When humanity reaches for the stars, our probes are destroyed. They crash into an incredibly advanced piece of technology: a massive force-field. Unknown beings have placed a barrier around our star and planets, enclosing us within. We're locked inside a Great Sphere. Was this invisible obstacle built to imprison us-or to protect us? No one knows the truth, but it soon becomes clear the barrier has leaks. Aliens infiltrate and try to sabotage our efforts to escape our cage. A warship crewed by military people and scientists beta-test an engine designed to pass through the barrier. Chief Gray, a security officer from Control, is assigned to help. His mission is critical: Earth must escape her bonds at all costs, even if it means war with our hostile neighbors. War of the Spheres is a new novel by James Millington and B. V. Larson, a bestselling SF author with over three million copies sold.

### **Columbus Day**

We were fighting on the wrong side, of a war we couldn't win. And that was the good news. The Ruhar hit us on Columbus Day. There we were, innocently drifting along the cosmos on our little blue marble, like the native Americans in 1492. Over the horizon come ships of a technologically advanced, aggressive culture, and BAM! There go the good old days, when humans only got killed by each other. So, Columbus Day. It fits. When the morning sky twinkled again, this time with Kristang

starships jumping in to hammer the Ruhar, we thought we were saved. The UN Expeditionary Force hitched a ride on Kristang ships to fight the Ruhar, wherever our new allies thought we could be useful. So, I went from fighting with the US Army in Nigeria, to fighting in space. It was lies, all of it. We shouldn't even be fighting the Ruhar, they aren't our enemy, our allies are. I'd better start at the beginning.

### **The Philosophy of History**

Why did human beings first begin to write history? Lisa Hau argues that a driving force among Greek historians was the desire to use the past to teach lessons about the present and for the future. She uncovers the moral messages of the ancient Greek writers of history and the techniques they used to bring them across. Hau also shows how moral didacticism was an integral part of the writing of history from its inception in the 5th century BC, how it developed over the next 500 years in parallel with the development of historiography as a genre and how the moral messages on display remained surprisingly stable across this period. For the

ancient Greek historiographers, moral didacticism was a way of making sense of the past and making it relevant to the present; but this does not mean that they falsified events: truth and morality were compatible and synergistic ends.

### **Hard Times for These Times**

In a YA trilogy like no other, Trent Reedy has raised the most primal questions of our national existence: Do we owe our greatest loyalty to our friends? Our state? Our country? Our party? How do we reconcile our individual rights and common needs? What keeps us all united -- and what happens if we fall apart? Now, in this third book, the Second Civil War has come to an end in Idaho. The Feds have taken the fight to other fronts, and Danny and his friends are free of US dominance. But

that freedom comes with considerable costs, from Danny's disturbing flashbacks to the war, to the Brotherhood of the White Eagle, whose "security" for Freedom Lake looks more like outright thuggery. After Danny makes a shocking discovery about the Brotherhood's final aims, he and his friends lead a group of townspeople on a dangerous journey across a ravaged Idaho, hoping to build a better society of their own, and fulfill the dreams they had in what once was the United States.

### **Black Phoenix**

He and his crew are infamous among the stars. As a result, when ships of an unknown configuration begin flowing out of swirling rifts above Earth, Blake is called upon again to deal with the problem. But the approaching fleet isn't what it seems. They're employing an entirely new way to exterminate Rebels. Since for ancient Greeks and Romans one essential element of identity and difference was customs, we learn a lot from these texts about sex and marriage, funerals, and warfare in the Mediterranean and surrounding lands. But the ancient authors also featured banalities such as clothing, horse bits, cooking, and even trash talking. The translations are fresh, accurate, and accessible. . . . In a brisk and smart Introduction [the editors] point out the absence of fixed words for race and ethnicity in classical antiquity even as they provide some good references for exploring the complexity of these modern concepts." --Mary T. ### **Orion Fleet**

Even with no war on, there are always battles to fight. A cease-fire in the war with Hanover leaves Lieutenant Alexis Carew on half-pay, in-atmosphere, and with her ship laid up in ordinary until called upon once more for the "needs of the Service." She was, at least, lucky enough to be in her home star system when here last ship, HMS Nightingale, paid off, unlike much of her former crew. She's left to help manage her family lands, though still with no certainty she'll be allowed to inherit them. It would be a tranquil, peaceful life, if not for the influx of asteroid miners

seeking their fortunes, the uncertainties of her inheritance, and the nagging certainty that her current life is not what she really wants. She'd give anything to command a ship again.

