The rise of Chinese female athletic participation and success in international competitions has become the backbone for China's rise to sports relevance, and has been unlike historical Western nation-states' experience in athletics. This historical examination chronologically documents the rise of Chinese elite female athletes and the policies affecting athletes from 1949 to the present, and reveals a

connection between female athletic success and state enforced gender equality policies that targeted culture, education, and labor. Through gender equality policies, men and women were uniformly exposed to a national sports system that invested in research, training, equipment, recruitment, and incentivizing athletes "to win honors for the country." Moreover, this examination evaluates various hypotheses on what Chinese policies, if any, have produced these extraordinary results, and proposes the sports system, although exceptionally successful, is ultimately imbalanced and plateauing, while the Chinese Communist Party desires participation, power, and control at the expense of possible broad athletic victory.

Richard A. Primus examines three crucial periods in American history (the late eighteenth century, the civil war and the 1950s and 1960s) in order to demonstrate how the conceptions of rights prevailing at each of these times grew out of reactions to contemporary social and political crises. His innovative approach sees rights language as grounded more in opposition to concrete social and political practices, than in the universalistic paradigms presented by many political philosophers. This study demonstrates the potency of the language of rights throughout American history, and looks for the first time at the impact of modern totalitarianism (in Nazi Germany and the Soviet Union) on American conceptions of rights. The American Language of Rights is a major contribution to

contemporary political theory, of interest to scholars and students in politics and government, constitutional law, and American history.

While perturbative QCD methods fully describe experimental results at high energies, and chiral perturbation theory is the low energy effective theory of the strong interactions, a form of duality is observed connecting these two regimes. In these intermediate kinematics, a wide variety of reactions are observed which can be described simultaneously by single particle (quark) scattering, and by exclusive resonance (hadron) scattering. The contributions in this proceedings volume discuss recent and existing results, and aim to foster current and future research, investigating the phenomenon of quark-hadron duality. This unique volume contains research work by scientists from different arenas of hadronic physics, dealing with different manifestations of quark-hadron duality.

### **Market Segmentation**

From the award-winning advertising team, a creative, fresh and brutally honest guide to taking on the working world on your own terms Janet Kestin and Nancy Vonk have built their careers on unconventional creative thinking. As two of the leaders behind Dove's Campaign for Real Beauty, they famously championed stripping away photoshopping, lighting and makeup to sell real beauty. After years of rethinking brands, they decided that they wanted to focus on rethinking the way we work—or, in many cases and places, the way our work doesn't work for us—especially for women. They've tackled the problem in their hallmark style: by turning expectations upside down and shaking them. Soundly. Darling, You Can't Do Both is a smart, relatable guide for all of the women who embraced the spirit of Lean In but were left wondering where to start—how could they, in all industries and at all levels, really begin to change their realities and maybe even their companies, from the ground up? Janet Kestin and Nancy Vonk's answer is that women need to start breaking the largely unspoken rules of business they've always tacitly accepted. Darling will spark a new thread of conversation about women in the workplace—one that's about new strategies for every woman with

ambition who is moving (and looking) forward—with motherhood not a roadblock but an unfair advantage.

Have You Seen Zandile? is a wonderful South African resource, still as fresh and absorbing as when it was first written. Perfectly scripted, and with Gcina Mhlophe's sure instinct for stagecraft, it recounts the very personal story of Zandile, who is

Moving, funny and convincing, full of Zandile's shrewd, youthful insights, the play offers an illuminating window into the 1960s world that it depicts, with its issues of white dominance, rural hardship and black female repression. *Have You Seen Zandile?* is already an established favorite in performance circles, and is fast becoming a South African classic.

