Convicted

Tilly Maxwell is a freelance photographer in New York City who happens to take the right photo at the wrong time. While on a shoot, she captures in the background of one of her pictures a man who's just committed a murder. A man whose perfect crime has now been foiled because of chance. Because of one ill-timed click of the camera, a photographer must be silenced, and Tilly's now on the run for her life. John Osby, Oz, an ex Army Ranger who is now one of CEP's best, is shocked to see Tilly when she calls on the agency needing help. Talk about a blast from the past. They'd attended high school together and he remembers her as the quiet, adorably awkward and somewhat nerdy photographer he'd had a crush on, but because their lives were so different, he didn't dare cross the line with her, except for one drunken kiss. But now they're older, she's blossomed into a real beauty and he intends on crossing any line he can to protect her... and have her as his own. A woman who adamantly guards her heart encounters the one man who may be able to break down her barriers. When the past collides with the present, boundaries will be pushed and unbreakable hearts will be tested to the limit.

This book is about electric energy: its generation, its transmission from the point of generation to where it is required, and

its transformation into required forms. To achieve this end, a number of devices are essential—such as generators, transmission lines, transformers, and electric motors. We discuss the design, construction, and operating characteristics of the electric devices used in the transformation to and from electric energy. This text is designed to be used in a one-semester course in electric energy conversion at the second-year level of the Bachelor of Engineering course. It is assumed that the student is familiar with the laws of thermodynamics and has taken a course in basic circuit analysis, including the application of phasors. We begin with a discussion of how humankind has successfully harnessed the energy of wind, water, the sun, biomass, animals, geothermal sources, fossils, and nuclear fission to make its life comfortable. Some of the consequences of this activity on the environment are examined. In Chapter 2, we review the basic physics of energy and its conversion. This may be, to some extent, a repetition of knowledge gained in high-school and first year university courses. However, we believe that such review is necessary to establish a suitable base from which to launch the subject of electric energy conversion.

Twelve Years a Slave

Nolan Lennox had things figured out. Named after a baseball legend, she enjoyed being the Tomboy, her closet filled with her brother's hand-me-downs, cut-off jeans and soccer shorts. But when her first trip to high school results in a broken heart from the first boy to ever make her heart flutter and cruel words from an older girl she once thought a family friend, Nolan starts to question the very person she thought she was and wonders if her humble upbringing can compete with the afforded luxuries of her privileged peers. Throughout the next four years, Nolan struggles to maintain herself throughout her path of discovery, learning just how cruel teenagers can be through the pressures of underage drinking, sexuality and class. And despite how life seems to continue to work against her, she still manages to listen to her heart, falling deeper and deeper for the guy the entire town adores, even if he only sees her as a friend. Can Nolan strike a compromise between her own integrity and the boy she loves? And can she make him notice her before it's too late? Reed Johnson came to Coolidge High School with a lot of fanfare. The son of a hometown football legend and the brother of a local football hero, Reed wore all the pressures of carrying a town without hope into the spotlight. Thankfully, he had the talent to back it up. But when he meets a girl who makes him think twice about exactly what being a hero means, he starts to wonder if following in his brother's footsteps might be all wrong. Nolan Lennox was everything that was opposite of expected. She didn't flirt, she didn't drink and she didn't sleep around. Nothing about her was easy, but something about her made Reed want to try harder. Though she didn't look the part, she seemed to be spending a lot of time in Reed's thoughts, and he wondered if she could be the one who made it all worthwhile. But could Reed handle letting her down? And would breaking her heart break him beyond repair? *Waiting on the Sidelines* explores young love to its fullest, exposing how real young heartbreak and passion is and how important it is to discover yourself and hold onto your own identity. The story follows two young characters as they deal with mature situations, including the prevalence of bullying and promiscuity in today's

high school setting. Ultimately, *Waiting on the Sidelines* is a story of hope, honesty and those powerful, first true loves—the ones worth holding onto at any cost.

This volume includes the full proceedings from the 2016 Academy of Marketing Science (AMS) Annual Conference held in Orlando, Florida, entitled Creating Marketing Magic and Innovative Future Marketing Trends. The marketing environment continues to be dynamic. As a result, researchers need to adapt to the ever-changing scene. Several macro-level factors continue to play influential roles in changing consumer lifestyles and business practices. Key factors among these include the increasing use of technology and automation, while juxtaposed by nostalgia and “back to the roots” marketing trends. At the same time, though, as marketing scholars, we are able to access emerging technology with greater ease, to undertake more rigorous research practices. The papers presented in this volume aim to address these issues by providing the most current research from various areas of marketing research, such as consumer behavior, marketing strategy, marketing theory, services marketing, advertising, branding, and many more. Discovering Us

Ryker Powers was the biggest prick I'd ever met. He was also my biggest mistake. He'd taken what he wanted then left, and

I detested him for it. Not that the jerk had cared to stick around long enough to know how I felt. Everyone thought he was a perfect gentleman with all his quiet intensity but I knew better. I knew he had a filthy mouth. That he liked things dirty. He may have had people fooled into thinking he was a nice guy but I knew exactly who he was. He was a bad boy who'd ask for a light from the devil himself. And I wanted to see him burn. Until I realized—to my utter horror—that what I really wanted was him. Who was going to get burned now?