### **Amplitude**

In the year 2420, war looms between the galaxy's two most powerful empires: the tyrannical Theocracy and the protectionist Commonwealth. She soon discovers the situation on Cadiz is even worse than anyone in power anticipated. War isn't just a possibility--it is imminent. Yet the admiral in position to bolster defenses refuses to prepare for a fight. messages to the stars. Unfortunately, someone noticed. The Galactics arrived with their battle fleet in 2052. Rather than being exterminated under a barrage of hell-burners, Earth joined their vast Empire. Swearing allegiance to our distant alien overlords wasn't the only requirement for survival. We also had to have something of value to trade, something that neighboring planets would pay their hard-earned credits to buy. As most of the local worlds were too civilized to have a proper army, the only valuable service Earth could provide came in the form of soldiers someone had to do their dirty work for them, their fighting and dying. I, James McGill, was born in 2099 on the fringe of the galaxy. When Hegemony Financial denied my loan applications, I was kicked out of the university and I turned to the stars. My first campaign involved the invasion of a mineral-rich planet called Cancri-9, better known as Steel World. The attack didn't go well, and now Earth has entered a grim struggle for survival. Humanity's mercenary legions go to war in STEEL WORLD, bestselling author B. V. Larson's latest science fiction novel.

The multiple-award-winning science fiction master returns to the universe that is his greatest triumph--the world of Hyperion and The Fall of Hyperion --with a novel even more magnificent than its predecessors. Dan Simmons's Hyperion was an immediate sensation on its first publication in 1989. This staggering multifaceted tale of the far future heralded the conquest of the science fiction field by a man who had already won the World Fantasy Award for his first novel (Song of Kali) and had also published one of the most well-received horror novels in the field, Carrion Comfort. Hyperion went on to win the Hugo Award as Best Novel, and it and its companion volume, The Fall of Hyperion, took their rightful places in the science fiction pantheon of new classics. Now, six years later, Simmons returns to this richly imagined world of technological achievement, excitement, wonder and fear. Endymion is a story about love and memory, triumph and terror--an instant candidate for the field's highest honors. From the Paperback edition.

"Buckle up--this is another crazy ride!" The Scrapyard Ship sci-fi "cliff-hanger" adventures continue with HAB 12, the second book in the series: Captain Jason Reynolds faces new challenges, not only on Earth but from the far side of the universe as well. The only way to stop the Craing this time will be to square off with them on their home turf. Jason's been informed that three powerful Craing warships, having similar technology as The Lilly, will soon be en route to Earth. The Alliance must destroy the Craing's wormhole means of distant space travel to avert Earth's total annihilation. Unfortunately, there's no way to reach the Craing worlds in time, at least not through conventional means. It's up to Jason and his hand-picked assault team to traverse, by advanced phase-shifting means, through the hazardous environment of HAB 12. This is an adventure fraught with carnivores of a Jurassic Age magnitude, and a terrain so deadly that turning back may be their only hope of survival. Note from the author: Don't be surprised by cliff-hanger endings. I'll do my best to keep Scrapyard Ship as well as the Tapped In series books coming so you wont have long to wait for the next book. Enjoy!

### **Nemesis**

John Perry did two things on his 75th birthday. First he visited his wife's grave. Then he joined the army. The good news is that humanity finally made it into interstellar space. The bad news is that planets fit to live on are scarce-and aliens willing to fight for them are common. The universe, it turns out, is a hostile place. So: we fight. To defend Earth (a target for our new enemies, should we let them get close enough) and to stake our own claim to planetary real estate. Far from Earth, the war has gone on for decades: brutal, bloody, unyielding. Earth itself is a backwater. The bulk of humanity's resources are in the hands of the Colonial Defense Force, which shields the home planet from too much knowledge of the situation. What's known to everybody is that when you reach retirement age, you can join the CDF. They don't want young people; they want people who carry the knowledge and skills of decades of living. You'll be taken off Earth and never allowed to return. You'll serve your time at the front. And if you survive, you'll be given a generous homestead stake of your own, on one of our hard-won colony planets. John Perry is taking that deal. He has only the vaguest idea what to expect. Because the actual fight, light-years from home, is far, far harder than he can imagine-and what he will become is far stranger. The team went through hell during their previous mission, losing both their commanding officer and their ship. For now, Jacob was acting CO of Scout Team Obsidian and their ship was a broken down old surplus combat shuttle they'd stolen from narco-smugglers on a planet called Niceen-3. When command finally does reach out, however, it isn't to order Obsidian home for some much needed R&R. Instead, they are being reactivated and sent out into the contested space of the recently conquered Eshquarian Empire to track down a single Terran cruiser called the Eagle's Talon. The Talon's captain has gone rogue and is operating within a fleet of ships bent on open rebellion against the quadrant's only remaining superpower. If that ship is discovered within the rebel fleet, Earth will bear the brunt of the ConFed's reprisal. Jacob's team is in a race against time to locate the missing ship and her rogue captain so that a Navy strike force can swoop in and reclaim her or destroy her.
