A blended learning approach to automotive engineering at levels one to three. Produced alongside the ATT online learning resources, this textbook covers all the theory and technology sections that students need to learn in order to pass levels 1, 2 and 3 automotive courses. It is recommended by the Institute of the Motor Industry and is also ideal for exams run by other awarding bodies. Unlike the current textbooks on the market though, this title takes a blended learning approach, using interactive features that make learning more enjoyable as well as more effective. When linked with

the ATT online resources it provides a comprehensive package that includes activities, video footage, assessments and further reading. Information and activities are set out in sequence so as to meet teacher and learner needs as well as qualification requirements. Tom Denton is the leading UK automotive author with a teaching career spanning lecturer to head of automotive engineering in a large college. His nine automotive textbooks published since 1995 are bestsellers and led to his authoring of the Automotive Technician Training multimedia system that is in common use in the UK, USA and several other countries.

The explosion of Patina Volkswagens on social media has inspired those car fanatics who realise that you don't have to restore a car to end up with a good-looking ride. At last, you can stand out from the crowd, even on a tight budget. The look of the cars that result from patina builds is honest, unspoiled, and characterful; it has also inspired the media, movie stars and celebrities. Interest in patination has undoubtedly resulted in increased car values, and turned a brand of cars that had always been a cheap, honest mode of transportation into something cool with a high price tag. The people the look initially inspired have grown with the hobby, finding ways to still be cool on a tight budget and producing a micro-industry that still manages to embrace the 'built not bought' ethos. How to Build a Patina Volkswagen book takes a look at the differing styles of patina VW build,

and imparts tips on finding and buying a project car, carrying out a sympathetic patina style renovation and includes a chapter on re-creating a patina finish on repaired areas or missing parts.

By the late 1960s the Beetle had enjoyed over twenty years of continuous production, dominated its home market and conquered export markets all around the world. Volkswagen's policy of constant improvement and refinement to a single model appeared to be vindicated. However, 1968 saw the death of Heinz Nordoff, who was the driving force behind the Beetle's evolution and continued success. In many ways, this was a watershed year; the 1968 model introduced many significant changes to the car, and it became inevitable that a replacement for the venerable Beetle would have to be developed. This book charts the closing years of the Beetle's production life in Germany; from the revamped 1968 model to the 1302, 1303, the Cabriolet, and the various Specials produced later. Topics covered include: - Brief history , 1935-1967 - Full history, 1968-1980 - Comprehensive production survey - Specification and detail changes by model year [August 1967 to January

1980] - Engine options - Factory fitted optional equipment - Paint and trim colors - Special and export editions - The Karmann Cabriolet
