Personnel Selection of Graduate Engineers

True or false? In selling high-value products or services: 'closing' increases your chance of success; it is essential to describe the benefits of your product or service to the customer; objection handling is an important skill; open questions are more effective than closed questions. All false, says this provocative book. Neil Rackham and his team studied more than 35,000 sales calls made by 10,000 sales people in 23 countries over 12 years. Their findings revealed that many of the methods developed for selling low-value goods just don't work for major sales. Rackham went on to introduce his SPIN-Selling method. SPIN describes the whole selling process: Situation questions Problem questions Implication questions Need-payoff questions SPIN-Selling provides you with

a set of simple and practical techniques which have been tried in many of today's leading companies with dramatic improvements to their sales performance.

Mastering Technical Sales: The Sales Engineer's Handbook, Third Edition

Have you ever seen a bad software demo ? Peter Cohan helps organizations put the Wow! into their demos to make them crisp, compelling and successful - to get the job done. He has had roles in four corners: technical, product and field marketing (he was banished to Basel, Switzerland for two years for bad behavior); sales and sales management; senior management (he built a business unit up from an empty spreadsheet into a \$30M per year operation); and, in this last role, he has been that most important of all possible entities, a customer Peter Cohan leverages twenty-five years of experience in selling and marketing business software and as a customer. The Great Demo! method comes directly from extensive firsthand experiences in developing and delivering software demonstrations, and in coaching others to achieve surprisingly high success rates with their sales and marketing demos. For more information on demonstration methods, guidelines and tips, explore the author's website at www.SecondDerivative.com or contact the author directly at PCohan@SecondDerivative.com.
