In this sequel to the Rise of the Human Androids, lizard like aliens called the Sharptors have perfected high-energy shields for hyperspace travel and begun exploring the galaxy. Meanwhile, James decides to not run for re-election for President of Mars. He plans instead to search the galaxy for old ones technology in a heavy cruiser with a supergun named after his wife. His wife and two children will join him on this journey. Susan, Mars' Secretary of State and former President of

the U.S. will run for James' spot and James' adopted human android daughter Martha will run for vice-president. James' actions are motivated by the re-emergence of Ergone as the Marshall of the powerful and independent Altararian military. James knows Ergone wants to avenge his loss to Mars and Earth in their last war. James fears the Altararians with their vastly superior forces will crush Mars if he can't find advanced technology to stop them. In a chance meeting, James encounters the Sharptors while looking at a promising planet for exploration. A fight breaks out. James wins the encounter but the Sharptor warship escapes. Still, a plan begins to emerge in James' mind of how to use the aggressive new aliens against the Altararians. Meanwhile James and his associates explore an old ones site on their promising new earth like world Sisney 1. They must battle a super aggressive mammal the Ratang and insect the Botos, which have stripped Sisney 1 of almost all of its land animal life as they explore the site. They find new technology at the site, which they plan to use against the Altararians. Meanwhile a secret organization called the Committee, which has controlled many economic events on Earth, finds it difficult to control Mars and its allied planets. As a result, to make themselves relevant in the changing world around them, they join with bigoted groups on Mars and Ganymede and in a secret deal with the Altararians to sabotage Mars efforts to arm itself against the expected Altararian invasion. Many characters on Earth, Mars and Ganymede battle this super secret group in their efforts to prepare Mars for the Altararian invasion. All these forces clash as Mars struggles to survive its confrontation with the Altararians and preserve its Utopian World of human androids and human immigrants.

Faith can be the cornerstone of ones strength. While some may believe having faith means their lives will be free of conflict and loss, in reality, the opposite is often true. Holding on to My Faith: Memoirs of an Unbroken Spirit is the story of author Terrieanne E. Stotts medical, physical, mental, and spiritual struggles that resulted from the many autoimmune diseases she has. Shes coped with varied facets of her various illnesses, has been hospitalized on numerous occasions, and endured unbelievable pain. Stott has also been the victim of severe verbal, physical, and mental abuse stemming from her multiple failed marriages. Her life would be a trial for most of us. But despite her circumstances, Stotts faith has never waived. It has resulted in, among other things, two children who have become successful adults. Although Holding on to My Faith: Memoirs of an Unbroken Spirit depicts many difficult, even terrible situations, it is a story of victory and an unbroken spirit. Youll see how even though faith will not stop bad things from happening, it will show you how to get through those situations and thrive.

In discussing strategies for police work in a diverse society, this book considers the impact of cultural diversity on law enforcement, training in cultural understanding for law enforcement, cultural specifics for law enforcement, response strategies to crimes motivated by hate/bias, and cultural effectiveness for peace officers. Part I introduces readers to the implications of a multicultural society for law enforcement, both within and outside the police agency. Two chapters discuss the preparation and implementation of cultural awareness training and cross-cultural communication for law enforcement. Part III presents chapters on police contact with five cultural groups in the United States: Asian/Pacific Americans, African-Americans, Latino/Hispanic Americans, Arab Americans and other Middle Eastern groups, and American Indians. Part IV contains three chapters that explain strategies for preventing, controlling, reporting, tracking, and investigating crimes that are based on hate or bias because of the victim's race, ethnicity, religion, or sexual orientation. In 1973, the central office of the German police, the Federal Criminal Police Office, was legally obliged "to maintain the necessary facilities for research in forensic science", "to monitor crime trends and compile analytical reports and statistics on this basis", and "to conduct research with a view to developing police methods and procedures for crime control". This task is undertaken in the Research and Training Institute by the research units on criminology and criminal investigation and on technological development. In this volume, researchers from the Institute present their latest projects as well as report on the activities undertaken since 1973. This gives you a comprehensive picture of their wide-ranging work. They also examine the role that specialized police research plays for crime policy-makers, detectives and criminologists. A list of publications from the Federal Criminal Police Office completes the book.
