### Ten Traits of Highly Effective Principals

Based on interviews with pastors of growing churches, as well as personal experience, this book identifies the most common mistakes pastors make that keep otherwise healthy churches from reaping the harvest God has prepared. Each chapter spotlights a common mistake, gives real-life examples, uses a generous dose of humor, and provides a practical course of action to recover from the error. The book draws from the experience of Seacoast Church as well as pastors such as Craig Groeschel, Chris Hodges, Perry Nobel, Mark Batterson, Dave Ferguson, Scott Chapman, Dino Rizzo, Ron Hamilton, and Dave Browning, Church leaders will be encouraged to realize that they are not the only ones who struggle, and that turning their situation around may not be as daunting a task as they think. This is a field guide for the common pastor based on actual churches of all sizes.

Why is it so hard to make lasting changes in our companies, in our communities, and in our own lives? The primary obstacle is a conflict that's built into our brains, say Chip and Dan Heath, authors of the critically acclaimed bestseller *Made to Stick*. Psychologists have discovered that our minds are ruled by two different systems - the rational mind and the emotional mind—that compete for control. The rational mind wants a great beach body; the emotional mind wants that Oreo cookie. The rational mind wants to change something at work; the emotional mind

loves the comfort of the existing routine. This tension can doom a change effort - but if it is overcome, change can come quickly. In *Switch*, the Heaths show how everyday people - employees and managers, parents and nurses - have united both minds and, as a result, achieved dramatic results:

- The lowly medical interns who managed to defeat an entrenched, decades-old medical practice that was endangering patients
- The home-organizing guru who developed a simple technique for overcoming the dread of housekeeping
- The manager who transformed a lackadaisical customer-support team into service zealots by removing a standard tool of customer service

In a compelling, story-driven narrative, the Heaths bring together decades of counterintuitive research in psychology, sociology, and other fields to shed new light on how we can effect transformative change. *Switch* shows that successful changes follow a pattern, a pattern you can use to make the changes that matter to you, whether your interest is in changing the world or changing your waistline.

### **To Interpret the Earth**

A Little Book about Big Change We all want the same things. We want to live a life of purpose and meaning. We want to leave a legacy for our children and grandchildren. We want to leave the world a better place. And yet we spend so much time wringing our hands over what's wrong and not nearly enough time fixing those things within our control. John Kasich has walked the corridors of power both in the politics, as a former leader of Congress, governor of Ohio, presidential candidate, and in the private sector, as an in-demand public speaker, best-selling author and a strategic advisor to businesses and large non-profits. Yet he's seen that the most powerful movements have started from the bottom up. Rather than waiting on Washington, the solutions happen once we become leaders in our own lives and communities. The strength and resilience of our nation lies in each of us. That's what this book is about. In *It's Up to Us*, Kasich shares the ten little ways we each can bring about big change. Taken together, they chart a path for each to follow as we look to live a life bigger than ourselves. Taken one-by-one, they can help to lift us from a place of outrage or complacency or helplessness and move us closer to our shared American dream.

From renowned classicist Edith Hall, ARISTOTLE'S WAY is an examination of one of history's greatest philosophers, showing us how to lead happy, fulfilled, and meaningful lives Aristotle was the first philosopher to inquire into subjective happiness, and he understood its essence better and more clearly than anyone since. According to Aristotle, happiness is not about well-being, but instead a lasting state of contentment, which should be the ultimate goal of human life. We become happy through finding a purpose, realizing our potential, and modifying our behavior to become the best version of ourselves. With these objectives in mind, Aristotle developed a humane program for becoming a happy person, which has stood the test of time, comprising much of what today we associate with the good life: meaning, creativity, and positivity. Most importantly, Aristotle understood happiness as available to the vast majority us, but only, crucially, if we decide to apply ourselves to its creation--and he led by example. As Hall writes, "If you believe that the goal of human life is to maximize happiness, then you are a budding Aristotelian." In expert yet vibrant modern language, Hall lays out the crux of Aristotle's thinking, mixing affecting autobiographical anecdotes with a deep wealth of classical learning. For Hall, whose own life has been greatly improved by her understanding of Aristotle, this is an intensely personal subject. She distills his ancient wisdom into ten practical and universal lessons to help us confront life's difficult and crucial moments, summarizing a lifetime of the most rarefied and brilliant scholarship.

In this surprising and moving memoir, the legendary rap star and cofounder of Run D.M.C. keeps it a hundred percent, speaking out about his battle with depression and overcoming suicidal thoughts—one of the most devastating yet little known health issues plaguing the black community today. As one third of the legendary rap group Run D.M.C., Darryl "DMC" McDaniels—aka Legendary MC, The

Devastating Mic Controller, and the King of Rock—had it all: talent, money, fame, prestige. While hitting #1 on the Billboard charts was exhilarating, the group's success soon became overwhelming. A creative guy who enjoyed being at home alone or with his family, DMC turned to alcohol to numb himself, a retreat that became an addiction. For years, he went through the motions. But in 1997, when intoxication could no longer keep the pain at bay, he plunged into severe depression and became suicidal. He wasn't alone. During the same period, suicide became the number three leading cause of death among black people—a health crisis that continues to this day. In this riveting memoir, DMC speaks openly about his emotional and psychological struggles and the impact on his life, and addresses the many reasons that led him—and thousands of others—to consider suicide. Some of the factors include not being true to who you are, feelings of loneliness, isolation, and alienation, and a lack of understanding and support from friends and family when it's needed most. He also provides essential information on resources for getting help. Revealing how even the most successful people can suffer from depression, DMC offers inspiration for everyone in pain—information and insight that he hopes can help save other lives.
