The Effect of Education and Media Coverage on Public Opinion of the Supreme Court and Congress

In Classroom Conversations, two generations of educators—a mother and daughter—point us to the great thinkers who have shaped their beliefs and practices in education, and who continue to influence teachers today. Nineteen essays by educators from Dewey to Delpit offer parents and new educators an education degree in a nutshell. The Miletas frame these touchstone texts with commentary explaining why these writers resonate for them, sharing not only the personal meanings they have derived from the selections but why these writings have endured in the field over time. Brief biographies set each author in context for the lay reader. As educational fads and jargon come and go, parents and teachers alike will appreciate and find value in the wisdom distilled here. Classroom Conversations will help experienced teachers find renewed meaning in these seminal essays and will help younger teachers discover just how important the work they do can be. For parents, the book will inform and enrich their understanding of their children's educational experience.

Political Keywords presents an overview of how American political communication has been changed by the use of certain dominant political terms. The book therefore offers something new, based as it is on eleven separate studies of the political language used in the United States during the last half-century. The studies on which our findings are based derive from several language databases assembled at the University of Texas during the past decade. By marrying social science rigour with subtle forms of cultural interpretation, Political Keywords offers a fresh understanding of American language. The result is a book with vision and breadth, one suited to readers from a wide variety of backgrounds.

Using a new model focused on four core capacities—intellectual complexity, social location, empathetic accountability, and motivated action—Teaching Civic Engagement explores the significance of religious studies in fostering a vibrant, just, and democratic civic order. In the first section of the book, contributors detail this theoretical model and offer an initial application to the sources and methods that already define much teaching in the disciplines of religious studies and theology. A second section offers chapters focused on specific strategies for teaching civic engagement in religion classrooms, including traditional textual studies, reflective writing, community-based learning, field trips, media analysis, ethnographic methods, direct community engagement and a reflective practice of -ascetic withdrawal.- The final section of the volume explores theoretical issues, including the delimitation of the -civic- as a category, connections between local and global in the civic project, the question of political advocacy in the classroom, and the role of normative commitments. Collectively these chapters illustrate the real possibility of connecting the scholarly study of religion with the societies in which we, our students, and our institutions exist. The contributing authors model new ways of engaging questions of civic belonging and social activism in the religion classroom, belying the stereotype of the ivory tower intellectual.

Thoroughly revised and updated, the second edition of Appreciative Inquiry offers OD and HR professionals a user-friendly resource for discovering how they can tap into the power of the Appreciative Inquiry (AI) process. An innovative process, AI is an effective way to work with a company as an organic system whose success depends on a holistic approach to connect that organization's human, technical, and organizational functions. This new edition meets the challenge of making the AI process accessible and updates three key areas of the process: the theoretical basis, fundamental assumptions and beliefs, and the basic processes. It includes step-by-step guidelines on how to apply AI in a variety of organizational situations and shows how it can be used with a wide range of initiatives, such as coaching, leadership development, strategic planning, and team building. "If there's one book to read on AI, this is it. It provides the context and rationale for this paradigm-changing approach to change at any level of system. Buy it, read it, use it and enjoy achieving great results and renewed energy and enthusiasm." —Barbara Sloan, director, Organizational Development and Learning, New York University, Langone Medical Center "Appreciative Inquiry brings the freedom and creativity of AI together with the 'nuts and bolts' of how to actually do it

all. It contains everything I would want to have as a fresh practitioner, from potential designs to sample questions and excellent Case Stories." —David Shaked, founder and CEO, Almond Insight, United Kingdom "This book serves as a complete roadmap for those interested in the philosophy and practice of Appreciative Inquiry. The Case Stories encourage readers to find their own way on the journey by providing examples of successful interventions." —Terry Egan, professor, Management Studies, Pepperdine University

Abstract: In survey after survey Americans have been found to approve of the United States Supreme Court more than they

approve of the United States Congress. This trend persists despite the fact that Congress is an elected body, giving the people more control over it, and the Supreme Court consists of nine justices appointed to their positions for life terms. In this study I examine two factors which explain part of the reason for this difference in public opinion-educational experiences and media coverage. Civics classes are an important source of political information for Americans and help form the basis of many political opinions. I hypothesize that differences in how Congress and the Supreme Court are typically portrayed in these classes contribute to the public opinion trend. Furthermore, I hypothesize that news media cover the Supreme Court and Congress in different ways which also contribute to how the public views the two political institutions. The results from this research find that the media does indeed cover the two branches of government differently by being more negative toward the Congress than the Supreme Court. In an experiment that tested the ability of news stories to change public opinion toward the two institutions, however, results were mixed. Analysis of survey data indicated that both the level and amount of civics education a person takes in their lifetime has an impact on approval levels.
