The Lost Salt Gift of Blood

Molecular Visions (Organic, Inorganic, Organometallic) Molecular Model Kit #1 by Darling Models to accompany Organic Chemistry

“A powerful, authentic voice for a generation of women whose struggles were erased from history—a heart-smashing debut that completely satisfies.”
—Jamie Ford, New York Times bestselling author of *Hotel on the Corner of Bitter and Sweet*

A young woman finds the most powerful love of her life when she gives birth at an institution for unwed mothers in 1883 Philadelphia. She is told she must give up her daughter to avoid lifelong poverty and shame. But she chooses to keep her. Pregnant, left behind by her lover, and banished from her Quaker home and teaching position, Lilli de Jong enters a home for wronged women to deliver her child. She is stunned at how much her infant needs her and at how quickly their bond overtakes her heart. Mothers in her position face disabling prejudice, which is why most give up their newborns. But Lilli can't accept such an outcome. Instead, she braves moral condemnation and financial ruin in a quest to keep herself and her baby alive. Confiding their story to her diary as it unfolds, Lilli takes readers from an impoverished charity to a wealthy family's home to the streets of a burgeoning American city. Drawing on rich history, Lilli de Jong is both an intimate portrait of loves lost and found and a testament to the work of mothers.

Ullmann's Encyclopedia of Industrial Chemistry

Molecular models are as vital a tool for the study of chemistry as calculators are for the study of mathematics. Molecular Visions models may be assembled in infinite combinations enabling the user to construct not only familiar configurations but also undiscovered possibilities. Models are intended to inspire the imagination, stimulate thought, and assist the visualization process. They present the user with a solid form of an abstract object that can otherwise only be visualized by the chemist. While chemistry textbooks use letters and graphics to describe molecules, molecular models make them "real". MOLECULAR VISIONS Organic Kit #1 is in a green plastic box, 9"x4"x2"

Caroline, known as "Lina" to her family, has always lived in the shadow of her older brother William Herschel's accomplishments. And yet when William invites Lina to join him in England to assist in his musical and astronomical pursuits--not to mention to run his bachelor household--she accepts, finding a new sense of purpose. William may be an obsessive genius, but Lina adores him, and aids him with the same fervency as a beloved wife. When William decides to marry, however, Lina's world collapses. As she attempts to rebuild a future, we witness the dawning of an early feminist consciousness--a woman struggling to find her own place among the stars.

Some basic knowledge of electronics is assumed, but the essential features of RF are fully described, including the important topic of receiver dynamic which is often overlooked in basic textbooks. The theory and circuit descriptions are geared towards genuine design applications rather than the oversimplifications and skeleton circuits of many college texts. During his career, the late Joe Carr was one of the world's leading writers on electronics and radio, and an authority on the design and use of RF systems. Whether you are looking for a complete self-study course in RF technology, or a concise reference text to dip into, this book has the solution.
