Strategies for Building Academic Vocabulary in Science

Hunger for Memory is the story of Mexican-American Richard Rodriguez, who begins his schooling in Sacramento, California, knowing just 50 words of English, and concludes his university studies in the stately quiet of the reading room of the British Museum. Here is the poignant journey of a “minority student” who pays the cost of his social assimilation and academic success with a painful alienation — from his past, his parents, his culture — and so describes the high price of “making it” in middle-class America. Provocative in its positions on affirmative action and bilingual education, Hunger for Memory is a

powerful political statement, a profound study of the importance of language and the moving, intimate portrait of a boy struggling to become a man. From the Paperback edition.

Applying Differentiation Strategies: Teacher's Handbook for Grades K-2

This text reports on an ethnographic study of journal-keeping in a university science class. The author spent a summer semester attending a general education class in geology as a participant observer, took extensive notes, interviewed class members and the professor, and analyzed journal entries and other documents related to the class. She provides an example of ethnographic methods to be of use to other composition researchers, especially in her careful attention to reflexivity, that is, the effect of the researcher and the research on data. The book provides a detailed exploration of journal keeping from the perspective of both the students and the professor, as well as case studies of how two students in particular used journal keeping. Journal entries are examined not simply as texts produced by individuals for a class assignment, but as the outcome of a socio-political process, including the goals of the general education curriculum, the goals of the geology course and its instructor, the students' personal and educational goals, the institutional constraints on the professor, the methods of the researchers, and the dynamics of classroom interaction.

Closing of the American Mind

Learning Journals in the K-8 Classroom is the first comprehensive presentation of how to use academic journals effectively for elementary-level instruction. The text outlines the theoretical foundations for using learning journals and provides step-by-step suggestions for implementing them in every content area and at all levels of elementary instruction. Learning journals provide resources and support for reading aloud, independent reading, mini-lessons, cooperative study, individual research, workshops, and the portfolio system. The type of interactive writing students do in learning journals helps them explore complex ideas in the content areas, using their own strengths of analysis and response; the journals then become resources for future learning, group discussions, individual conferences, learning assessment, reports, and progress. Four introductory chapters show teachers how to create their own journals, introduce journals to students, integrate them with cooperative study, and use them for

assessment. Additional chapters focus on the individual curriculum areas of literature, writing, mathematics, science, and social studies. The text includes sample entries from student journals at all grade levels and in every content area, and appendices of annotated resources to support journaling and interviews with teachers who use journals in their classrooms.

Along the way, she tells them of the story of Phoebe Winterbottom, who received mysterious messages, who met a "potential lunatic," and whose mother disappeared. As Sal entertains her grandparents with Phoebe's outrageous story, her own story begins to unfold—the story of a thirteen-year-old girl whose only wish is to be reunited with

Content Area Literacy

Throughout history, some books have changed the world. They have transformed the way we see ourselves - and each other. They have inspired debate, dissent, war and revolution. They have enlightened, outraged, provoked and comforted. They have enriched lives - and destroyed them. Now Penguin brings you the works of the great thinkers, pioneers, radicals and visionaries whose ideas shook civilization and helped make us who we are. Thoreau's account of his solitary and self-sufficient

home in the New England woods remains an inspiration to the environmental movement - a call to his fellow men to abandon their striving, materialistic existences of 'quiet desperation' for a simple life within their means, finding spiritual truth through awareness of the sheer beauty of their surroundings.

Classroom Assessment for Student Learning

This book is written by the authors of the acclaimed ""Introduction to Rubrics"". It has sold over 3,000 in 12 months. There is a major growth of interest in keeping journals or diaries for personal reflection and growth; and as a teaching tool. It will appeal to college faculty, administrators and teachers. One of the most powerful ways to learn, reflect and make sense of our lives is through journal keeping. This book presents the potential uses and benefits of journals for personal and professional development - particularly for those in academic life; and demonstrates journals' potential to foster college students' learning, fluency and voice, and creative thinking. In professional life, a journal helps to organize, prioritize and address the many expectations of a faculty member's or administrator's roles. Journals are effective for developing time management skills, building problem-solving skills, fostering insight, and decreasing stress. Both writing and rereading journal entries allow the journal keeper to document thinking; to track changes and review observations; and to examine assumptions and so gain fresh perspectives and insights over past events.

The authors present the background to help readers make an informed decision about the value of journals and to determine whether journals will fit appropriately with their teaching objectives or help manage their personal and professional lives. They offer insights and advice on selecting the format or formats and techniques most appropriate for the reader's purposes.