A secret worth killing for, a woman with no past, and an act of treason that changed America: #1 bestselling author Brad Meltzer returns with *The House of Secrets*. "When Hazel Nash was six years old, her father taught her: mysteries need to be solved. He should know. Hazel's father is Jack Nash, the host of America's favorite conspiracy TV show, *The House of Secrets*. Even as a child, she loved hearing her dad's tall tales, especially the one about a leather book belonging to Benedict Arnold that was hidden in a corpse. Now, years later, Hazel wakes up in the hospital and remembers nothing, not even her own name. She's told she's been in a car accident that killed her father and injured her brother. But she can't remember any of it, because of her own traumatic brain injury. Then a man from the FBI shows up, asking questions about her dad -- and about his connection to the corpse of a man found with an object stuffed into his chest: a priceless book that belonged to Benedict Arnold. Back at her house, Hazel finds guns that she doesn't remember owning. On her forehead, she sees scars from fights she can't recall. Most important, the more Hazel digs, the less she likes the person she seems to have been. Trying to put together the puzzle pieces of her past and present, Hazel Nash needs to figure out who killed this man -- and how the book wound up in his chest. The answer will tell her the truth about her father, what he was really doing for the government -- and who Hazel really is. Mysteries need to be solved. Especially the ones about yourself."

### **The World in My Pocket**

Modern marketing techniques in industrialized countries cannot be implemented without segmentation of the potential market. Goods are no longer produced and sold without a significant consideration of customer needs combined with a recognition that these needs are heterogeneous. Since first emerging in the late 1950s, the concept of segmentation has been one of the most researched topics in the marketing literature. Segmentation has become a central topic to both the theory and practice of marketing, particularly in the recent development of finite mixture models to better identify market segments. This second edition of *Market Segmentation* updates and extends the integrated examination of segmentation theory and methodology begun in the first edition. A chapter on mixture model analysis of paired comparison data has been added, together with a new chapter on the pros and cons of the mixture model. The book starts with a framework for considering the various bases and methods available for conducting segmentation studies. The second section contains a more detailed discussion of the methodology for market segmentation, from traditional clustering algorithms to more recent developments in finite mixtures and latent class models. Three types of finite mixture models are discussed in this second section: simple mixtures, mixtures of regressions and mixtures of unfolding models. The third main section is devoted to special topics in market segmentation such as joint segmentation, segmentation using tailored interviewing and segmentation with structural equation models. The fourth part covers four major approaches to applied market

segmentation: geo-demographic, lifestyle, response-based, and conjoint analysis. The final concluding section discusses directions for further research.

### **Rethinking the Roots of Modern Science**

Deployments of voice over IP (VoIP) networks continue at a rapid pace. Voice gateways are an essential part of VoIP networks, handling the many tasks involved in translating between transmission formats and protocols and acting as the interface between an IP telephony network and the PSTN or PBX. Gatekeepers and IP-to-IP gateways help these networks scale. Gatekeepers provide call admission control, call routing, address resolution, and bandwidth management between H.323 endpoints including Cisco IOS® voice gateways and Cisco® Unified

CallManager clusters. IP-to-IP gateways allow VoIP calls to traverse disparate IP networks. Cisco Voice Gateways and Gatekeepers provides detailed solutions to real-world problems encountered when implementing a VoIP network. This practical guide helps you understand Cisco gateways and gatekeepers and configure them properly. Gateway selection, design issues, feature configuration, and security and high-availability issues are all covered in depth. The abundant examples, screen shots, configuration snips, and case studies make this a truly practical and useful guide for anyone interested in the proper implementation of gateways and gatekeepers in a VoIP network. Emphasis is placed on the accepted best practices and common issues encountered in real-world deployments. Cisco Voice Gateways and Gatekeepers is divided into four parts. Part I provides an overview of an IP voice network. Part II is dedicated to voice gateways, including discussions of Media Gateway Control Protocol (MGCP); H.323; Session Initiation Protocol (SIP); voice circuit options; connecting to the PSTN, PBX, and IP WAN; dial plans; digit manipulation; route selection; class of restriction; Survivable Remote Site Telephony (SRST) and MGCP fallback; digital signal processor (DSP) resources; and Tool Command Language (Tcl) scripts and Voice XML (VXML). Part III addresses voice gatekeepers, including detailed deployment and configuration. Part IV is dedicated to IP-to-IP gateways.
