Strategic Operations Management, 4th Edition, shows how vital it is to have world-class operations management in any organisation. In the past, where organisations tended to be more hierarchical than today, the words, "strategy" and "operations" were almost mutually exclusive. In today's highly competitive environment, though, strategic operations capabilities must be in place for organisations to provide goods and services that meet and exceed customer requirements. Key issues such as cost, speed, quality, flexibility and constant innovation are all part of strategic operations. However, achieving such capabilities does not come by chance - instead a range of factors need to be put in place. This new edition pays equal attention to manufacturing and service sectors. It includes numerous references to, and discusses, major changes taking place in the business world, including 3-D printing; virtual organisations; Cloud - Big Data and the Internet of Things; Servitization, global markets, ongoing innovation and managing within complex supply networks. Cases are included from a range of settings across the globe. Students taking MBA, MSc and MBM classes on operations management, advanced operations management, and strategic operations management will find this textbook fulfills all their requirements whilst advanced undergraduate classes in these areas will also find the book an essential read.

Manage without giving up the work you love and discover the leader within. Conventional management thinking says that to manage effectively you must delegate. It implies that managers fall into a dangerous trap when they continue to perform tasks they love from a previous role. And it says that to not “let go” is to give in to a controlling tendency that robs staff of development opportunities. But not everyone agrees. Today’s increasingly knowledge-driven, cost-competitive work world is changing the way management gets done. More and more, people in management roles are becoming can-do leaders who must continue to practice their specialty while managing and developing the skills of others. But this group has had few guidelines to follow—until now. In *Becoming a Can-Do Leader*, executive coaches Frank Satterthwaite and Jamie Millard say it’s time that management thinking catches up with reality. Their extensive experience training and coaching player-managers at all levels has shown that successful managers both delegate and do. Whether you’re trying to survive your first promotion or coaching executives who yearn to keep up with their field, essential guidelines for can-do leadership are inside this book. You’ll find workplace examples that ring true, as well as unique strategies and tools that both help you identify your values and provide insight into your natural leadership style. Don’t let your knowledge and skills decline by stepping completely out of the professional picture. It’s time

to get productively and selectively involved in the work, enabling you to manage more effectively and keep up with important advances in your field—all while developing and leading your team to success. "Cost Management: Measuring, Monitoring, and Motivating Performance, Third Canadian Edition, was written to help students learn to appropriately apply cost accounting methods in a variety of organizational settings. To achieve this goal, students must also develop professional competencies, such as strategic/critical thinking, risk analysis, decision making, ethical reasoning, and communication. Most textbooks focus on content knowledge and then expect students to "magically" demonstrate professional competencies. As an author team, we bring

to this textbook extensive knowledge about cost accounting as well as about the best approaches for teaching and learning professional competencies. This textbook bridges the gap between typical student performance and what we would like students to be able to do by: maintaining a central focus on business decision making; explicitly addressing risk and biases; adopting a writing style that is accessible and interesting to students; concentrating on all types of organizations; focusing on ethical reasoning; simultaneously challenging and guiding students to learn."--Preface.
