Patterns for Improvisation

"Only Katy Simpson Smith could have written a novel of such elegance, emotional power, and grace. The Everlasting, a quadruple love story spanning two millennia, is no less than the story of love itself—its frustrations and thrills, its blunders and transcendent glories. Meraviglioso."—Nathaniel Rich, author of King Zeno
From a supremely talented author comes this brilliant and inventive literary work of historical fiction, set in Rome in four different centuries, that explores love in all its various incarnations and ponders elemental questions of good and evil, obedience and free will that connect four unforgettable lives. Spanning two thousand years, The Everlasting follows four characters whose struggles resonate across the centuries: an early Christian child martyr; a medieval monk on crypt duty in a church; a Medici princess of Moorish descent; and a contemporary field biologist conducting an illicit affair. Outsiders to a city layered and dense with history, this quartet separated by time grapple with the physicality of bodies, the necessity for sacrifice, and the power of love to sustain and challenge faith. Their small rebellions are witnessed and provoked by an omniscient, time-traveling Satan who, though incorporeal, nonetheless suffers from a heart in search of repair. As their dramas unfold amid the brick, marble, and ghosts of Rome, they each must decide what it means to be good. Twelve-year old Prisca defiles the scrolls of her father's library. Felix, a holy man, watches his friend's body decay and is reminded of the first boy he loved passionately. Giulia de' Medici, a beauty with dark skin and limitless wealth, wants to deliver herself from her unborn child. Tom, an American biologist studying the lives of the smallest creatures, cannot pinpoint when his own marriage began to die. As each of these conflicted people struggles with forces they cannot control, their circumstances raise a profound and timeless question at the heart of faith: What is our duty to each other, and what will God forgive? Moving back through time from today (The Wilderness) to the Renaissance (The City) to the Middle Ages (The Grave) and finally to Rome under Marcus Aurelius (The Paradise), Tom, Guilia, Felix, and Prisca search and suffer for love in the eternal city, made vivid and familiar as they reappear in each century.

Science Year 9

The New York Times bestselling author of *My Sunshine Away* returns with a warm, surprising, and humorous novel about a mysterious machine that upends a small Louisiana town. What would you do if you knew your life's potential? That's the question facing the town of Deerfield, Louisiana, when an unusual new contraption appears in their local grocery store. The DNAMIX machine is nothing to look at, really--it resembles a plain photo booth. But its promise is amazing: with just a quick swab of your cheek and two dollars, the device will use the science of your DNA to tell you your life's potential. Soon the former teachers, nurses, and shopkeepers of the town are upending their lives to pursue their destinies as magicians, cowboys, and queens--including Douglas Hubbard and his wife, Cherilyn, who both believed they were leading perfectly happy lives until they realized they could dream for more. At equal turns moving and hilarious, *The Big Door Prize* explores the ways in which the glimmer of opportunity can bring a community together, pull it apart, and reveal the power of self-discovery and second chances, even under the strangest of circumstances.

Heal Us, Emmanuel

Time Capsule is Kendall Dunkelberg's second full length collection of poetry. In it he explores themes of love, marriage, and fatherhood against the backdrop of contemporary American life, ranging from his childhood home in Iowa to Mississippi, where he has lived for the past fifteen years. Cross-country travel to Massachusetts, New Mexico, Alabama, and Georgia, as well as a honeymoon in Spain, also informs his vision. These poems traverse myth and memory through cycles of nature and culture, life and death, to arrive at a tranquil, if tenuous, sense of equilibrium.

Blue Sky God interprets some new scientific theories with blue sky thinking to bring radical insights into God, Jesus and humanity, drawing also on some deep wells from the past in the writings of the early Christians. In an accessible style, it looks at science research and theories in areas such as quantum physics and consciousness, epigenetics, morphic resonance and the zero point field. From there, seeing God as the compassionate consciousness at the ground of being, it draws together strands to do with unitive consciousness and the Wisdom way of the heart. Throughout, it seeks to encourage an evolution in understanding of the Christian message by reinterpreting much of the theological language and meaning that has become 'orthodoxy' in the West. In doing so, it challenges many of the standard assumptions of Western Christianity. It outlines a spiritual path that includes elements from all of the world's great religions, is not exclusive, and yet has a place of centrality for Jesus the Christ as a Wisdom teacher of the path of transformative love.

Interpreting the Bill of Rights

The first ten amendments to the U.S. Constitution were written to safeguard individual liberties and limit government power. Was the Bill of Rights necessary, or did it open up a can of worms the framers didn't intend? Throughout the course of U.S. history, amendments have been subject to various interpretations, often to the point of contention. In this informative anthology, readers will be exposed to the complex issues of interpreting a document that was created more than two hundred years ago.

Case Interview Success

Dear Isaiah, Eight months ago, you were just a soldier about to be deployed and I was just a waitress, sneaking you a free pancake and hoping you wouldn't notice that my gaze was lingering a little too long. But you did notice. We spent one life-changing week together before you left, and we said goodbye on day eight, exchanging addresses at the last minute. I saved every letter you wrote me, your words quickly becoming my religion. But you went radio silent on me months ago, and then you had the audacity to walk into my diner yesterday and act like you'd never seen me in your life. To think I almost loved you and your beautifully complicated soul. Almost. Whatever your reason is— I hope it's a good one. Maritza the Waitress PS - I hate you, and this time I mean it.

My Christmas Journal

Future Babble

An award-winning journalist uses landmark research to debunk the whole expert prediction industry, and explores the psychology of our obsession with future history. In 2008, experts predicted gas would hit \$20 a gallon; it peaked at \$4.10. In 1967, they said the USSR would be the world's fastest-growing economy by 2000; by 2000, the USSR no longer existed. In 1908, it was pronounced that there would be no more wars in Europe; we all know how that turned out. Face it, experts are about as accurate as dart-throwing monkeys. And yet every day we ask them to predict the future- everything from the weather to the likelihood of a terrorist attack. *Future Babble* is the first book to examine this phenomenon, showing why our brains yearn for certainty about the future, why we are attracted to those who predict it confidently, and why it's so easy for us to ignore the trail of outrageously wrong forecasts. In this fast-paced, example-packed, sometimes darkly hilarious book, journalist Dan Gardner shows how seminal research by UC Berkeley professor Philip Tetlock proved that the more famous a pundit is, the more likely he is to be right about as often as a stopped watch. Gardner also draws on current research in cognitive psychology, political science, and behavioral economics to discover something quite reassuring: The future is always uncertain, but the end is not always near.

Deeds of Darkness

Most Christians would say they believe all people are made in the image of God and are equal before him. They would say red, brown, yellow, black, and white, they are precious in his sight. But do they have any friends of another race? Is there anyone at their church who does not look like them? Does this matter to God? The majority of American Christians do not have significant relationships with anyone who does not look like them, which makes them susceptible to cultural blind spots and less effective as ambassadors for biblical justice. The thirty church leaders who contributed to Heal Us, Emmanuel desire racial reconciliation, representation, and supernatural unity in all the churches of Christ.
