Service and Repair Manual for BMW 1 Series

The Rover 800 grew out of a pioneering collaboration between Rover in Britain and Honda in Japan during the 1980s. This book tells the story of how the two companies worked together to produce the Rover 800 and its cousin, the Honda Legend. For those who remember the big front-wheel-driver Rover with affection, this book sets out the full history looking at the design and development of all models: saloons, fastbacks and coupes; the Sterling in North America; contemporary aftermarket modifications; Police usage and export variants. There is a helpful chapter on buying an owning a Rover 800 and the book is illustrated with 250 colour and black & white photographs.

Land-Rover Series I, II & III

Continuing the popular Haynes Owners' Workshop Manual space series, which currently comprises Apollo 11 Manual and NASA Space Shuttle Manual, this unique book provides an insight into the only car ever built to be driven on the surface of another world. With a Foreword by the first Apollo astronaut to drive it on the Moon, Dave Scott, and published to coincide with the 40th anniversary of mankind's final drive on the Moon in December 2012. The book is part mechanical guide, illustrated with many of the technical drawings from the time, and part narrative-driven story of engineering ingenuity and human triumph. It draws on the rich NASA photographic archive and the complete transcripts of the crews' reaction to driving across the Moon, which the authors have an un-paralleled knowledge and experience of working with.

Few launch vehicles are as iconic and distinctive as NASA's behemoth rocket, the Saturn V, and none left such a lasting impression on those who watched it ascend. Developed with the specific brief to send humans to the Moon, it pushed rocketry to new scales. Its greatest triumph is that it achieved its goal repeatedly with an enviable record of mission success. Haynes' Saturn V Manual tells the story of this magnificent and hugely powerful machine. It explains how each of the vehicle's three stages worked; Boeing's S-IC first stage with a power output as great as the UK's peak electricity consumption, North American Aviation's S-II troubled second stage, Douglas's workhorse S-IVB third stage with its instrument unit brain - as much a spacecraft as a rocket. From the decision to build it to the operation of its engines' valves and pumps, this lavishly illustrated and deeply informative book offers a deeper appreciation of the amazing Saturn V.

A blended learning approach to automotive engineering at levels one to three. Produced alongside the ATT online learning resources, this

textbook covers all the theory and technology sections that students need to learn in order to pass levels 1, 2 and 3 automotive courses. It is recommended by the Institute of the Motor Industry and is also ideal for exams run by other awarding bodies. Unlike the current textbooks on the market though, this title takes a blended learning approach, using interactive features that make learning more enjoyable as well as more effective. When linked with the ATT online resources it provides a comprehensive package that includes activities, video footage, assessments and further reading. Information and activities are set out in sequence so as to meet teacher and learner needs as well as qualification requirements. Tom Denton is the leading UK automotive author with a teaching career spanning lecturer to head of automotive engineering in a large college. His nine automotive textbooks published since 1995 are bestsellers and led to his authoring of the Automotive Technician Training multimedia system that is in common use in the UK, USA and several other countries.

From the moment of its launch in 1998, the Rover 75 caught the public's imagination. Here, at last, was a car that felt like traditional Rovers and had been designed in Britain. Rover 75 and MG ZT charts the evolution of the models from the early 1990s onwards including full production histories and comprehensive specification details. Contents include: the development and production of the Rover 75 under BMW in the 1990s; becoming the MG Rover Group - from BMW to Phoenix Venture Holdings; expanding the Rover 75 with Longbridge Rover Saloons and Tourers; the MG models of the new millennium - the ZT and ZT-T; monogram 75, the five-millionth Rover; a facelift for the cars with the new V8 engines; moving production to China and the end of the MG Rover Group. Illustrated with 267 colour photographs, this is essential reading for motoring enthusiasts and fans of the Rover brand.
