Strategic Dynamics: Concepts and Cases, by Burgelman, Grove, and Meza offers unique and valuable insight into strategy making for companies in information technology-driven industries. It is the product of over twelve years of teaching and research based on a unique combination of academic (Stanford's Robert Burgelman) and industry (Intel's

Andy Grove) experience. The key themes and conceptual frameworks discussed in this book, along with its case studies and industry notes, provide instructors and students with a more complete viewpoint on the dynamic interactions of companies within industries and between industries than is typically found in books on strategy and technology strategy.

Do you lose things? Do you interrupt people? Are you forgetful? While everyone experiences these problems occasionally, people with attention deficit disorder (ADD) experience these problems and more on a daily basis. This book is for people who have recently been diagnosed with ADD or suspect they may have ADD. However, even if you have known for quite some time that you have ADD, this book can still provide some solutions for some common frustrations. While this book does not go into great detail about the disorder, I will provide additional resources at the end of each chapter.

The Pocket Mentor series offers immediate solutions to the challenges managers face on the job every day. Each book in the series is packed with handy tools, self-tests, and real-life examples to help you identify strengths and weaknesses and hone critical skills. Whether you're at your desk, in a meeting, or on the road, these portable guides enable you to tackle the daily demands of your work with greater speed, savvy, and effectiveness. Ideas are not enough: successful innovation requires people to pick up where the creative process leaves off. These people must take the creative idea and apply it to a real-life problem to design a new product, service, or process. They must construct a carefully articulated vision for the project, draw up a feasible financial plan, and advocate the project over the whole course of its development and implementation. This book teaches you how to execute an innovation from start to finish: - Develop a vision statement that stands up

touch before bed? Do you frequently pick it up “just to check,” only to look up forty-five minutes later wondering where the time has gone? Do you say you want to spend less time on your phone—but have no idea how to do so without giving it up completely? If so, this book is your solution. Award-winning journalist Catherine Price presents a practical, hands-on plan to break up—and then make up—with your phone. The goal? A long-term relationship that actually feels good. You’ll discover how phones and apps are designed to be addictive, and learn how the time we spend on them damages our abilities to focus, think deeply, and form new memories. You’ll then make customized changes to your settings, apps, environment, and mindset that will ultimately enable you to take back control of your life.
