By the Managing Director of the famous Workers' Co-op, this is the real story of the last bastion of British Motorcycle production following the collapse of the industry.

Triumph 1050 Sprint ST, Speed Triple, and Tiger Service and Repair Manual

Triumph Bonneville: 60 Years is a celebration one of motorcycling's most iconic and beloved bikes. First manufactured in Great Britain in 1959, Triumph's legendary model resonates deeply with motorcycle enthusiasts worldwide who love its style, sound, performance, and undeniable coolness. It's no surprise that Triumph was Steve McQueen's favorite ride. The Bonneville's story is one of successes and challenges as Triumph grew steadily in the post-World War II decades to become America's most successful "import" motorcycle marque. Triumph won every championship worth winning, owned the world speed record for fifteen years, and wooed Hollywood's hottest stars. Bonneville was Triumph's halo machine, one of the highest performance motorcycles of the 1960s. However, as competing marques eventually eclipsed the Bonneville in the 1970s, Triumph management struggled, leading first to bankruptcy and then to the demise of the company in 1983. Triumph was resurrected by British industrialist John Bloor in the late 1990s to become a twenty-first century global success story, which includes a revived and thoroughly retro-contemporary Bonneville range.

The long-departed Steve McQueen is still the coolest man on two wheels. Get an

intimate look at his coolest bikes right here, right now, in McQueen's Motorcycles. Even thirty years after his death, Steve McQueen remains a cultural icon. His image continues to appear in advertising and pop culture and his fan base spans from car lovers to racing enthusiasts to motorcycle obsessives. In his movies, McQueen's character always had an envy-inducing motorcycle or car, but in his personal life, motorcycles were always McQueen's first true love. McQueen's Motorcycles focuses on the bikes that the King of Cool raced and collected. From the first Harley McQueen bought when he was an acting student in New York to the Triumph "desert sleds" and Huskys he desert raced all over California, Mexico, and Nevada, McQueen was never without a stable of two wheelers. His need for speed propelled him from Hollywood into a number of top off-road motorcycle races, including the Baja 1000, Mint 400, Elsinore Grand Prix, and even as a member of the 1964 ISDT team in Europe. Determined to be ahead of the pack, McQueen maintained his body like it was a machine itself. He trained vigorously, weight lifting, running, and studying martial arts. Later in his life, as he backed away from Hollywood, his interests turned to antique bikes and he accumulated an extensive collection, including Harley-Davidson, Indian, Triumph, Brough Superior, Cyclone, BSA, and Ace motorcycles. Today, McQueen still has the Midas touch; anything that was in the man's possession is a hot commodity. McQueen's classic motorcycles sell for top dollar at auctions, always at a multiple of what the same bike is worth without the McQueen pedigree. McQueen's Motorcycles reveals these highly sought-after machines in gorgeous photography and full historical context.

Triumph's Bonneville and its single-carbed sibling, the TR6, are two of the most revered models in all of motorcycling. Distinguished by their handsome lines and pace-setting performance, the Bonneville and Tiger ruled the streets and race tracks from their introduction in the late 1950s through Triumph's golden age in the 1960s. Devotion to the marque remained strong even as the sun slowly set on the company's fortunes in the late 1970s and early 1980s. The original Triumph's demise in 1983 simply served to cement the legendary status of its long-lived top guns, the Bonneville and TR6.
