J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, *The First Americans* is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science."

In the first fully uncensored biography of Joan Crawford, bestselling author David Bret follows Crawford from working in a Kansas City laundry to collecting an Oscar for Mildred Pierce, including details from her countless love affairs and her devotion toward Christian Science. Bret also divulges how her loathed mother forced her to work as a prostitute and use sex strategically, as well as what really led her to disinherit two of her four children, earning her the moniker "Mommie Dearest." Drawing on a wealth of unpublished material and interviews with stars like Marlene Dietrich and Douglas Fairbanks, David Bret presents a fascinating portrait

of a single-minded, uncompromising woman.

Since she exploded on the scene with her two juicy and impossible-to-put-down tell-alls, readers have wanted to know even more about what makes Karrine Steffans tick. How was she able to meet all the high profile politicians, movie stars, and other celebrities that are her close acquaintances? What skills does she possess to keep men wanting more? Finally, Karrine lays it all out and explains exactly what a woman must do to win over the man of her dreams. With chapters like "Never Let Him See You Sweat," "Flirting," "Encouraging His Manhood," and "Give Him What He Wants," this hot and sexy manual is a must-have for every woman's bookshelf.

Once in a while a product line comes along that offers men and women the opportunity to truly reclaim the youthful face they thought they had lost forever. Without drugs, electricity or anything harmful or hurtful millions of people worldwide have successfully and reliably used exercise to trim, lift and tone sagging muscles. Just like muscles in the body can be exercised, the facial muscles can greatly benefit from exercise but not just any exercise will do. Contortions, twists, puckers and funny faces will not shape or contour sagging facial muscles in a mature face. The Facial Magic facial exercise system will lift, tone and tighten sagging facial muscles. These proven, easy-to-

execute isometric movements require only minutes a day to perform and most users say they look 5, 10 even 15 years younger in just weeks as eyelids tighten, eye brows lift, the forehead smoothes, jowls and pouches melt away as double chins lessen, dramatically revealing a sculpted jaw line. Facial Magic provides the look of a face lift without surgery, seams or risk of infection. Using only the thumbs and fingers while wearing special exercise gloves, your "age erasers" will produce immediate lifting and tightening of the facial features. In about three weeks the appearance of fine lines and wrinkles become less apparent as the muscles plump up the skin helping the user's face look refreshed, radiant and younger. This book contains all 18 Facial Magic exercises. Learn two exercises each week - each exercise requires 35 seconds - so in just minutes a day you will feel and see the youthful results you desire.

Adrift is a book, based on a true story, for those who have left home, sought home, or even found home and know what it's like to live between worlds. Deanne was born to Canadian parents and grew up living in Canada, Germany and then on ships sailing around the world. This story begins when she moved back to the sea shortly after her 13th birthday. As I stared out the window of the van, the buildings of every city loomed ominously, like giant watchdogs forcing us to keep going. The glass was cool as I leaned my head against the window and forced the tears to retreat. The world outside the window whirled by as I stared the dogs down. My memories hung loosely together like bulbs from a string of lights. I couldn't remember when or where they happened or my exact age. I lived moment by moment, a girl in front of an ever-changing landscape of people and

places. There were reasons I did not belong to each of the countries I lived: you are not German, you have a Canadian passport. You are not Canadian, you've only lived here for a year. Would I ever fit in? A Girl From The Sea Series Book 1

Through the eyes of an inventor of new markets, Good Derivatives: A Story of Financial and

Environmental Innovation tells the story of how financial innovation – a concept that is misunderstood and under attack – has been a positive force in the last four decades. If properly designed and regulated, these “good derivatives” can open vast possibilities to address a variety of global problems. Filled with provocative ideas, fascinating stories, and valuable lessons, it will provide both an insightful interpretation of the last forty years in capital and environmental markets and a vision of world finance for the next forty years. As a young economist at the Chicago Board of Trade, Richard Sandor helped create interest rate futures, a development that revolutionized worldwide finance. Later, he pioneered the use of emissions trading to reduce acid rain, one of the most successful environmental programs ever. He will provide unique insights into the process of creating these new financial products. Covering successes and failures, the story describes the tireless process of inventing, educating and creating support for these new inventions in places like Chicago, New York, London, Paris and how it is unfolding today in Mumbai, Shanghai and Beijing. The book will tell the story of the creation of the Chicago Climate Exchange and its affiliated exchanges (European Climate Exchange, Chicago Climate Futures Exchange and Tianjin Climate Exchange, located in China). The lessons learned in these markets can play a critical role in effectively addressing global climate change and other pressing environmental issues. The author argues that market-based trading systems are a far more effective means of reducing pollutants than “command-and-control”. Environmental markets may ultimately help to find solutions to issues such as

rainforest destruction, water problems and biodiversity threats. Written in an engaging, narrative style, Good Derivatives will be of interest to both practitioners and general readers who want to better understand the creative process of financial innovation. In the middle of so much distrust of markets, it is also a recipe of how transparent, well-regulated markets can be a force for good in the environmental, health, and social areas.
