Resumes That Get Jobs

I Am Bliss

A stunningly candid portrait of the Seattle grunge scene of the '90s and a memoir of an addict during the last great era of rock 'n' roll excess, by Hole drummer Patty Schemel Patty Schemel's story begins with a childhood surrounded by the AA meetings her parents hosted in the family living room. Their divorce triggered her first forays into drinking at age twelve and dovetailed with her passion for punk rock and playing the drums. Patty's struggles with her sexuality further drove her notoriously hard playing, and by the late '80s she had focused that anger, confusion, and drive into regular gigs with well-regarded bands in Tacoma, Seattle, and Olympia, Washington. She met a pre-Nirvana Kurt Cobain at a Melvins show, and less than five years later, was living with him and his wife, Hole front-woman Courtney Love, at the height of his fame and on the cusp of hers. As the platinum-selling band's new drummer, Schemel contributed memorable, driving beats to hits like "Beautiful Son," "Violet," "Doll Parts," and "Miss World." But the band was plagued by tragedy and heroin addiction, and by the time Hole went on tour in support of their ironically titled and critically-acclaimed album Live Through This in 1994, both Cobain and Hole bassist

Kristen Pfaff had died at the age of 27. With surprising candor and wit, Schemel intimately documents the events surrounding her dramatic exit from the band in 1998 that led to a dark descent into a life of homelessness and crime on the streets of Los Angeles, and the difficult but rewarding path to lasting sobriety after more than twenty serious attempts to get clean. *Hit So Hard* is a testament not only to the enduring power of the music Schemel helped create but an important document of the drug culture that threatened to destroy it.

Giorgio Manganelli (1922-1990), one of Italy's most

radical and original writers, went further than most in exploring the creative possibilities of hybrid genres and open forms. Ostentation, theatricality, and a love of drapery and verbal excess are defining features of his body of work, which ranges from prose fiction, literary criticism, and drama to travel writing, treatises, commentaries, and imaginary interviews. This study examines the wealth of Manganelli's imagination - his grotesque animals, speaking corpses, and melancholy spectres - and argues that his spectacular eloquence was shaped by an exceptional awareness of literary and philosophical models. Following Manganelli's lead, the author addresses issues such as the boundaries of meaningful language, the relationship between literary and visual texts, fantasy and realism, and the power of literature to express the apprehensions and intimations of human consciousness.

The Trance Experience

(Guitar Reference). Until the launch of the Flying V and Explorer in 1958, electric guitars were supposed to look like guitars. Suddenly, Gibson turned conventional design upside down, almost literally, by using straight lines and angular body shapes, changing the way electrics could look and, in the process, creating a set of rare future collectables. Flying V, Explorer, Firebird tells the story of those first peculiar instruments and goes on to describe Gibson's second attempt at nonstandard designs with the Firebird of the early '60s. The book shows how most of these were a commercial failure at first and goes on to detail the influence of the designs on guitar-makers such as Hamer, Jackson, Dean, Ibanez, and BC Rich, all of whom embraced Gibson's original weird-is-good design ethic. In parallel with the story of the makers is an absorbing account of the players who discovered these odd-shaped instruments, including Zakk Wylde (Black Label Society), the Edge (U2), and Rick Nielsen (Cheap Trick). Interviews with players and makers illuminate the story of this fascinating assortment of electric guitar innovations, alongside specially commissioned images of every key model and brand and an enviable collection of guitar memorabilia, plus a gallery of leading guitarists photographed in action with their instruments. If it's weird and has strings, it's in Flying V, Explorer, Firebird .

Strip Club

In *Strip Club*, Kim Price–Glynn takes us behind the scenes at a rundown club where women strip out of economic need, a place where strippers’ stories are not glamorous or liberating, but emotionally demanding and physically exhausting. *Strip Club* reveals the intimate working lives of not just the women up on stage, but also the patrons and other workers who make the place run: the owner–manager, bartenders, dejas, doormen, bouncers, housemoms, and cocktail waitresses. Price–Glynn spent fourteen months at The Lion’s Den working as a cocktail waitress, and her uncommonly deep access reveals a conflict–ridden workplace, similar to any other workplace, one where gender inequalities are reproduced through the everyday interactions of customers and workers. Taking a novel approach to this controversial and often misunderstood industry, Price–Glynn draws a fascinating portrait of life and work inside the strip club.

