The book "Supply Chain Finance Solutions" offers orientation in the new discipline of Supply Chain Finance (SCF) by investigating the need for and nature of SCF, along with its characteristics and enablers. Due to the novelty of the Supply Chain Finance approach, there are still many knowledge gaps. This lack of research leads to uncertainties about the successful implementation of SCF solutions within companies as there is little quantified evidence on the achievable cost savings and other potential benefits. The authors close this gap by providing the latest information on business concepts and the SCF market. Based on a sample SCF model, the worldwide market size for such solutions and potential cost savings to companies engaged in SCF are analyzed. The work underlines the generally agreed-upon attractiveness and future relevance of SCF solutions by creating win-win situations; for all actors in the end-to-end supply chain as well as for external service providers.

The lending industry is comprised of a wide variety of sectors, such as banking, credit cards, mortgages, leasing and consumer finance. Many of these sectors have interconnections and synergies. In addition, a large number of related services and technologies have a major influence on the lending and credit business. These services include e-commerce, credit risk analysis, call centers and information technologies. Rapid changes have taken place in lending in recent years. For example, large amounts of business and consumer debt are now syndicated or securitized. Meanwhile, non-bank firms, such as GE, have become immense competitors in the lending arena, and international acquisitions are shaping up the globalized banking industry of the near future. This carefully-researched book (which includes a database of leading companies on CD-ROM) is a banking, credit and mortgages market research and business intelligence tool-- everything you need to know about the business of banking, credit cards, mortgages and lending, including: Money center banks; Regional banks; Savings associations; Globalization of the banking and lending industries, including our profiles of 331 of the world's leading international banking firms; Mortgage banking and brokerage; Home equity loans; Credit cards; Lending and other services provided by non-bank enterprises; Significant trends in banking and lending technologies; Risk analysis, payment processing, call centers and other support services; Online banking trends; ATM trends and technologies; Banking industry software.

A former member of the American Stock Exchange introduces trading and financial markets to upper-division undergraduates and graduate students who are planning to work in the finance industry. Unlike standard investment texts that cover trading as one of many subjects, Financial Trading and Investing gives primary attention to trading, trading institutions, markets, and the institutions that facilitate and regulate trading activities—what economists call "market microstructure." The text will be accompanied by a website that can be used in conjunction with TraderEx, Markit, StocklinkU, Virtual Trade, Vecon Lab Experiment, Tradingsim, IB Student Trading Lab, Brenexa, Stock Trak and How the Market Works. Introduces the financial markets and the quantitative tools used in them so students learn how the markets operate and gain experience with their principal tools Helps students develop their skills with the most popular trading simulation programs so they can reuse the book to solve day-to-day problems Stretches from investor behavior to hedging strategies and noise trading, capturing recent advances in an up-to-date reference source

This book presents a business model on how to structure the relationship between financial services and procurement. The need for new models is particularly important to support small and medium enterprises (SMEs) where there is an evident difficulty in accessing credit. Due to this context, innovative solutions must be introduced. The objective of this book is to determine how innovation can

support the dynamic and volatile international context and the increasingly relevant function of procurement. It is becoming more and more important to take into account complex international transactions with notably long payment terms. Organizations need to manage the best way to handle the financial relationships and the risks related to credit provision and payments. This book presents an end-to-end support to procurement, including trade finance, supply chain finance, and related payments. In addition, the enterprises need to keep sufficient liquidity levels in the short and medium term. This is a constant challenge today, with the turbulence of financial markets and a continuing climate of economic uncertainty making it harder to obtain external funding. Businesses need to optimize the working capital. This can be done through the innovative concept of procurement finance, which allows SMEs to benefit by the new vision of collaborative procurement. This book provides several practical examples of advanced procurement finance solutions. It demonstrates how the use of process improvement and technology can help in overcoming the current financially difficult situation. In addition, based on the business model presented, the integrated approach to procurement finance allows sustainable solutions which will be of interest to academics, researchers, managers, and practitioners in both buyer and vendor companies, as well as in banks and other financial institutions.

Trade and Receivable Finance provides the definitive practical guide to the evaluation and mitigation of risk and the financing of international trade. This authoritative manual is built upon more than 42 years of experience in the trade and receivables finance market and carries the endorsement of The London Institute of Banking and Finance. The contents are comprehensive incorporating clause examples, specimen documents, financier checklists and diagrams. The traditional method of commercial lending assessment places primary importance on the ability of the borrower to repay the financier. However, this form of evaluation often results in insufficient credit appetite to release the required level of financial support for a company involved in cross border trade. When a trade-related proposition is properly evaluated so that the transactional risks are fully understood and mitigated to an acceptable level, and the source of repayment is identifiable and considered reliable, a well-structured trade and receivables finance facility reduces the risk of default when compared to conventional lending products and can generate additional credit appetite. This book will become a constant 'go-to' companion for transaction banking teams, bank relationship managers, specialist client-facing trade and invoice finance specialists, middle and back office trade advisory personnel, credit analysts, alternative market financiers, export

development agencies and credit insurers.

