The Yellow Wallpaper

The Strange Case of Donald J. Trump provides a coherent and nuanced psychological portrait of Donald Trump, drawing upon biographical events in the subject's life and contemporary scientific research and theory in personality, developmental, and social psychology. Dan P. McAdams, renowned psychologist who pioneered the study of lives, examines the central personality traits, personal values and motives, and the interpersonal and cultural factors that together have shaped Trump's psychological makeup, with an emphasis on the strangeness of the case--that is, how Trump again and again defies psychological expectations regarding what it means to be a human being. The book's central thesis is that Donald Trump is the episodic man. The chapters, structured as stand-alone essays each riffing on a single psychological theme, build on each other to present a portrait of a person who compulsively lives in the moment, without an internal story to integrate his life in time. With an emphasis on scientific personality research, rather than political rhetoric, McAdams shows that Trump's utter lack of an inner life story is truly exceptional. This book is a remarkable case study which should be of as much interest to psychologists as it is to readers trying to reckon with the often confounding behavior and temperament of the 45th President of the United States.

Required Reading for every Feminist “I’m sure I never used to be so sensitive. I think it is due to this nervous condition.” — Charlotte Perkins Gilman, *The Yellow Wallpaper* *The Yellow Wallpaper* is a psychological short story about a Victorian woman on the edge of a nervous breakdown. When her husband deems she needs a "rest cure" after the birth of their child, they rent an abandoned colonial mansion with a "queer air" about it. The narrator's room has horrible yellow wallpaper which incites her descent into madness. This short story is an early American feminist work and explores the role of women in a patriarchal society. This eleventh volume in the series departs from the pattern of earlier volumes. Some of those volumes addressed research, design, and policy topics in terms of environmental settings, for example, homes, communities, neighborhoods, and public places. Others focused on environmental users, for example, children and the elderly. The present volume examines the field of environment and behavior studies itself in the form of intellectual histories of some of its most productive and still

visible senior participants. In so doing we hope to provide readers with a grand sweep of the field-its research and design content, methodology, institutions, and past and future trajectories-through the experiences and intellectual histories of its participants. Why intellectual histories? Several factors led to the decision to launch this project. For one, 1989 was an anniversary and commemorative year for the Environmental Design Research Association, perhaps the major and most long-standing interdisciplinary organization of environment and behavior researchers and practitioners. Established in 1969, this organization has been the vehicle for generations of researchers and practitioners from many disciplines to come together annually to exchange ideas, present papers, and develop professional and personal relationships. It held its first and twentieth meetings in North Carolina, with the twentieth conference substantially devoted to discussions of the past, present, and future of the field-a taking stock, so to speak. Thus it seemed appropriate to launch a volume on intellectual histories at this significant juncture in the life of the field.

Americans have always put the past to political ends. The Union laid claim to the Revolution--so did the Confederacy. Civil rights leaders said they were the true sons of liberty--so did Southern segregationists. This book tells the story of the centuries-long struggle over the meaning of the nation's founding, including the battle waged by the Tea Party, Glenn Beck, Sarah Palin, and evangelical Christians to "take back America." Jill Lepore, Harvard historian and New Yorker staff writer, offers a careful and concerned look at American history according to the far right, from the "rant heard round the world," which launched the Tea Party, to the Texas School Board's adoption of a social-studies curriculum that teaches that the United States was established as a Christian nation. Along the way, she provides rare insight into the eighteenth-century struggle for independence--a history of the Revolution, from the archives. Lepore traces the roots of the far right's reactionary history to the bicentennial in the 1970s, when no one could agree on what story a divided nation should tell about its unruly beginnings. Behind the Tea Party's Revolution, she argues, lies a nostalgic and even heartbreaking yearning for an imagined past--a time less troubled by ambiguity, strife, and uncertainty--a yearning for an America that never was. *The Whites of Their Eyes* reveals that the far right has embraced a narrative about America's founding that is not only a fable but is also, finally, a variety of fundamentalism--anti-intellectual, antihistorical, and dangerously antipluralist. In a new afterword, Lepore addresses both the recent shift in Tea Party rhetoric from the Revolution to the Constitution and the diminished role of scholars as political commentators over the last half century of public debate.

and oral presentations. This book thoroughly explains writing as a four-step process involving writing as a tool for thinking and learning, drafting, revising, and editing. The authors provide explicit instruction along with annotated student samples of the experimental lab report, the term paper, and the exam essay. Samples also help to explain effective note taking, annotation of research materials, the keeping of reading-response and research logs, and methods of varying written style. Readers learn how to plan their written projects and how to seek and receive good advice on revising drafts. The book also includes a section on dealing with the most common errors in grammar, punctuation, and spelling as well as a concise guide to APA style. For those who need to know the standards for writing in the field of psychology.

A bold, epic account of how the co-evolution of psychology and culture created the peculiar Western mind that has profoundly shaped the modern world. Perhaps you are WEIRD: raised in a society that is Western, Educated, Industrialized, Rich, and Democratic. If so, you're rather psychologically peculiar. Unlike much of the world today, and most people who have ever lived, WEIRD people are highly individualistic, self-obsessed, control-oriented, nonconformist, and analytical. They focus on themselves—their attributes, accomplishments, and aspirations—over their relationships and social roles. How did WEIRD populations become so psychologically distinct? What role did these psychological differences play in the industrial revolution and the global expansion of Europe during the last few centuries? In *The WEIRDest People in the World*, Joseph Henrich draws on cutting-edge research in anthropology, psychology, economics, and evolutionary biology to explore these questions and more. He illuminates the origins and evolution of family structures, marriage, and religion, and the profound impact these cultural transformations had on human psychology. Mapping these shifts through ancient history and late antiquity, Henrich reveals that the most fundamental institutions of kinship and marriage changed dramatically under pressure from the Roman Catholic Church. It was these changes that gave rise to the WEIRD psychology that would coevolve with impersonal markets, occupational specialization, and free competition—laying the foundation for the modern world. Provocative and engaging in both its broad scope and its surprising details, *The WEIRDest People in the World* explores how culture, institutions, and psychology shape one another, and explains what this means for both our most personal sense of who we are as individuals and also the large-scale social, political, and economic forces that drive human history. Include black-and-white illustrations.

Writing an amazing college admission essay is easier than you think! So you're a high school senior given the task of writing a 650-word personal statement for your college application. Do you tell the story of your life, or a story from your life? Do

you choose a single moment? If so, which one? The options seem endless. Lucky for you, they're not. College counselor Ethan Sawyer (aka The College Essay Guy) will show you that there are only four (really, four!) types of college admission essays. And all you have to do to figure out which type is best for you is answer two simple questions: 1. Have you experienced significant challenges in your life? 2. Do you know what you want to be or do in the future? With these questions providing the building blocks for your essay, Sawyer guides you through the rest of the process, from choosing a structure to revising your essay, and answers the big questions that have probably been keeping you up at night: How do I brag in a way that doesn't sound like bragging? and How do I make my essay, like, deep? Packed with tips, tricks, exercises, and sample essays from real students who got into their dream schools, College Essay Essentials is the only college essay guide to make this complicated process logical, simple, and (dare we say it?) a little bit fun.
