Early on the morning of her eleventh birthday, on the beach beside her North Carolina home, Daria Cato receives an unbelievable gift from the sea—an abandoned newborn baby. When the infant's identity cannot be uncovered, she is adopted by Daria's loving family. But her silent secrets continue to haunt Daria. Now, twenty years later, Shelly has grown into an unusual, ethereal young woman whom Daria continues to protect. But when Rory Taylor, a friend from Daria's childhood and now a television producer, returns at Shelly's request to do a story about the circumstances surrounding her birth, something precarious shifts in the small town of Kill Devil Hills. The more questions Rory asks, the more unsettled the tiny community becomes, as closely guarded secrets and the sins of that long-ago summer begin to surface. Piece by piece, the mystery of summer's child is being exposed, a mystery that no one involved—not Shelly, Daria, not even Rory—is prepared to face.

Science Fiction and Fantasy Book Review

"Science Fiction & Fantasy Book Review" was founded in 1979 to provide comprehensive coverage of all the major and minor books being released in the genre at that time. This was the golden era of SF publishing, with a thousand titles (old and new) hitting the stands and the bookshelves each and every year. From the older classics to the newest speculative fiction, this was the period when the best and the brightest shined forth their talents. SF&FBR included reviews by writers in the field, by amateur critics, and by litterateurs and University professors. Over a thousand books were covered during the single year of publication, many of them having been reviewed no where else, before or since. The January 1980 issue includes a comprehensive index of all the works featured during the preceding year. This reprint will be a welcome addition to the literature of science fiction and fantasy criticism. Neil Barron is a retired bibliographer and literary critic, editor of the acclaimed "Anatomy of Wonder" series. Robert Reginald was the publisher for twenty-five years of Borgo Press, and has authored over 110 books of his own."

The Cambridge Handbook of the Law of Algorithms

We have all written TFTC for a found cache, but what actually happened? Did we walk straight to it? Did we maybe walk past it 10 times before actually finding it? Alphonse Daudet (1840-1897) was a French novelist. He was the father of Léon Daudet and Lucien Daudet. Alphonse took to writing, and his poems were collected into a small volume, *Les Amoureuses* (1858). He obtained employment on *Le Figaro*, then under Cartier de Villemessant's energetic editorship, wrote two or three plays, and began to be recognized, among those interested in literature, as possessing distinction and promise. In 1866, Daudet's *Lettres de Mon Moulin*, written in Clamart, near Paris, and alluding to a windmill in Fontvieille, Provence, won the attention of many readers. The first of his longer books, *Le Petit Chose* (1868), did not, however, produce popular sensation. It is, in the main, the story of his own earlier years told with much grace and pathos.

The Sandman Vol. 8: Worlds' End

Algorithms are a fundamental building block of artificial intelligence - and, increasingly, society - but our legal institutions have largely failed to recognize or respond to this reality. The Cambridge Handbook of the Law of Algorithms, which features contributions from US, EU, and Asian legal scholars, discusses the specific challenges algorithms pose not only to current law, but also - as algorithms replace people as decision makers - to the foundations of society itself. The work includes wide coverage of the law as it relates to algorithms, with chapters analyzing how human biases have crept into algorithmic decision-making about who receives housing or credit, the length of sentences for defendants convicted of crimes, and many other decisions that impact constitutionally protected groups. Other issues covered in the work include the impact of algorithms on the law of free speech, intellectual property, and commercial and human rights law.

Two men named Merrick Delmar, separated by more than one thousand years. One was the very first King of Isola di Squalo, and the other will be the next. Their lives are so different, yet they are very much the same. Each struggles with the position of authority into which he has been thrust. Neither feels qualified, and neither knows where to go for help. What does it take to be a good King? Can one man do it alone? Through struggle and storm, each will make a journey of self-discovery to assess whether he truly can rule, involuntarily or not. Sometimes, the calm in the eye of the storm must come from within.

Natural Visions

This book was previously published under the title 'Alithia' A fast paced, UK based, Political Thriller that pits the residents of a rundown, British housing estate 'Riverside' against the full might of the British

Government and its security forces. The Chinese Government, the CIA, and the secret world of Freemasonry, all conspire against what the British Prime Minister sees as the undeserving poor; the lazy workshy underclass, or simply as subversive terrorists. The story is set in the near future, a time when the United Kingdom has left the European Union and war has devastated the Middle East. Poverty has led to anarchy and an increasingly divided society. Since the secession from the EU, successive governments have wrestled with the UK's isolated and crumbling economy leading them to introduce increasingly draconian policies, and to make economic and political alliances with unlikely bedfellows. The people of Riverside have experienced firsthand the effects of austerity, and have watched as the worldwide movements for progressive change, from the Anonymous face mask wearers to the Occupy movements in Wall St and London, have been crushed with the free internet being shut down under the heel of the globalised 'Free Market' elites all under the banner of the so called, 'war against terror'. Now, it comes time for the Residents of the estate themselves to directly face the forces of oppression, and, as they do so, come face to face with the ultimate choice.

Walden Pond. The Grand Canyon. Yosemite National Park. Throughout the twentieth century, photographers and filmmakers created unforgettable images of these and other American natural treasures. Many of these images, including the work of Ansel Adams, continue to occupy a prominent place in the American imagination. Making these representations, though, was more than a purely aesthetic project. In fact, portraying majestic scenes and threatened places galvanized concern for the environment and its protection. *Natural Visions* documents through images the history of environmental reform from the Progressive era to the first Earth Day celebration in 1970, showing the crucial role the camera played in the development of the conservation movement. In *Natural Visions*, Finis Dunaway tells the story of how visual imagery—such as wilderness photographs, New Deal documentary films, and Sierra Club coffee-table books—shaped modern perceptions of the natural world. By examining the relationship between the camera and environmental politics through detailed studies of key artists and activists, Dunaway captures the emotional

and spiritual meaning that became associated with the American landscape. Throughout the book, he reveals how photographers and filmmakers adapted longstanding traditions in American culture—the Puritan jeremiad, the romantic sublime, and the frontier myth—to literally picture nature as a place of grace for the individual and the nation. Beautifully illustrated with photographs by Ansel Adams, Eliot Porter, and a host of other artists, *Natural Visions* will appeal to a wide range of readers interested in American cultural history, the visual arts, and environmentalism.

And it is of this Lucanus that Taylor Caldwell tells here in one of the most stirring stories ever lived or written.
