Simplifying Your Life

Since its first volume in 1960, Advances in Computers has presented detailed coverage of innovations in computer hardware, software, theory, design, and applications. It has also provided contributors with a medium in which they can explore their subjects in greater depth and breadth than journal articles usually allow. As a result, many articles have become standard references that continue to be of sugnificant, lasting value in this rapidly expanding field. In-depth surveys and

tutorials on new computer technology Well-known authors and researchers in the field Extensive bibliographies with most chapters Many of the volumes are devoted to single themes or subfields of computer science

This book will reveal cost reductions and how to slash your energy costs without investing big money. The three pillars of costs reduction will discussed: Assembling your options and analyzing your risk; developing options with your utility; and cutting out obvious waste in your operation. Those who will benefit from this excellent text are business owners, CFOs, plant managers, plant engineers, and energy managers. You will learn how to distill what savings are possible and how you can quickly accomplish those savings from what you already know and can expect to walk away at the end of this book with confidence and a realistic plan of action for reducing your costs.

Real Estate Financing features a CD-ROM containing over 40 deal-specific forms and checklists, covering everything from complex loan workouts to simple residential closings. The forms on CD-ROM include information about each term and how it can be modified, with separate variations for lenders, borrowers or other parties. A "Data Input Sheet" lets you use the forms with widely available software and can serve as a "term sheet" for the transaction. The accompanying

volume provides explanations of the issues along with the guidance you need to draft working documents quickly. Real Estate Financing includes: checklists for loan modifications; wraparound mortgage loans; subordinations; loans secured by condos, co-ops and time shares; sale-leasebacks; contingent interests; securitizations; deeds in lieu and consensual foreclosures; participations; installment sales; sales of mortgage loans; and much more. The checklists highlight "deal" terms, flag risks and hot issues, and direct users, through cross-references, to alternative approaches and analysis. Standards issued by ratings agencies for securitized loans are discussed in detail, as are the EPA and ASTM standards for Phase I environmental reports and the best Web sites for forms and drafting requirements.

This book aims to construct a theory of rational decision making for real, resource-bounded, agents. Such decision making must be based on objective probabilities rather than subjective probabilities, and cannot be done by choosing single actions with maximal expected values. Actions must be chosen as parts of plans, and plans must be evaluated in the context of other plans.
