For any government agency, the distribution of available resources among problems or programs is crucially important. Agencies, however, typically lack a self-conscious process for examining priorities, much less an explicit method for defining what priorities should be. Worst Things First? illustrates the controversy that ensues when previously implicit administrative processes are made explicit and subjected to critical examination. It reveals surprising limitations to quantitative risk

assessment as an instrument for precise tuning of policy judgments. The book also demonstrates the strength of political and social forces opposing the exclusive use of risk assessment in setting environmental priorities.

The Methodist Review

Psychologists John and Linda Friel have written an enormously readable and infinitely practical book that digs into some of the worst mistakes that parents make, with suggestions on how parents can change immediately. The Friels examine the seven most ineffective and self-defeating behaviors that parents display again and again. Working from the ideas that even small changes can have big results, the authors give parents concrete steps they can take to end the behaviors and improve the quality of their parenting. Whether readers are contemplating starting a family, have children who haven't entered school yet, are struggling with rebellious teenagers, or are empty-nesters wondering how they can be better parents to their grown children, they can't afford not to read this book. With the same clarity and concrete examples that have sold over 350,000 copies of their books, the Friels offer readers forty years of combined experience as practicing psychologists, and fifty years of combined experience as blended-family parents. This material has been field-tested in the authors' own household, with hundreds of their clients, and with thousands of their workshop and Clearlife Clinic participants. It will cause immediate changes in parents' behavior, and immediate improvement in the lives of their

children.

The 7 Best Things Smart Teens Do

Psychologists and best-selling authors John and Linda Friel have written an enormously readable and infinitely practical book that delves into what makes a relationship enduringly successful. Wherever readers are in their own relationships, this book can improve those relationships dramatically, bringing them immediate and lasting benefits. In the tradition of their bestseller, *The 7 Worst Things (Good) Parents Do*, the authors examine the behaviors that happy, effective couples display continually. After careful investigation, the Friels synthesized years of clinical work into a manageable list of the most significant patterns of behavior couples must address and embrace if they want to become truly great couples. Recognizing that other patterns and behaviors certainly do exist, when patients come the Friels for help, the core issues illustrated in this book are discussed as the couples move boldly toward improving their relationships—with consistently outstanding results. The authors found that they had not seven, but eight, key items to identify. Here are a few: Be Sexual Be Willing To Divorce Manage Your Fear, Hurt, Shame, And Loneliness Own Your Part (be responsible for creating a great relationship)

The Worst Thing I've Done

As Manny Scott travels the world speaking to students and educators, he meets young people whose stories sound a lot like his own—a childhood that was marked by poverty, instability, violence, and despair until a few caring educators showed him how to find meaning in the classroom and gave him a glimpse of his own possibilities. So many kids he meets today need this kind of hope and practical assistance. But with all that is already on educators’ plates, what can an individual teacher do to help traumatized children believe in themselves, succeed in school, and graduate prepared for work and life? Here, you’ll find answers. With the same passion that inspires so many who hear him speak, Scott presents an approach informed by the teachers who helped him and honed through years of connecting with kids who desperately need someone to show them a path to a more positive future. He shares the little things you can do to prepare yourself for the hard work of making a difference and offers advice for bridging cultural divides, earning students’ trust, and equipping them to take responsibility for their own success. This book is a reminder of the incredible power every teacher has to help young people rewrite their destinies—and it’s a call to action for all who read it.

Worst Things First

Bestselling author Jamie Kelly is back with an all-new, all-funny diary! But she has no idea that anybody is reading it. So please, please, please don't tell her. School's out for the summer, and that means no more Meat Loaf Thursdays, Sunday homework-cramming, or teachers (way way unsuccessfully) trying to act cool. It also means that certain Mackerel Middle Schoolers have a lot of time on their hands . . . and seriously empty pockets. Isabella is going to change all that. And Jamie and Angeline are going to help --- whether they like it or not. It's the best kind of teamwork: When a whole bunch of people

work together to do something wrong, instead of doing it wrong one at a time.

A fantastic story about having a troublesome sister, from mega-bestselling Jacqueline Wilson.

Kliatt Young Adult Paperback Book Guide

This story is about possibility. It describes the journey of a young woman diagnosed with a mental health issue, given a monthly disability benefit, and told she will never work again. Despite this, she eventually has a twenty-seven-year full-time career in mental health. She is supported by a phenomenal psychiatrist who often backs her client's stubborn but convincing moves. As the title indicates, this is all about turning bad to good or negative to positive, and it features a long-term career--empowering disabled individuals--in the way some people had empowered her. For example, this book exists because an EAP counselor insisted she write it. (Yes, sometimes Cheryl really does do what she is told!) This is a story for all education departments dealing with human psychology, sociology, or disability, and it may very well generate a discussion well beyond Canadian borders.

In , therapists John and Linda Friel gave parents an easy-to-understand guide to overcome the seven worst mistakes even good parents make while raising children. Now they've written a book for teens based on the same formula: it includes the seven worst things even smart—and outwardly successful—teens do, and shows teens how they can change these behaviors and assure their success in life as they grow towards adulthood. This book was written expressly for teenagers as a unique roadmap into adulthood. It was designed to stimulate the brain as well as the heart because teenagers who listen to both can eventually negotiate adolescence successfully. It will appeal to teenagers who like to think, wonder, question and challenge, as well as to teenagers who feel that they haven't quite figured out this "life" thing. The Friels show teens the seven things they need to do in order to overcome common roadblocks they face or will face. These are: Become competent—don't expect to have self-esteem without becoming competent Master your feelings—don't let your feelings run the show Break the silence—don't silently scream instead of making yourself known Get healthy power—don't avoid learning about power Face the serious stuff—don't hide the really important things you're experiencing Find an identity—don't avoid the struggle to find yourself Learn to stake out the extremes—don't live only in the extremes. Written in clear, straightforward language and including many interesting and colorful story interludes, this book is an easy-to-use, powerful tool for all teens.

Raising Children Who Think for Themselves offers a new approach to parenting that has the power to reverse the trend of external direction in our children and help parents bring up empathetic, self-confident, moral, independent thinkers. Children who are externally directed make decisions based on the peer groups, violent movies, sexually explicit television shows, and rap lyrics that permeate their lives. When children are self-directed, on the other hand, they use their power of reason like a sword to cut through the jungle of external influences. Fortunately, the author shows us, it is never too late to foster in our children the ability to weigh options, consider sources, and think for themselves. Filled with real-life examples, humorous anecdotes, and countless interviews with parents, children, and teachers, Raising Children Who Think for Themselves Identifies the five essential qualities of self-directed children Outlines the seven strategies necessary for parents to develop these qualities in their children Addresses nearly one hundred child-raising challenges—from body piercing to whining wars—and offers solutions to help encourage self-direction
