solution-focused perspective can be a powerful tool for case managers. Their understanding and presentation is based upon practice scenarios that are real and applied. They clearly demonstrate the impact of 'thinking and language' and the importance of building a collaborative relationship with clients. Their work challenges the traditional theory-driven interventions that focus on problems and arrive at a diagnosis. They encourage a 'shift' to a co-constructive partnership that requires a practitioner to respect that clients are 'experts of their own lives'. They provide a clear step-wise discussion of techniques and strategies that can be employed working with individuals and families in case management settings. This book is a must read."
