The first book in the "outstanding" British police procedural series--the basis for the long-running BBC series featuring the Yorkshire detective duo (The New York Times). Reginald Hill "raised the classical British mystery to new heights" when he introduced pugnacious Yorkshire Det. Inspector Andrew Dalziel and his partner, the callow Sgt. Peter Pascoe (The New York Times Book Review). Their chafing differences in education, manners, technique, and temperament made them "the most remarkable duo in the annals of crime fiction" (Toronto Star). Adapted into a long-running hit show for the BBC, the Gold Dagger Award-winning series is now available as ebooks. Mary Connon froze out her husband, Sam, long ago. She likes the attention of other men--like the fellow members of Sam's rugby club. Naturally, when she's found dead in her sitting room with a hole in her head, Sam is a suspect. If only he hadn't suffered a dizzying scrum injury that's left everything a blur. He isn't sure that he didn't kill her. But Det. Inspector Andrew Dalziel and his partner, Peter Pascoe, are looking outside the unhappy home. Because it seems everyone within spitting distance of the suburban femme fatale--from prying neighbors to spurned lovers to jealous wives--wanted Mary dead. As the field of play expands, so do the motives . . . A

Is that one guy dragging you all down? The control-freak, the narcissist, the slacker, the cynic Difficult people are the worst part of a manager's job. Whether it comes from direct reports or people above, outbursts, irrational demands, griping, and other disruptions need to be dealt with-and it's your responsibility to do it. Leading the Unleadable turns this dreaded chore into a straight forward process that gently, yet effectively, improves behaviors. Written by an insider in the tech industry, where personality issues routinely wreck projects, the book reveals a core truth: most people actually want to contribute results, not cause headaches. Once you realize the potential for change, the book's simple steps, examples, and scripts explain how to right even the most hopeless situations. You'll learn how to:

- * Master the necessary mindset
- * Explain the problem calmly in a short feedback session
- * Get a commitment to change, and follow up
- * Coach others to replicate the process
- * Develop the situational awareness required to spot trouble even earlier in the future

Every manager has "problem people." What sets great managers apart is how they turn them into productive team players. Prepare to transform the troublesome into the tremendous.

Technological development has brought more control, automation and sophistication to every stage of the label and package printing process. While these advances offer vast opportunities, they also add huge levels of complexity to the management of each project. Severe bottlenecks, job delays, quality issues and shrinking profits are common in print companies that fail to apply the right management solution. To fulfil the needs of modern label and package printing production, a large number of management information systems (MIS), specialized and niche software solutions and evolving hardware have been developed. While their positive impact on profitability and competitive advantage is undeniable, many have very specific applications. Choosing which is suitable for your operation is a time-consuming and challenging process and getting it wrong can be a costly mistake. Expert guidance can be found in this book. It is an exploration of MIS and workflow automation systems, aiding the choice and implementing of suitable systems and technologies. Including a detailed appendix of industry suppliers, this book is a valuable and convenient reference source for label and package printers, industry suppliers and many brands. Chapters include: Managing information in the label industry Estimating for label and package printing Order processing and job management Efficient job planning and production scheduling Inventory control - raw materials, warehouse 32 and finished goods Quality control Job costing and shop floor data collection Accounting and financial management Workflow automation - today and tomorrow Choosing an MIS system and finding a

Development Across the Lifespan is to provide a broad and in-depth look at the field of career development as it applies to individuals involved in all areas of community counseling, school counseling, and higher education. The book will examine some of the field's major theories, themes, approaches, and newest models incorporating chapters from national and international career counseling experts. Specific emphasis is spent examining issues reflective of today's challenges in developing and maintaining a workforce that is diverse, flexible, and efficient. Readers will be provided with an action-based framework built on the best available research. This text book is truly the culmination of a decade's work, compiling comprehensive studies from four previous volumes and updating key concepts in career counseling with the most contemporary theories and innovations. We examine three primary domains of career counseling throughout all of the developmental stages of the lifespan: community, schools K-12, and higher education. We include a specific focus on career history and theories, to prepare students for both the counseling environment and for national exams leading to certification and licensure, such as the (NCE) National Counseling Exam. We also include cutting edge research on contemporary topics, including such areas as: military careers, life after the military, individuals with disabilities or special needs, career counseling in our current socio-economic environment, and current technologies such as virtual counseling. In addition, we have added case studies and key terms as study guides at the end of each chapter. We are fortunate to include many recognized experts in the field of career counseling. Career

Emphasizing fundamental mathematical ideas rather than proofs, Introduction to Stochastic Processes, Second Edition provides quick access to important foundations of probability theory applicable to problems in many fields. Assuming that you have a reasonable level of computer literacy, the ability to write simple programs, and the access to software for linear algebra computations, the author approaches the problems and theorems with a focus on stochastic processes evolving with time, rather than a particular emphasis on measure theory. For those lacking in exposure to linear differential and difference equations, the author begins with a brief introduction to these concepts. He proceeds to discuss Markov chains, optimal stopping, martingales, and Brownian motion. The book concludes with a chapter on stochastic integration. The author supplies many basic, general examples and provides exercises at the end of each chapter. New to the Second Edition: Expanded chapter on stochastic integration that introduces modern mathematical finance Introduction of Girsanov transformation and the Feynman-Kac formula Expanded discussion of Itô's formula and the Black-Scholes formula for pricing options New topics such as Doob's maximal inequality and a discussion on self similarity in the chapter on Brownian motion