His cocky attitude had me immediately putting him on ignore, but Never Not EVER list be damned, those mischievous hazel eyes that gleamed with his every dirty thought, along with that body of his-holy smokes, that body-suddenly had me agreeing to go on exactly one date with him. Oh. And the lawsuit he's threatened me with also might've helped persuade me. I'm known as The Big F*%\$ing Deal. Just ask the fans. My job is to throw touchdown passes that win games, and I get paid millions to do it. Not only was I named the AP "Player of the Year" for two years running, most recently, Petra Hyatt, Hollywood gossip blogger, anointed me with the same title, she just wasn't referring to football. Yeah, yeah. I know I sound like an a\$\$hole, but, ladies, come on. Can I help it if I'm hot, charming and well-hung? In all honesty, I'm really a pretty nice guy once you get to know me. But Rori Flannigan-possible girl of my dreams-doesn't want to get to know me. Matter of fact, she couldn't care less that she screwed with my love life and made me look like an idiot. So I'm going to make her care. And once she sees what a great catch I am, she'll beg me to drop the pending lawsuit make her mine. Because who wouldn't want to be with me? I'm The BFD

Based on Francesca Happé's best-selling textbook, *Autism: An Introduction to Psychological Theory*, this completely new edition provides a concise overview of contemporary psychological theories about autism. Fletcher-Watson and Happé explore the relationship between theories of autism at psychological (cognitive), biological and behavioural levels, and consider their clinical and educational impact. The authors summarise what is known about the biology and behavioural features of autism, and provide concise but comprehensive accounts of all influential psychological models including 'Theory of Mind' (ToM) models, early social development models and alternative information processing models such as 'weak central coherence' theory. The book also discusses more recent attempts to understand autism, including the 'Double Empathy Problem' and Bayesian theories. In each case, the authors describe the theory, review the evidence and provide critical analysis of its value and impact. Recognising the multiplicity of theoretical views, and rapidly changing nature of autism research, each chapter considers current debates and major questions that remain for the future. Importantly, the book includes the voices of autistic people, including parents and practitioners, who were asked to provide commentaries on each chapter, helping to contextualise theory and research evidence with accounts of real-life experience. The book embraces neurodiversity whilst recognising the real needs of autistic people and their families. Thus *Autism: A New Introduction to Psychological Theory and Current Debate* provides the reader with a critical overview of psychological theory but also embeds this within community perspectives, making it a relevant and progressive contribution to understanding autism, and essential reading for students and practitioners across educational, clinical and social settings.

A morbidly fascinating and articulate collection of essays, this book explores the grim underside of America's cult of the automobile and the disturbing, frequently conspiratorial, speculations that arise whenever the car becomes the cause or the site of human death. Through analysis of fatal celebrity car accidents and other examples of death by automobile, as well as through personal memoir and forensic reports, cultural critics ponder our very human fascination with the car crash. Topics include the roles and experiences of passengers and bystanders, car crash conspiracy theories, the automobile as a site of murder, studies of car crash cinema, and psychological interpretations of the notion of the 'accident.' The book features original essays by such underground icons as Kenneth Anger and Adam Parfrey.

Going Long

Scars are tattoos with better stories A scarred, lonely woman A curious little boy One uninvited, tattooed guest A nasty blizzard One cabin Two guns A set of handcuffs What could possibly go wrong? Mela McKinley fled with her infant son and disappeared four years ago trying to heal the awful scars inside and out. Taking refuge in the mountains of Colorado, not one person had come near their secluded doorstep though she was prepared for a fight. In the middle of a historic blizzard, little Beck points out the window to a figure approaching in the snow. After hiding Beck and fully armed, Mela confronts Jackson Winslow and has zero reservations about shooting him, if necessary. Ultimately, saving him from the forces of nature, she takes the uninvited stranger prisoner in her home holding the upper hand. While cautiously tending to him, she realizes how much she has missed a man-though this scarred and tattooed man is not who he seems. Once he has invaded her thoughts in a delicious way, her guard is down and suddenly, the tables are turned and now it's his turn. What she doesn't know is who he really is and what he brings to her doorstep.