The absence of a coherent body of case law on due process has increasingly motivated recalcitrant parties to use due process as a strategic tool, thereby putting at risk the prospect of obtaining an enforceable award in expeditious proceedings. Countering this inherent danger, here for the first time is a comprehensive study on due process as a limit to arbitral discretion, showing how due process applies in practice in key jurisdictions around the world. Based on country reports prepared by leading arbitration practitioners and academics, the book explores how courts in major arbitration jurisdictions apply due process guarantees when performing their post-award review. The contributors, driven by an interest in exploring the interplay between due process and efficiency, focus on those due process guarantees that set limits to arbitral discretion. Matters covered include the following: the right to be heard and how it may be affected by submission deadlines, evidentiary offers by the opposing party, and directions to the parties as to which aspects require further pleading; the right to be treated equally and its interplay with the duty to give each party full opportunity to present its case and to comment on submissions and evidence filed by the other party; the duty to effect proper notice, including delivery and language issues; the independence and impartiality of arbitrators with a focus on when an arbitrator's conduct can become the basis for a successful challenge; and courts' standards of deference when examining issues arising at the post-award stage. An introductory general report thoroughly analyses the normative basis of due process and its interplay with party autonomy, as well as applicable standards of review and commonalities among manifestations of due process across jurisdictions. A signal contribution to the debate regarding the so-called due process paranoia affecting arbitral tribunals – a topic relevant in every single arbitration proceeding – this book provides practical guidelines on how to maintain the balance between due process and efficiency and how to apply due process and counteract its misuse in arbitration proceedings. It will be welcomed by counsel, arbitrators, and judges from all countries, as well as by academics and researchers concerned with international commercial arbitration.

One of the world's top experts in behavioral finance offers innovative strategies for improving 401(k) plans. Half of Americans do not have access to a retirement saving plan at their workplace. Of those who do about a third fail to join. And those who do join tend to save too little and often make unwise investment decisions. In short, the 401(k) world is in crisis, and workers need help. Save More Tomorrow provides that help by focusing on the behavioral challenges that led to this crisis inertia, limited self-control, loss aversion, and myopia—and transforms them into behavioral solutions. These solutions, or tools, are based on cutting edge behavioral finance research and they can dramatically improve outcomes by, for

example, helping employees: -Save, even if they aren't ready to do so now, by using future enrollment. -Save more by showing them images of their future selves. -Save smarter by reshuffling the order of funds on the investment menu. Save More Tomorrow is the first comprehensive application of behavioral finance to improve retirement outcomes. It also makes it easy for plan sponsors and their advisers to apply these behavioral tools using its innovative Behavioral Audit process.

The vast majority of international trade is supported by some form of trade financing: a specialized, sometimes complex form of financing that is poorly understood even by bankers and seasoned finance and treasury experts. Financing Trade and International Supply Chains takes the mystery out of trade and supply chain finance, providing a practical, straightforward overview of a discipline that is fundamental to the successful conduct of trade: trade that contributes to the creation of economic value, poverty reduction and international development, while increasing prosperity across the globe. The book suggests that every trade or supply chain finance solution, no matter how elaborate, addresses some combination of four elements: facilitation of secure and timely payment, effective mitigation of risk, provision of financing and liquidity, and facilitation of transactional and financial information flow. The book includes observations on the effective use of traditional mechanisms such as Documentary Letters of Credit, as well as an overview of emerging supply chain finance solutions and programs, critical to the financing of strategic suppliers and other members of complex supply chain ecosystems. The important role of export credit agencies and international financial institutions is explored, and innovations such as the Bank Payment Obligation are addressed in detail. Financing Trade and International Supply Chains is a valuable resource for practitioners, business executives, entrepreneurs and others involved in international commerce and trade. This book balances concept with practical insight, and can help protect the financial interests

of companies pursuing opportunity in international markets.

This first-of-its-kind textbook presents an overview of the fundamental nature and regulatory structure of forex transactions operating within the Indian banking system. Though international trade theory is well discussed in academic circles, trade finance is often viewed as the prerogative of bankers, financiers and professionals. However, with the increase in cross-border expansion of trade, financial aspects of international trade has turned out to be one of the key components of various educational programs, at both undergraduate and post-graduate levels. This textbook discusses different types of forex transactions, the regulatory framework within which they take place and the associated risks and solutions. It tries to resolve the existing disparity in the understanding and interpretation of regulatory guidelines and the practices adopted by banks and corporates in implementing them. The cases and examples, integrated throughout the chapters, are coupled with resolutions to the problems discussed and substantial explanation of the underlying principles. Key Features • Caselets and problem definitions weaved throughout the chapters to aid understanding of forex in different realms • Discussion on the roles of institutions other than banks and corporate houses such as RBI, FEDAI, ECGC and DGFT in international trade finance • Ideal companion for students of international finance, international banking, forex business and trade finance, financial markets and others

The Trade and Receivables Finance Companion: A Collection of Case Studies and Solutions is based on the author's personal experience gained through more than 40 years in the field of trade finance. This Companion applies the techniques described in his first volume, Trade and Receivables Finance: A Practical Guide to Risk Evaluation and Structuring to an extensive range of international trade scenarios. Practical solutions are discussed and presented through a specially selected collection of more than 20 case studies. These books provide an unrivalled and highly practical set of manuals for the trade and receivables financier. The reader is taken on a journey from the structuring of trade products including collections, import and export letters of credit, back to back credits, guarantees and standby credits to fully and partially structured financing solutions for the importer, manufacturer, distributor, middle-party and exporter. Each funding technique provides a compelling alternative to an overdraft. The case studies include the risk assessment and financing of open account payables, stock and receivables transactions and the evaluation and use of credit insurance as a supporting tool. The structuring of commodity finance across the trade cycle, to include warehousing, and call-off is also described. Many of the chapters contain a summary 'keynote' overview and comprehensive 'deal sheet' extracts of the chosen solution detailing facility and operational requirements.
