The third edition of Loftus' Financial Reporting has been updated for recent developments in the Australian Accounting Standards, including the release of the new Conceptual Framework. This text is designed to be used across the 2nd and 3rd year financial accounting units. A hallmark feature of the text is that it provides both a conceptual understanding and a practical application of the accounting standards. For students, an understanding of the conceptual basis of accounting and the rationale behind the principles is crucial to the consistent application of standards in a variety of practical contexts. The Financial Reporting interactive e-text features a range of instructional media content designed to provide students with an

engaging learning experience. This includes practitioner videos (from Ernst & Young), interactive worked problems and questions with immediate feedback. Loftus' unique resource can also form the basis of a blended learning solution for lecturers.

Cover crops slow erosion, improve soil, smother weeds, enhance nutrient and moisture availability, help control many pests and bring a host of other benefits to your farm. At the same time, they can reduce costs, increase profits and even create new sources of income. You'll reap dividends on your cover crop investments for years, since their benefits accumulate over the long term. This book will help you find which ones are right for you. Captures farmer and other research results from the past ten years. The authors verified the info. from the 2nd ed., added new results and updated farmer profiles and

research data, and added 2 chap. Includes maps and charts, detailed narratives about individual cover crop species, and chap. about aspects of cover cropping.

The "Microbiology" volume of the new revised and updated Handbook of Enology focuses on the vinification process. It describes how yeasts work and how they can be influenced to achieve better results. It continues to look at the metabolism of lactic acid bacterias and of acetic acid bacterias, and again, how can they be treated to avoid disasters in the winemaking process and how to achieve optimal results. The last chapters in the book deal with the use of sulfur-dioxide, the grape and its maturation process, harvest and pre-fermentation treatment, and the basis of red, white and speciality wine making. The result is the ultimate text and reference on the science and technology of the vinification process: understanding and dealing with yeasts and bacterias involved in the transformation from grape to wine. A must for all serious students and practitioners involved in winemaking.
