The Algebra Teacher's Guide to Reteaching Essential Concepts and Skills

Comprehensive content coverage provides flexible course outlines. Our comprehensive table of contents allows teachers to easily include trigonometry, statistics, or precalculus readiness in the Algebra 2 course along with more traditional topics. Content accessible to all. Abundant exercises graded by difficulty allow teachers to meet the needs of an increasingly wide range of Algebra 2 students. Algebra 1 reviewed. Key Algebra 1 concepts and skills are reviewed in Chapter 1 so that all students can be successful moving on to more advanced content. Throughout the text, key skills are reviewed and reinforced where needed.

Math in Focus

Contains a wide variety of blackline masters organized by lesson, included are support materials for teachers as well as practice activities, applications, and assessment resources.

High School Math Common-Core Geometry Practice/Problem Solving Workbook Grade 9/10

Easy to apply lessons for reteaching difficult algebra concepts. Many students have trouble grasping algebra. In this book, bestselling authors Judith, Gary, and Erin Muschla offer help for math teachers who must instruct their students (even those who are struggling) about the complexities of algebra. In simple terms, the authors outline 150 classroom-tested lessons, focused on those concepts often most difficult to understand, in terms that are designed to help all students unravel the mysteries of algebra. Also included are reproducible worksheets that will assist teachers in reviewing and reinforcing algebra concepts and key skills. Filled with classroom-ready algebra lessons designed for students at all levels. The 150 mini-lessons can be tailored to a whole class, small groups, or individual students who are having trouble. This practical, hands-on resource will help ensure that students really get the algebra they are learning.

Geometry Designed for Understanding Jacobs' Geometry utilizes a clear, conversational, engaging approach to teach your student the concepts, principles, and application of Geometry through practical, real-life application! Harold Jacobs guides your student through Geometry, enabling them to discover the concepts & their applications for themselves in order to develop an understanding of the principles that goes beyond simple memorization to pass a test. Jacobs' unique instructional approach to math means your student: Develops a true understanding of geometric principlesInteracts with concepts using real-world examples, ensuring they'll know exactly how to apply the material they are learning to real-life and other academic subjectsIs prepared to take their understanding of Geometry concepts outside the math textbook and successfully apply them to higher math courses, sciences, & everyday lifels equipped with an understanding of the foundational mathematical concepts of Geometry—and once a student truly understands the concepts in Geometry, they are equipped & prepared for all higher math & sciences! Engaging, Real-World Instruction

Understanding both the why and how of Geometry is foundational to your student's success in high school and college. Jacobs' Geometry provides students with a clear and thorough understanding of why concepts work, as well as how they are applied to solve real-world problems. A Top Choice for High School Success & College Prep Jacobs' Geometry has proven its ability to guide students towards success and is still the choice of top teachers and schools. The unique instructional method within Jacobs' Geometry ensures your student understands both the why and how of Geometry and establishes a strong foundation for higher math & science courses. If your student is planning for college or a STEM career, Jacobs' Geometry ensures they are equipped with the tools they need to succeed!

Geometry Student Text Includes: Full Color Illustrations 16 sections, covering deductive reasoning, lines & angles, congruence, inequalities, quadrilaterals, area, triangles, circles, theorems, polygons, geometric solids, and more! Answers to select exercises in the back of the text Flexible based on focus & intensity of course Set I exercises review ideas & concepts from previous lessons to provide ongoing application of material. Set II exercises allow student to apply material from the new lesson Set III exercises provided additional, more challenging problems
