Coronation Street is the world's longest-running TV soap-opera and a hugely popular national institution. From the moment the very first episode flickered onto our screens on 9 December 1960, the very heart of the show has always been the Rovers Return public house. It may just be a backstreet boozer, but TV's most famous pub has been at the centre of the action week in week out for the last 53 years. As longest-serving barmaid Betty once sagely noted: 'If you're not being talked about in this pub, you're not worth serving', and under the watchful eye of legendary landladies such as Annie Walker, Bet Lynch and Liz McDonald, the Rovers has witnessed everything from births, deaths, brawls and break-ups, to weddings, wakes and even its own ghost. But despite any drama that may be about to unfold, regulars are guaranteed a warm welcome, a shoulder to cry on and more often than not the waft of a hearty hotpot seeping through from the kitchen out back. This year proved to be the Rovers' most explosive to date when the pub was ripped apart by a devastating blaze, rocking the lives of the residents forever. As the boozer was gradually restored to its former glory, it hit home to the regulars just how much the heart of their community really meant to them

THE SUNDAY TIMES BESTSELLER 'Everything is much easier in life when difficult situations are faced with humour and a smile. But, don't get me wrong, that took years to realise. What a journey' Whether performing in an arena, presenting a number one TV show or recording a top-ten album, Jane McDonald will never forget her Northern roots. Her down-to-earth Yorkshire charm is as much a part of her as her talent for singing, and here she is telling her remarkable story with

characteristic wit and warmth, in her own words. A miner's daughter from Wakefield, Jane was a shy child who struggled with anxiety, but she found the courage to overcome her fears and follow her passion for performing. Jane famously hit the big time overnight on TV show The Cruise twenty years ago, but here she talks for the first time about how she survived the dark legacy of that early success, and climbed right back up for a second bite of the cherry. It hasn't all been plain sailing, but in Jane's world tough times make the good times better, and her spirit, heart and humour sparkle from every page.

gambling addiction, their savings is almost gone. In her early fifties with a large, waterfront home on Nantucket to support, Lisa hasn't worked in over thirty years, has no in-demand skills and is virtually unemployable. Her only options are to sell the house and move off-island, or, she could use her cooking and entertaining skills and turn her home into a bed and breakfast. She desperately needs it to succeed because she has four grown children with problems of their own and wants to stay close to them. Her oldest daughter, Kate, has a fabulous career in Boston--working as a writer for a popular fashion magazine and engaged to a dangerously handsome, photographer, who none of them have met. Kate's twin, local artist, Kristen, has been reasonably content with her on-again off-again relationship with an older, separated businessman. Her son, Chase, runs his own construction business and is carefree, happily dating here and there but nothing serious. Youngest daughter, Anna, is happily married to her high school sweetheart, and they've been trying to have a baby. But it hasn't happened yet, and Anna wonders if it's a sign that maybe their marriage isn't as perfect as everyone thinks. Come visit Nantucket and see how Lisa's new bed and breakfast has an impact on almost everyone in her family. It's the first book in a new series that will follow the Hodges family, friends, and visitors to Nantucket's Beach Plum Cove Inn.

entertaining guide to writing English the proper way by one of the greatest newspaper editors of our time. Harry Evans has edited everything from the urgent files of battlefield reporters to the complex thought processes of Henry Kissinger. He's even been knighted for his services to journalism. In DO I MAKE MYSELF CLEAR?, he brings his indispensable insight to us all in his definite guide to writing well. The right words are oxygen to our ideas, but the digital era, with all of its TTYL, LMK, and WTF, has been cutting off that oxygen flow. The compulsion to be precise has vanished from our culture, and in writing of every kind we see a trend towards more--more speed and more information but far less clarity. Evans provides practical examples of how editing and rewriting can make for better communication, even in the digital age. DO I MAKE MYSELF CLEAR? is an essential text, and one that will provide every writer an editor at his shoulder.

