ELEMENTS OF CIVIL ENGINEERING - 4TH EDITION

The past three decades has seen dramatic changes in the way in which the criminal justice system responds to those who break the law. The old claim in the field of correctional psychology that "nothing works" has strongly been refuted in the face of evidence from rehabilitation programmes that do make a difference. The graduate student in forensic psychology could easily be overwhelmed by the plethora of information now available. This new textbook offers a comprehensive approach to forensic and correctional psychology, demonstrating how theory and practise can be applied and integrated. Written by intentionally recognized experts within the field, the authors guide the students through the core theories and concepts that underpin forensic practise within the legal systems of different countries (UK, USA, Canada, Australia and Singapore), show how this knowledge informs current thinking in offender rehabilitation and reintegration and provide a series of case studies looking at sexual offenders, female offender, juveniles and offenders with mental disorders. This book is the perfect overview for graduate students of forensic and correctional psychology engaged with offender rehabilitation and assessment and the psychology of law.

OS X Mavericks: The Missing Manual

Morality is often defined in opposition to the natural "instincts," or as a tool to keep those instincts in check. New findings in neuroscience, social psychology, animal behavior, and anthropology have brought us back to the original Darwinian position that moral behavior is continuous with the social behavior of animals, and most likely evolved to enhance the cooperativeness of society. In this view, morality is part of human nature rather than its opposite. This interdisciplinary volume debates the origin and working of human morality within the context of science as well as religion and philosophy.

Not taking the time to hire the best employees undermines an organization's performance and opens the door for competitors to recruit the outstanding performers who were overlooked. Managers and recruiters are engaged in a "quest for talent"—a search for the right person with the right skills and temperament for a specific position with a specific organization at a specific point in time. Zero Defect Hiring presents a systematic, reproducible, and proven methodology for hiring. This short and to-the-point book guides managers through all the necessary steps to successfully hiring the "right" person, including: planning, profiling, advertising, assessing resumes, interviewing, legal and ethical guidelines for hiring, selling the company to the candidate and the candidate to the company, references, red flags to watch for, and much more. Walter Dinteman is president and owner of MRI/Sales Consultants of Asheville, a franchise of Management Recruiters International. He has more than thirty years' experience in teaching, management, and hiring.

In his grade school days, Ben Carson would hardly have been voted “most likely to become a famous surgeon.” His classmates had already given him another label: class dummy. Then a light clicked on for Ben—and a consuming passion for learning that catapulted him from “zero” test grades to a Yale scholarship, a pioneering role in modern medicine, and an influence that has extended from inner-city schools to corporate boardrooms and Washington corridors of power. What made the difference? Belief in his own potential, a commitment to education and making the most of his opportunities to learn, determination to make the world a better place, and faith in a God who knows no limits. Seeing the Big Picture. In *The Big Picture*, Ben Carson reveals the spiritual and philosophical foundations that undergird not just his dramatic career, but his approach to all of life. As in his best-selling *Gifted Hands* Dr. Carson shares colorful behind-the-scenes anecdotes. As in *Think Big*, he describes his practical principles for success. But *The Big Picture* is more than an autobiography or a personal-effectiveness manual. Rather, it's a multifaceted look at the faith and vision that can see us all through hardship and failure, and stir us to bold exploits on behalf of something greater than ourselves. Dr. Carson begins by describing how he cultivated a Big-Picture perspective in his own life. Then he discusses ways to which all of us can approach parenting, family, business and friendships with the Big Picture in mind. Finally he looks at some pressing social issues—in particular, racial diversity, health care, and education—and considers how we ought to view them and what we should do about them in light of the Big Picture. Drawing on a vast array of experiences in roles ranging from trailblazing surgeon to public speaker, to husband and family man, Ben Carson shows how we can turn the course of our lives, our communities, our country, and our world by keeping the Big Picture always in mind.

