coped with and are planning to address the opportunities and threats posed by tourism, and how the reader can use the author's approach in order to make their own assessment of the situation in a wide range of countries and communities not covered by the case studies in this book.

The Wonder Country

Antarctica's Future

Since the founding of Algonquin Provincial Park in 1893, Ontario has developed a parks system that is held in the highest regard. Today, some 260 parks span the province. Protected Places is a comprehensive account of the attitudes and actions that have shaped provincial parks policy over the century – notably those of early conservationists and more recently of environmentalists, aboriginal peoples, vacationers of every description, naturalists, scientists, loggers, miners, concession operators, the administrators with the responsibility to plan, develop, and manage the parks, and the politicians who made the ultimate decisions on policy matters. Author Gerald Killan's analysis cuts across the

disciplines of history, geography, political science, environmental studies, and the earth and life sciences. The book will be of compelling interest to readers from all these backgrounds, as well as the park visitor. Protected Places is being published in 1993 as part of the celebration of the Centennial of Ontario's provincial parks.
