English For All (Rev. Ed.)

Journey through Words is an anthology of prose and poetry for the first year BA and BSc courses of Dr Babasaheb Ambedkar Marathwada University, Aurangabad. It has been prepared from texts that we already have in other anthologies and have been put together on the specific request of the university. The exercises in comprehension, vocabulary and language work have been added in-house. Each text has a detailed glossary to enable the student to understand the text, an author-write-up to give the student an idea of the background of the writer and exercises that will help him/her to build language skills on the basis of comprehension and expression of ideas.

ADVANCED ACCOUNTANCY VOL-1 - 9TH EDN

Computer studies is a rapidly changing and increasingly popular subject area. This book is intended for people who are meeting the subject for the first time. It gives full coverage of the core and optional material from many examination syllabuses and is particularly relevant to students taking the CXC Information Technology, Cambridge O-level or International GCSE examinations. Major features include: full coverage of applications; a structured introduction to programming in a language-independent style; extensive coverage of techniques in systems analysis and design; summaries for each chapter; exercises in each chapter to provide practice for examinations.

Mathematics for Management

Elements of Statistics provides an introduction to statistics and probability for students across a wide range of disciplines. The emphasis on problem solving through analysis of data is enhanced by extensive use of real data sets throughout, drawn from a wide range of subject areas to highlight the diversity of statistics. Written to support self-study, this book provides an excellent foundation in statistics.

A Sunny Morning

Modern Marketing Management

Essentials of Management

As E-Commerce refers to the paperless exchange of business information using Electronic Data Interchange (EDI), electronic funds transfer and other network-based technologies, companies have to look

at integrating their backend and front office processes and activities. This book presents the technology and non-technology aspects of e-commerce and takes it to a level that gives a clear understanding of the basic building blocks for its implementation. The book begins with the basics in the first and second part, and describes the Internet and Intranets. The third part describes EDI, the UN/EDIFACT Standards, Extranets and tracking tools. Part four comprises security - a critical component of e-commerce. Different cryptographic systems and Public Key Certification method based on X.509 standards have been covered. Part five delves into reengineering and management of change and legal issues.

Principles of Marketing

The 6th edition of Principles of Marketing makes the road to learning and teaching marketing more effective, easier and more enjoyable than ever. Today's marketing is about creating customer value and building profitable customer relationships. With even more new Australian and international case studies, engaging real-world examples and up-to-date information, Principles of Marketing shows students how customer value-creating and capturing it-drives every effective marketing strategy. The 6th edition is a thorough revision, reflecting the latest trends in marketing, including new coverage of social media, mobile and other digital technologies. In addition, it covers the rapidly changing nature of customer relationships with both companies and brands, and the tools marketers use to create deeper consumer

involvement.

Integral Education

This book proposes new technologies and discusses future solutions for ICT design infrastructures, as reflected in high-quality papers presented at the 4th International Conference on ICT for Sustainable Development (ICT4SD 2019), held in Goa, India, on 5–6 July 2019. The conference provided a valuable forum for cutting-edge research discussions among pioneering researchers, scientists, industrial engineers, and students from all around the world. Bringing together experts from different countries, the book explores a range of central issues from an international perspective.

Logical Reasoning and Data Interpretation for the CAT

Financial Management: Theory and Practice celebrates the 23rd Anniversary of its publication. Over these two decades, Indian business and finance have considerably changed owing to deregulation, liberalisation, privatisation, globalisation, and the ascendance of the services sector. The book has kept pace with these changes and captures the central themes and concerns of corporate financial management-making it both contemporary and comprehensive. The book seeks to:

- *Build understanding of the central ideas and theories of modern finance
- *Develop familiarity with the analytical techniques helpful in financial decision making
- *Furnish institutional material relevant for understanding the environment in which financial decisions are taken
- *Discuss the practice of financial management.

Indian Literary Criticism

International Trade and Export Management

This text not only covers all topics required for a fundamental course in computer graphics but also emphasizes a programming-oriented approach to computer graphics. The book helps the students in

understanding the basic principles for design of graphics and in developing skills in both two- and three-dimensional computer graphics systems. Written in an accessible style, the presentation of the text is methodical, systematic and gently paced, covering a range of essential and conceivable aspects of computer graphics, which will give students a solid background to generate applications for their future work. The book, divided into 11 chapters, begins with a general introduction to the subject and ends with explaining some of the exciting graphics techniques such as animation, morphing, digital image processing, fractals and ray tracing. Along the way, all the concepts up to two-dimensional graphics are explained through programs developed in C. This book is intended to be a course text for the B.Tech/M.Tech students of Computer Science and Engineering, the B.Tech students of Information Technology and the M.Sc. students pursuing courses in Computer Science, Information Science and Information Technology, as well as the students of BCA and MCA courses. Key Features : Fundamentals are discussed in detail to help the students understand all the needed theory and the principles of computer graphics. Extensive use of figures to convey even the simplest concepts. Chapter-end exercises include conceptual questions and programming problems.