Dan Tesene

Jake’s life is less than perfect. His father drinks, his mother is borderline insane, and his disabled brother, Kyle, can’t so much as feed himself or tie his own shoes. But when he suddenly falls simultaneously into love and tragedy, Jake’s life spirals into a chaos that

he couldn't even imagine, and only he can put the pieces back together. Jake narrates his tale with a voice that is equal parts bitter and innocent, tragic and witty, sarcastic and sweet, and his tale of love lost and love found, of confusion and identity, will resonate with all readers who have struggled with what it means to belong.

Project Management JumpStart

Cardinal Education is an educational consulting and tutoring company based in Palo Alto, CA. Guided by a philosophy of fulfilling students' academic potential in a way that boosts skills and confidence for life, we work to maximize successful middle school, high school, and college admissions outcomes. While some of our methods defy "conventional wisdom," we have a proven track record with a broad range of students: the Ivy League bound to those wishing to avoid community college, the self-motivated to the intransigently jaded, and the profoundly gifted to

learning disabled. We have a passion for expanding students' dreams and helping them attain their goals. Cardinal Education believes in the social value of a strong public education system and sponsors pro bono programs to bring private sector expertise to bear. However, government fiscal policies are shortchanging public schools of opportunities: activities, sports, variety of classes, advanced classes, student: teacher ratios, and counseling departments. The “private school imperative” means that despite economic trends, admission to private school is becoming so competitive that it necessitates standardized testing excellence. The philosophy of this math workbook is rigor and drill. Because this is the first test students take that actively tries to trick students at every turn, students who sit for these standardized exams need reflexive familiarity with computation (math facts), problem types, and strategy. The entrance exams are the first standardized tests for which budgeting time is a significant issue. Students need to spend the majority of time on analysis to avoid getting tricked rather than computation. By building skills, speed, and confidence, we hope to eliminate anxiety and give students a solid foundation on which to build excellent scores. This book is intended as a supplement for our highly trained staff, so it does not include strategies. However, motivated students can use it successfully with occasional help from a teacher or parent. Each chapter is comprised of units, with each unit comprised of 4 problem sets of difficulty, increasing in a logically progressive manner. Students should do as many of the 4 problem sets for each unit as it takes to achieve a 90% accuracy rate. Students

taking lower level exams should complete problems 1-10 in each set. Students competing for high school admissions should complete each problem set in its entirety. Questions or feedback: Info@CardinalEducation.com

The drawings which compose Sketchbook Works Vol. 1 & 2 were developed through painstaking processes of organized mark making within the rigid confines of the grid. The production of these works employ traditional methods of drawing, as well as unconventional modes such as tediously mixing a vast array of custom marker colors for perfect gradients, laser engraving miniature patterns onto pages, and using destructive processes like dissolving imagery with chemical solvents. These drawing processes craft a diverse array of visual experiences derived not only from organized drawing systems, but also from mistakes and destructive actions, whose results were sources of evolution seen in this body of work.

This edition of the "Six Sonatinas, Op. 36" is based on the first printing, published by Clementi himself. In addition to Clementi's own articulations, fingerings and ornaments presented in dark print, additional performance suggestions by Dr. Palmer appear in light gray print. These guidelines were drawn from Clementi's companion work, "Introduction to the Art of Playing on the Pianoforte", first published in 1801. The Alfred Masterwork Library CD Editions conveniently combine each exceptional volume with a professionally recorded CD that is sure to inspire artistic performances. Pianist Kim O'Reilly Newman holds a Master of Music degree from the University of Illinois. She has performed throughout North America and Europe with the Hambro Quartet of Pianos and
