16.1: Vector Fields: Exercises: p.1073: 16.2: Line Integrals: Exercises: p.1084: 16.3: The Fundamental Theorem for Line Integrals: Exercises: p.1094: 16.4: Green's

Theorem: Exercises: p.1101: 16.5: Curl and Divergence: Exercises: p.1109: 16.6: Parametric Surfaces and Their Areas: Exercises: p.1120: 16.7: Surface Integrals: Exercises: p.1132: 16.8: Stoke's Theorem: Exercises: p.1139: 16.9: The Divergence Theorem

Solutions to Odd-Numbered End-of-Chapter Exercises: Chapter 16

2(1/2)5 = 1/16. Since this exceeds .05, it is impossible to reject H 0, and thus P(Type I error) = 0. With the large-sample score test, y = 0 and y = 5 are the only outcomes to give P ≤ .05 (e.g., with y = 5, z = (1.0−.5)/ q.5(.5)/5 = 2.24 and P = .025). Thus, for that test, P(Type I error) = P(Y = 0)+P(Y = 5) = 1/16. b.