In the kingdom, radical Protestants are driving the old religion into extinction, while the Protector's prolonged war with Scotland has led to hyperinflation and economic collapse. Rebellion is stirring among the peasantry. Matthew Shardlake has been working as a lawyer in the service of Henry's younger daughter, the lady Elizabeth. The gruesome murder of one of Elizabeth's distant relations, rumored to be politically murdered, draws Shardlake and his companion Nicholas to the lady's summer estate, where a second murder is committed. As the kingdom explodes into rebellion, Nicholas is imprisoned for his loyalty, and Shardlake must decide where his loyalties lie -- with his kingdom, or with his lady?

In *Don't Call It Sprawl*, the current policy debate over urban sprawl is put into a broader analytical and historical context. The book informs people about the causes and implications of the changing metropolitan structure rather than trying to persuade them to adopt a panacea to all perceived problems. Bogart explains modern economic ideas about the structure of metropolitan areas to people interested in understanding and influencing the pattern of growth in their city. Much of the debate about sprawl has been driven by a fundamental lack of understanding of the structure, functioning, and evolution of modern metropolitan areas. The book analyzes ways in which suburbs and cities (trading places) trade goods and services with each other. This approach helps us better understand commuting decisions, housing location, business location, and the impact of public policy in such areas as downtown redevelopment and public school reform.

South Asia is famous for its monuments, past and present. Monuments have been created, destroyed and rescued by competing communities and incoming empires in the making and re-making of history, identity and memory. This collection brings

together an international cohort of senior scholars and younger researchers to examine the vast diversity of monuments (and conceptions of monuments) in South Asia from the 1850s to the present. The chapters investigate what constitutes a monument, and interrogate the conditions for its survival, demise or recycling. To explore the afterlives of monuments is to investigate how, where, when, and why monuments have been remodelled, re-sited, destroyed, defaced, or abandoned. It is to investigate the theories of memory, history and community, as well as new forms of artistic practice and global media. As different South-Asian communities claim a stake in the making of national, religious, cultural and local identities and histories, the status of monuments and debates about cultural memory have become increasingly urgent. This book was published as a special issue of South Asian Studies.

This is the origin story of technology super heroes: the creators and founders of ARM, the company that is responsible for the processors found inside 95% of the world's mobile devices today. This is also the evolution story of how three companies - Apple, Samsung, and Qualcomm - put ARM technology in the hands of billions of people through smartphones, tablets, music players, and more. It was anything but a straight line from idea to success for ARM. The story starts with the triumph of BBC Micro engineers Steve Furber and Sophie Wilson, who make the audacious decision to design their own microprocessor - and it works the first time. The question becomes, how to sell it? Part I follows ARM as its founders launch their own company, select a new leader, a new strategy, and find themselves partnered with Apple, TI, Nokia, and other companies just as digital technology starts to unleash mobile devices. ARM grows rapidly, even as other semiconductor firms struggle in the dot com meltdown, and establishes itself as a standard for embedded RISC processors. Apple aficionados will find the opening of Part II of interest the moment Steve Jobs returns and changes the direction toward fulfilling consumer dreams. Samsung devotees will see how that firm evolved from its earliest days in consumer electronics and semiconductors through a philosophical shift to innovation. Qualcomm followers will learn much of their history as it plays out from satellite communications to development of a mobile phone standard and emergence as a leading fabless semiconductor company. If ARM could be

summarized in one word, it would be "collaboration." Throughout this story, from Foreword to Epilogue, efforts to develop an ecosystem are highlighted. Familiar names such as Google, Intel, Mediatek, Microsoft, Motorola, TSMC, and others are interwoven throughout. The evolution of ARM's first 25 years as a company wraps up with a shift to its next strategy: the Internet of Things, the ultimate connector for people and devices. Research for this story is extensive, simplifying a complex mobile industry timeline and uncovering critical points where ARM and other companies made fateful and sometimes surprising decisions. Rare photos, summary diagrams and tables, and unique perspectives from insiders add insight to this important telling of technology history.
