Jim Tolpin's Table Saw Magic

Following the recent unveiling of the monument to Bomber Command in London's Green Park, the publication of this lovingly crafted account of the exploits of oft-overlooked 1 Group is set to be a timely one. Patrick Otter combines an appropriate level of detail regarding operations, aircraft, bases and incidents, with accounts of human endurance and squadron fraternity, which works to create a thoroughly well researched account of the wartime proceedings of 1 Group which is rooted firmly in humanity. The book is heavily illustrated throughout with both images of aircraft and pilot profiles, supplementing the text perfectly and working further to humanize the accounts which the author relays, as well as satisfying the Aviation buffs curiosity for new and interesting images of aircraft in their wartime contexts. Although often considered a somewhat controversial operational unit, the bravery of the men who made up Bomber Command has never been in question. This book is further testament to that fact.

Rushford and Rushford People

This book examines how Alexandria's origins and the mosaic of its life was influenced, and at times governed, by its relationship to the Potomac River, the Chesapeake Bay, and the great world beyond. This work is the result of research conducted to assess the potential submerged historic resource base--historic shipwrecks, harbor facilities, and other culturally relevant archaeological features--lying within and adjacent to the waters of the Alexandria waterfront, and buried beneath lands reclaimed from the river during earlier times. The dynamic waterfront development and the evolution of the seafaring industry of this once major maritime entrepôt are presented in a holistic manner, complete with numerous illustrations, maps, and tables.

An Account of the English Colony in New South Wales

Offers practical advice on working with drill presses, metal lathes, and special jigs, and includes solutions to common problems

Biscuit Joiner Basics

This book examines the nature of human language and the ideology of linguistic legitimacy – the common set of beliefs about language differences that leads to the rejection of some language varieties and the valorization of others. It investigates a broad range of case studies of languages and dialects which have for various reasons been considered 'low-status' including: African American English, Spanglish, American Sign Language, Yiddish, Esperanto and other constructed languages, indigenous languages in post-colonial neo-European societies, and Afrikaans and related language issues in South Africa. Further, it discusses the implications of the ideology of linguistic legitimacy for the teaching and learning of foreign languages in the US. Written in a clear and accessible style, this book provides a readable and pedagogically useful tool to help readers comprehend the nature of human language, and the ways in which attitudes about human language can have either positive or negative consequences for communities and their languages. It will be of particular interest to language teachers and teacher educators, as well as students and scholars of applied linguistics, intercultural communication, minority languages and language extinction.

So much has been written and said on the subject of prayer, but very few people have personal testimonies of answers received after praying. Pastor Victor M. Mebele outlined the secret of answered prayers with personal testimonies and personal encounters in the secret place of prayer. He also shared his experience in warfare prayer against a powerful witch doctor that kept his family in bondage for years, his victory over the powers of darkness and why it was possible to overcome. Pastor Victor Mebele believes that prayer is the key to the store house of Heaven as Jesus stated in Matthew 16:18-19, but you must know how to use the right key into your heavenly store house. There are many keys in a home but each key has a specific door to open. That is what The Secret of Answered Prayers is all about.

The Workshop Book

This book is presented to those, both young and old, who wish to have a non-technical account of the history, evolution and production of some of the every-day wonders of the modern industrial age; coupled with occasional glimpses of the wonderful object-lessons afforded by nature in her constructive activities in the animal, vegetable and mineral kingdoms; and simple, understandable answers to the myriad puzzling questions arising daily in the minds of those for whom the fascination of the "Why" and "How" is always engrossing.
