### On Vision and Colors

YOU CAN'T MAKE THIS STUFF UP! Here is a hilarious collection that catches real-life knuckleheads in outrageous acts of brazen stupidity, giving new meaning to that famous four-letter word: "DUH"! \* The Oregon resident who was waxing his 1984 Pontiac--and somehow managed to shove the antenna up his nose . . . GRANDMOTHER OF EIGHT MAKES HOLE IN ONE \* The Atlanta Braves pitcher who was treated for five-inch-long welts after he tried to iron his polo shirt while wearing it . . . MINERS REFUSE TO WORK AFTER DEATH \* The inmate at a Chesapeake Correctional Facility who filed a five million dollar lawsuit against himself . . . DRUNK GETS NINE MONTHS IN VIOLIN CASE \* The woman who couldn't stand the discomfort of having a callus on her right foot, so she blew off her big toe with a shotgun . . . Radio personality John "Kato" Machay's lively compilation of news stories, headlines, and courtroom gaffes proves hands down that truth is dumber than fiction! REMEMBER: To err may be human, but to laugh out loud is divine.

PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology.

## **Brandweek**

Focuses on how leaders use strategy, structures, and systems to create the conditions that stimulate others to meaningfully contribute to the overarching goals of the organization. This book explores how leaders exercise leadership indirectly through structures, processes and systems that stimulate others to contribute to organizational goals.

## **Kiplinger's Personal Finance**

We can't all camp out in old-growth forests, lying down in front of the bulldozers. And it's not only that we're too busy: Some of us just don't want our fabulous threads to get caked with mud. But that doesn't mean we don't care passionately about the environment. Luckily, the days when becoming environmentally aware entailed eating bread that tasted like dirt, wearing clothes that looked like frayed burlap sacks, and spending summer vacations assailing whaling ships with Greenpeace are passing away. It is now perfectly possible (and increasingly easy) to be well fed, well coiffed, well dressed, and well traveled while remaining deeply committed to an ecologically sustainable lifestyle. In *The Lazy*

Environmentalist, Josh Dorfman—host of the Sirius Satellite Radio program of the same name—provides comprehensive guidance to fashion-forward consumers who are as concerned about the long-term health of our planet as they are about the design of their bathroom fixtures. Covering topics that range from clothing to electronic gadgetry, home decor to recreation, and gardening to financial investment, Dorfman lets us know which trends to watch and which eco-conscious products—cars, toothbrushes, cell phones, pet accessories—to buy. Green, it turns out, can be an extremely stylish color.

**Kiplinger's Personal Finance**

Bruce Gauthier was strung along for years as a child and told to believe in Santa Claus. There were whispers about a big payout on Christmas Day, but really, it's all just a lie. As an adult, he realized that those who tell you to rely on the stock market for retirement are just like the people who lie about the man in the big red suit. The only difference is that the stakes are much higher. Canada's national newspaper, The Globe and Mail, called the book one "of the year's best writing

on personal finance, market behaviour and investing strategies." The Globe's David Parkinson gave this review: "Just in time for Christmas comes a book that says having faith in financial markets to deliver your retirement security is as stupid as believing in Santa Claus. (Read it to the kids. It'll be a real eye-opener - once they stop crying.) Toronto resident Bruce Gauthier is no financial expert - just another regular Joe whose nest egg has floundered in the hands of the financial industry. Like the kid who found out there's no Santa, he feels betrayed, lied to. At times he's paranoid and irrational, seeing conspiracy theories all over the place. But beneath it all, there may be more truth here than most of us are comfortable admitting. His rants about regulatory oversight, stock options and short-selling are over the top, but they address some hard questions that maybe we all ought to be asking. Plus, it's a strangely cathartic read - I feel like he's more than angry enough for the both of us. Santa Claus Is Alive and Well and Living on Wall Street is not for financiers, brokers, investment advisers, or anyone with access to inside information from Wall Street. Instead, it's for the everyday worker who wants to protect their retirement savings.

### **Kiplinger's Personal Finance Magazine**

During the first two decades of the nineteenth century, two of the most significant theoretical works on color since Leonardo da Vinci's *Trattato della Pittura* were written and published in Germany: Arthur Schopenhauer's *On Vision and Colors* and Philipp Otto Runge's *Color Sphere*. For Schopenhauer, vision is wholly subjective in nature and characterized by processes that cross over into the territory of philosophy. Runge's *Color Sphere* and essay "The Duality of Color" contained one of the first attempts to depict a comprehensive and harmonious color system in three dimensions. Runge intended his color sphere to be understood not as a product of art, but rather as a "mathematical figure of various philosophical reflections." By bringing these two visionary color theories together within a broad theoretical context philosophy, art, architecture, and design this volume uncovers their enduring influence on our own perception of color and the visual world around us.

### **Time**

This book studies the industrial development of Japan since the mid-nineteenth century, with particular emphasis on how the various industries built technological capabilities. The Japanese were extraordinarily creative in searching out and learning to use modern technologies, and the authors investigate the emergence of entrepreneurs who began new and risky businesses, how the business organizations evolved to cope with changing technological conditions, and how the managers, engineers, and workers acquired organizational and technological skills through technology importation, learning-by-doing, and their own R & D activities. The book investigates the interaction between private entrepreneurial activities and public policy, through a general examination of economic and industrial development, a study of the evolution of

management systems, and six industrial case studies: textile, iron and steel, electrical and communications equipment, automobiles, shipbuilding and aircraft, and pharmaceuticals. The authors show how the Japanese government has played an important supportive role in the continuing innovation, without being a substitute for aggressive business enterprise constantly venturing into unfamiliar terrains.
