Rarely does a primary source become available that provides new and significant information about the history and culture of a famous American Indian tribe. With *A Cheyenne Voice*, readers now have access to a vast ethnographic and historical trove about the Cheyenne people—much of it previously unavailable. *A Cheyenne Voice* contains the complete transcribed interviews conducted by anthropologist Margot Liberty with Northern Cheyenne elder John Stands In Timber (1882–1967). Recorded by Liberty in 1956–1959 when she was a schoolteacher on the Northern Cheyenne Indian Reservation in southeastern Montana, the interviews were the basis of the well-known 1967 book *Cheyenne Memories*. While that volume is a noteworthy edited version of the interviews, this volume presents them word for word, in their entirety, for the first time. Along with memorable candid photographs, it also features a unique set of maps depicting movements by soldiers and warriors at the Battle of the Little Bighorn. Drawn by Stands In Timber himself, they are reproduced here in full color. The diverse topics that Stands In Timber addresses range from traditional stories to historical events, including the battles of Sand Creek, Rosebud, and Wounded Knee. Replete with absorbing, and sometimes even humorous, details about

Cheyenne tradition, warfare, ceremony, interpersonal relations, and everyday life, the interviews enliven and enrich our understanding of the Cheyenne people and their distinct history.

The relative anonymity the Internet provides allows us to assert our knowledge like a professor, show off our seemingly perfect lives, and judge like we're presiding over a court of law. The problem with this relatively new phenomenon is that we often make snap judgments about other people's actions or statements without knowing all of the facts, and without giving others the benefit of the doubt. This volume dives deep into the realities of the Internet age: Do we become different people when we're on the Internet? What responsibility do we have in our treatment of others in this new society? Is it our place to be virtual judge and jury?

The Making of a Journalist

Within the field of legal geography, the spatial relationship of law to landscape is usually considered to be static. Environments are often considered fixed, and consequently inert, as places that literally don't go anywhere. Typically, then,

it is what happens in these places, rather than the place itself, that commands academic attention. In contrast to this static viewpoint, *Law and the Kinetic Environment* considers how many landscapes are in flux and as a result, may be seen as dynamic. Natural phenomena, such as oozing lava, moving glaciers, or bubbling geothermal pools, challenge and test the normative conceptualizations of stability of place, property ownership, and legal regulation. Consequently, such dynamic landscapes enliven and transform law; offering new jurisprudential insights into what law is and how it operates in response to the kineticism that, this book argues is, to some degree, inherent in all landscapes. "