Jim O'Neill, one of the most influential economists today, shares his insights on how and why he developed one of the most compelling economic concepts of our time in *The Growth Map*. 'O'Neill has redefined how investors and Western business leaders see the world. This book tells the unlikely story of how O'Neill developed this path-breaking idea . . . lively, powerful and highly accessible' Gillian Tett, *Financial Times* Ten years ago, Jim O'Neill predicted that globalization would help Brazil, Russia, India and China (the BRICs) - busy, ambitious countries full of raw materials - overtake the largest Western economies. With all four BRIC nations set to do just that, no other idea has proved as significant for the new century. But these changes have provoked business and political uncertainty and in *The Growth Map* O'Neill examines what is coming next. Can the BRICs sustain their exceptional growth? Which nations will come next? And what, for all of us, does the future hold? 'Goldman Sachs' rock star' Business Week 'Sharp, shrewd. Tells the big story of our time. The fundamental shift of economic power from the West' Niall Ferguson 'O'Neill has changed how the world thinks about economic growth - and how the BRICs think about themselves' Lloyd Blankfein, Chairman And Ceo, Goldman Sachs 'One of the most sought-after economic commentators on the planet' Daily Telegraph Jim O'Neill is Chairman of Goldman Sachs Asset Management. He joined Goldman Sachs in 1995, rising to chief economist, and in 2001 he led the team that conducted the original BRIC analysis. He is chairman of the charity SHINE, and a member of the boards of the UK Royal Economic Society, Itinera and Bruegel. He has a lifelong passion for Manchester United FC, and has

served as a non-executive director of the club's board.

Bedrock

Silicon technology now allows us to build chips consisting of tens of millions of transistors. This technology not only promises new levels of system integration onto a single chip, but also presents significant challenges to the chip designer. As a result, many ASIC developers and silicon vendors are re-examining their design methodologies, searching for ways to make effective use of the huge numbers of gates now available. These designers see current design tools and methodologies as inadequate for developing million-gate ASICs from scratch. There is considerable pressure to keep design team size and design schedules constant even as design complexities grow. Tools are not providing the productivity gains required to keep pace with the increasing gate counts available from deep submicron technology. Design reuse - the use of pre-designed and pre-verified cores - is the most promising opportunity to bridge the gap between available gate-count and designer productivity. Reuse Methodology Manual for System-On-A-Chip Designs, Second Edition outlines an effective methodology for creating reusable designs for use in a System-on-a-Chip (SoC) design methodology. Silicon and tool technologies move so quickly that no single methodology can provide a permanent solution to this highly dynamic problem. Instead, this manual is an attempt to capture and incrementally improve on current best practices in the industry, and to give a coherent, integrated view of the design process. Reuse Methodology Manual for System-On-A-Chip Designs, Second Edition will be updated on a regular basis as a result of changing technology and improved insight into the problems of design reuse and its role in producing high-quality SoC designs.

Scooby-Doo and the Pizza Prowler

Making Peace with God and Money This is not a book about how to make money or spend it or give it away. Rather, it's a book for anyone who has ever worried about money -- about having enough -- and it begins with a startling assumption: No amount of money will ever lift your anxiety. This may seem counterintuitive, but in Gregory Jeffrey we have an experienced guide. With degrees in business and theology, he has worked as a development consultant for two decades. In meeting with thousands of individuals to ask their support for various causes, he discovered -- to his amazement -- that some people with millions worried constantly about money; others, of very modest means, seemed immune. Apparently, making peace with money entails something other than money. This insight led Jeffrey to question every fundamental assumption we hold about wealth. With warmth, humor, and a writing style as simple as the Dakota prairie he grew up on, he offers a unique perspective on the interplay between our spiritual and financial lives. Rich with images, stories, and compassion for the millions now burdened with financial worries, Jeffrey teases out what is required of the soul who wishes to be free of anxiety. "Practical and timely, this book will challenge you to grow in wisdom, trust, frugality, and generosity." -- Scott Hahn, best-selling author, speaker, and Scripture scholar "In striving for holiness, conversion is needed in all parts of our lives. Jeffrey goes to that place rarely examined: the intersection where wealth and God meet, and often come into conflict. As a remedy and balm, he shares with visual examples and heartwarming stories a sobering insight: to be at peace with money, you must first be at peace with God." -- The Most Reverend Samuel J. Aquila, Bishop of Fargo
