Information on the educational system of Malaysia and guidelines on the placement of Malaysian students in U.S. high schools and colleges are presented. After a brief introduction on the country and the educational system, attention is directed to preschool, primary, and secondary education. Included are reproductions of certificates of completions and grade reports from different schools, along with information on grading systems. Information is also provided on: pre-university education (higher school, university matriculation programs, and diploma programs); teacher training, including continuing education for school personnel, university education; other tertiary-level education; and nursing, occupational and physical therapy and other allied health programs. Profiles of national universities, polytechnics, and other institutions are included, as are reproductions of sample diplomas and related documents. Guidelines are provided to help admissions officers determine the admissibility and appropriate level of placement of Malaysian students in U.S. institutions. Appended are a glossary and list of acronyms, information on examination subjects for the country's college entrance tests, and

Publications Listing

Prentice Hall Physical Science: Concepts in Action helps students make the important connection between the science they read and what they experience every day. Relevant content, lively explorations, and a wealth of hands-on activities take students' understanding of science beyond the page and into the world around them. Now includes even more technology, tools and activities to support differentiated instruction!

An Introduction to Physical Science

The purpose of this book is to provide an introduction to the concepts of statistical analysis of data for students at the undergraduate and graduate level, and to provide tools for data reduction and error analysis commonly required in the physical sciences. The presentation is developed from a practical point of view, including enough derivation to justify the results, but emphasizing methods of handling data more than theory. The text provides a variety of numerical and graphical techniques. Computer programs that support these techniques will be available on an accompanying website in both Fortran and C++.

The Andhra Pradesh Gazette

Singapore National Bibliography

Over 220,000 entries representing some 56,000 Library of Congress subject headings. Covers all disciplines of science and technology, e.g., engineering, agriculture, and domestic arts. Also contains at least 5000 titles published before 1876. Has many applications in libraries, information centers, and other organizations concerned with scientific and technological literature. Subject index contains main listing of entries. Each entry gives cataloging as prepared by the Library of Congress. Author/title indexes.

Fort Saint George Gazette

Canadian Books in Print

The author lays out the patterns of subject specialization within chemistry and physics in non-technical language, emphasizing the often colourful people and events that influenced the founding of new areas of research and their journals.

This is the latest updated edition of the University of Cambridge's official statutes and Ordinances.

Today's Education

When John Behrendt went to Antarctica in the early 1960s as part of the United States Antarctic Research Program (USARP), the Cold War was at its height and research on the ice sheet was risky. The Antarctic air squadron VX6 had an accident rate eight times that of U.S. Naval aviation in other parts of the world, and graduate students and young scientists like Behrendt received hazard pay for their work. In John Behrendt's memoir we relive that era of scientific exploration. He describes two seasons on the ice in Operation Deep Freeze, leading field parties, conducting scientific research, and struggling against the elements.

Behrendt led an over-snow geophysical-glaciological-geologic-geographic exploration party to the southern Antarctic Peninsula and to a mountain range that was eventually named for him in recognition of his work. Behrendt pioneered in aerogeophysical surveys over the Transantarctic Mountains and the West Antarctic Ice Sheet. In his reflections of the period from 1960 to 1962, he notes that time was closer to the eras of Ernest Shackleton (Endurance Voyage, 1914) and Robert F. Scott's and Roald Amundsen's treks to the
